Introduction

Regional School District No. 6’s Professional Development and Evaluation Plan has been designed to create pathways for the continuous learning and advancement of educational professionals throughout their careers. The Program components are aligned with the Core Requirements of the Connecticut Guidelines for Educator Evaluation. Regional School District No. 6’s Professional Development and Evaluation Plan represents our commitment to incorporating current, high-quality research in the creation of professional learning opportunities, to fostering best practices in teacher supervision and evaluation, and to improving student learning through effective curriculum, instruction, and assessment practices, in our classrooms, schools and programs. As such, the Program: a) addresses the elements of CT’s Core Requirements for Teacher and Administrator Evaluation; b) is aligned with our school’s missions and values; and c) meets the educational needs of the stakeholders in our school.

Core Values and Beliefs about Professional Learning

Regional School District No. 6’s Professional Development and Evaluation Plan establishes high standards for the performance of teachers and administrators that ultimately lead to and are evidenced by improved student learning. Professional standards, including Connecticut’s Common Core of Teaching (2010), Connecticut’s Common Core of Leading-Connecticut School Leadership Standards (2012), the Standards for Professional Learning (2012), and national standards for educational specialists provide the foundation for Regional School District No. 6’s Professional Development and Evaluation Plan.

We acknowledge that deep student learning and high achievement that transfers to enrichment of future learning, career and personal experiences later in life is built by the collaborative, interdependent work of teachers and administrators, students and families, and school districts and the communities they serve. Therefore, our Program seeks to create a professional culture in our educational programs that is grounded in the following beliefs:

We believe that:
• An effective teaching and learning system must reflect and be grounded in the vision and core values of the district and its schools.

• An effective teaching and learning system creates coherence among the functions of supervision and evaluation of professional practice, professional learning and support, and curriculum and assessment development.

• A comprehensive evaluation process includes:
  o ongoing inquiry into and reflection on practice;
  o goal-setting aligned with expectations for student learning;
  o information gathered from multiple sources of evidence;
  o analysis of data from multiple sources of evidence;
  o support structures for feedback, assistance, and professional collaboration;
  o research-based professional learning opportunities aligned with the needs of teachers.

• An effective teaching and learning system that increases educator effectiveness and student outcomes is standards-based, and promotes and is sustained by a culture of collaboration and knowledge-sharing.

  Philosophy of Professional Evaluation

The purpose of educator evaluation is to improve student achievement outcomes through effective instruction and support for student and educator learning. A variety of factors support the improvement of learning and instruction. The Regional School District No. 6 Professional Development and Evaluation Plan addresses all these factors systemically. It is a comprehensive system that is based on clearly defined expectations that consist of domains of skills, knowledge, and disposition articulated in the Common Core of Teaching (CCT); the Common Core of Leading (CCL), Connecticut School Leadership Standards; the Connecticut Framework K-12 Curricular Goals and Standards; the Smarter Balanced Assessments; and the Region 6 curriculum standards.

The Professional Learning Program supports the development of educators at all stages of their careers, as it weaves together professional standards with expectations for student learning, and ongoing evaluation with access to professional learning and support. The Program’s teacher observation and evaluation instrument, the 21st Century Instruction & Learning Standards - Instructional Practice Rubric is designed to align with the processes and professional performance profiles outlined in Connecticut’s Teacher Education and Mentoring (TEAM) program, which provides differentiated professional learning for all beginning teachers. Such alignment promotes the establishment of common, consistent vocabulary and understandings about teacher practice at all levels, among administrators and teachers, throughout the district.
Regional School District No. 6’s professional evaluation program takes into account school improvement goals, curricular goals, student learning goals, and evidence of educators’ contributions to the school as a whole. Performance expectations within our Program also include those responsibilities that we believe to be the key in promoting a positive school climate and the development of a professional learning community.
Professional Development and Evaluation Plan Goals

1. Professionalize the Profession
   · Document and share educators’ best practices that result in meaningful advancement of student learning.
   · Enhance expert knowledge and collective efficacy in the field.
   · Create new opportunities for educators to collaborate and develop leadership skills in their schools and disciplines.
   · Recognize and reward excellence in teaching, administration, and exemplary contributions to Regional School District No. 6 schools and programs.
   · Ensure that only high-quality professionals are selected for tenure in Regional School District No. 6 schools and programs.
   · Provide a process for validating personnel decisions, including recommendations for continued employment of staff.

2. Improve the quality and focus of observation and evaluation
   · Establish collaborative examinations of instructional practice among administrators and teachers to develop shared understanding of the strengths and challenges within our schools and programs to improve student learning.
   · Define and clarify criteria for evaluation and measurement of student learning, using research-based models for evaluation.
   · Establish multiple measures to assess professional practice, such as: teacher portfolios; teacher-designed objectives, benchmarks, and assessments of student learning; teacher contributions to school/district level research on student learning and professional resources; mentoring and peer assistance; achievement of learning objectives for student growth, as measured by appropriate standardized assessments, where applicable, or other national or locally-developed curriculum benchmarks and expectations for student learning.
   · Improve quantity and quality of feedback to those evaluated.
   · Align evaluation findings with professional learning program and support systems.

3. Support organizational improvement through the Professional Development and Evaluation Plan
   · Align district- and school-level professional learning opportunities with the collective and individual needs of educators, based on data acquired through professional learning goal plans and observations of professional practice.
   · Provide educators with multiple avenues for pursuing professional learning.
   · Integrate Regional School District No. 6 resources to support and provide professional learning opportunities.
   · Create formal and informal opportunities for educators to share professional learning with colleagues.
Roles and Responsibilities
for Professional Learning and Evaluation

Definition of Teacher and Evaluator
Evaluator refers to all individuals (including school and district administrators) whose job responsibilities include supervision and evaluation of other teachers. Teacher, as used in this document, shall mean all certified instructional and non-instructional persons below the rank of Administrator.

Superintendent’s Role in the Evaluation Process
- Arbitrate disputes.
- Allocate and provide funds or resources to implement the plan.
- Serve as liaison between Regional School District No. 6’s Board of Education and the evaluation process.
- The Superintendent or designee will be responsible for ensuring that the Professional Development Committee receives information regarding school and program improvement and individual professional growth goals for use in planning staff development programs.

Responsibility for Evaluations
The Superintendent and administrators will be responsible for evaluations, including, but not limited to, personnel in the following categories:

Superintendent
- Principal
- Director of Student Services
- Chief Academic Officer

Principal
- Assistant Principal/Data Coordinator

Administrators (Principal, Assistant Principal, Chief Academic Officer)
- Teachers
- Guidance Counselors

Director of Student Services
- Psychologist
- Speech Language Pathologists
- Other Related Services Personnel
- Special Education Teachers
- Social Worker
**Department Heads/Other Qualified Teachers**
- Teachers
- Special Education Teachers
- Social Workers
- Psychologist

**Roles and Responsibilities of Evaluators and Evaluatees**
The primary purpose of educator evaluation is to strengthen individual and collective practices to improve student growth. Therefore, evaluators and evaluatees share responsibilities for the following:
- 21st Century Instruction & Learning Standards - Instructional Practice Rubric.
- The review and understanding of Connecticut’s Common Core of Leading (CCL) and the Leadership Practice Rubric.
- The review and familiarity with applicable portions of Connecticut Core State Standards, Connecticut’s Frameworks of K-12 Curricular Goals and Standards, the CMT/CAPT Assessments (and Smarter Balanced Assessments, when available), as well as locally-developed curriculum standards.
- Adherence to established timelines.
- Completion of required components in a timely and appropriate manner.
- Sharing of professional resources and new learning about professional practice.

**Evaluator Roles**
- Review of and familiarity with evaluatees’ previous evaluations.
- Participation in collaborative conferences with evaluatees.
- Assistance with assessment of goals, student learning indicators, learning activities developed and implemented by evaluatees, and outcomes.
- Analysis and assessment of performance, making recommendations as appropriate.
- Clarification of questions, identification of resources, facilitation of peer assistance and other support as needed.

**Evaluatee Roles**
- Reflection on previous feedback from evaluations.
- Engagement in inquiry-based professional learning opportunities.
- Participation in collaborative conferences with evaluator.
- Development, implementation, and self-assessment of goals, student learning indicators, learning activities, and outcomes.
- Request clarification of questions or assistance with identification of professional resources and/or peer assistance.
Implementation of Professional Development and Evaluation Plan

Training and Orientation of Teachers and Administrators
Teachers and administrators new to Regional School District No. 6 (employed after implementation) will be provided with copies of the Professional Learning and Evaluating Program and will engage in training to ensure that they understand the elements and procedures of the Program, processes and documents. This training will take place upon employment or prior to the beginning of the school year with members of Regional School District No. 6’s Administration.

New Educator Support and Induction
In the interest of supporting all educators in the implementation of the Program, Regional School District No. 6 will offer localized support to new staff. A variety of general topics will be addressed, including:

- School philosophy and goals
- Policies and procedures
- Assignments and responsibilities
- Facility and staffing
- Curriculum and instructional support
- Resources for professional learning
- Schedules and routines
- Support services

In addition, periodic meetings with school personnel will focus on domains of the Common Core of Teaching, Common Core of Leading, Connecticut Core Standards in English and Language Arts, Mathematics, and the Content Areas, discipline policies, stakeholder communication, effective collaboration, classroom interventions, special education, evaluation and professional responsibilities.

Evaluator Orientation and Support
Understanding of Regional School District No. 6’s Professional Development and Evaluation Plan’s features, 21st Century Instruction & Learning Standards, Connecticut’s Common Core of Teaching (CCT), Common Core of Leading (CCL), Connecticut Core Standards, Standards for Professional Learning, and the components of professional evaluation and observation is essential to facilitating the evaluation process and promoting student growth. To that end, evaluators will be provided with on-going training and support in the use and application of Regional School District No. 6’s Evaluation Program. Evaluators will
review Program elements and procedures prior to the beginning of each school year and at other appropriate intervals, to be determined. Plans for staff training will be coordinated annually by Regional School District No. 6’s Principal, Assistant Principal, Chief Academic Officer and Director of Student Services.

**Resources for Program Implementation**

Funds to provide material and training as well as time for Professional Learning options and collaboration necessary to support the successful achievement of the teachers’ goals, objectives and implementation of the Evaluation Program will be allocated annually and determined on a program by program basis.

**Dispute Resolution**

The purpose of the resolution process is to secure at the lowest possible administrative level, equitable solutions or disagreements which from time to time may arise related to the evaluation process. The right of appeal is a necessary component of the evaluation process and is available to every participant at any point in the evaluation process. As our evaluation system is designed to ensure continuous, constructive and cooperative processes among professional educators, most disagreements are expected to be worked out informally between evaluators and evaluatees.

The resolution process may be implemented when there is a question as to whether or not:

1. evaluation procedures and/or guidelines have been appropriately followed;
2. adequate data has been gathered to support fair and accurate decisions.

The resolution process shall be conducted in accordance with the law governing confidentiality.

**Dispute Resolution - Evaluation Ratings**

**NOTE:** The evaluatee shall be entitled to a Union representation at all levels of the process.

1. Within three days of articulating the dispute in writing, the evaluatee will meet and discuss the matter with the evaluator with the object of resolving the matter informally.

2. If there has been no resolution, the Superintendent will review information from the evaluator and evaluatee and will meet with both parties as soon as possible. Within three days of the meeting, and review of all documentation and recommendations, the Superintendent will act as arbitrator and make a final decision.
**Time Limits**

1. Since it is important that appeals be processed as rapidly as possible, the number of days shall be considered maximum. The time limits specified may be extended by written agreement of both parties.

2. Days shall mean school days. Both parties may agree, however, to meet during breaks at mutually agreed upon times.

3. If an evaluatee does not initiate the appeals procedure within 5 working days of acknowledged receipt of evaluation materials, the evaluatee shall be considered to have waived the right of appeal.

4. Failure of the evaluatee at any level to appeal to the next level within the specified time shall be deemed to be acceptance of the decision rendered at that level.
TEACHER EVALUATION PLAN

Teacher Evaluation Plan Overview

Regional School District No. 6’s Professional Development and Evaluation Plan supports an environment in which educators have the opportunity to regularly employ inquiry into and reflection on practice, to give each other feedback, and to develop teaching practices that positively affect student learning.

To help foster such an environment, we have created the Professional Development and Evaluation Plan as a district-wide system that provides multiple opportunities and options for teachers to engage in individual and collaborative activities in which they collect, analyze, and respond to data about student learning, within and among Regional School District No. 6 schools and programs. Teachers and administrators are expected to provide evidence related to the effectiveness of instructional practices and their impact on student learning. Teachers and administrators are also expected to take an active role in a cycle of inquiry into their practice, development, implementation and analysis of strategies employed to advance student growth, and reflection on effectiveness of their practice. The Program includes an additional component, Professional Assistance and Support System (PASS), for those teachers and administrators in need of additional support to meet performance expectations.

Standards and Indicators of Teaching Practice

The expectations for teacher practice in Regional School District No. 6’s Professional Development and Evaluation Plan are defined using the three domains and their indicators of the 21st Century Instruction & Learning Standards - Instructional Practice Rubric Continuum. This tool is used for observing and assessing teacher practice in the domains, reflects the spirit and specifics of the CCT, articulates components of teaching, and establishes designations of levels of practice, including: Below Standard; Developing; Accomplished; Exemplary. The 21st Century Instruction & Learning Standards - Instructional Practice Rubric is provided in Appendix A of this document.

Core Requirements of the Evaluation Program

Regional School District No. 6’s Professional Development and Evaluation Plan is aligned with the Core Requirements of the State Board-approved Guidelines for Educator Evaluation, as provided in subsection (a) of Sec. 10-151b (C.G.S.), as amended by Sec. 51 of P.A. 12-116. The following is a description of the processes and components of Regional School District No.
6’s program for teacher evaluation, through which the Core Requirements of the Guidelines shall be met.

**Process and Timeline of Teacher Evaluation**

The annual evaluation process for a teacher will at least include, but not be limited to, the following steps, in order:

1. **Orientation (by September 15):**
   To begin the annual evaluation process, evaluators meet with teachers, in groups and/or individually, to discuss the evaluation process and their roles and responsibilities within it. In this meeting, they will review and discuss the following:
   1. **The 21st Century Instruction & Learning Standards - Instructional Practice Rubric.**
   2. administrator, school, and district priorities that should be reflected in teacher performance and practice goals.
   3. SLO goal which will be developed through **mutual agreement** between the teacher and his or her evaluator and is related to student outcomes and achievement.
   4. data regarding whole-school indicators of student learning.
   5. self-assessment processes and purposes.
   6. data collection, including types of data and processes for collection and analysis.
   7. access to the online evaluation system
   8. access to district and school goals
   Evaluators and teachers will establish a schedule for collaboration required by the evaluation process.

2. **Goal-setting Conference – by October 15:**
   *Teacher Reflection*—In advance of the Goal Setting Conference, the teacher will examine data related to current students’ performance (including, but not limited to: standardized tests, portfolios and other samples of student work appropriate to teacher’s content area, etc.), the prior year’s evaluation, and survey results, previous professional learning goals, and the **21st Century Instruction & Learning Standards - Instructional Practice Rubric.** The teacher will draft the following goals:
   a) **one SLO Goal** to address student learning and achievement objectives, which will comprise 45% of a teacher’s summative evaluation;
   b) **a performance and practice goal**, based on student performance data, **whole-school climate survey** or learning data, teacher reflection and previous year’s evaluator observations and review of the **21st Century Instruction & Learning Standards - Instructional Practice Rubric;**
   c) **a goal aligned with a whole-school goal** determined by the school administrator based on data from **parent feedback**; and
d) a **goal based on whole school indicators of student learning** for the school year as determined by Student Feedback.

Teachers may collaborate in grade-level or subject-matter teams to support the goal-setting process where appropriate.
First-year beginning teachers may find it helpful to reflect on their practice goals with their mentor teachers, using the TEAM program’s Module Resources and Performance Profiles, to determine a baseline for establishing goals.

**Goal-setting conference** – No later than October 15 of the school year, the evaluator and teacher will meet to discuss the teacher’s proposed goals in order to arrive at mutual agreement about them. The goals for the year must be informed by data and evidence collected by the teacher and evaluator about the teacher’s practice. The evaluator collects evidence about teacher practice to support the review and may request revisions to the proposed goals and objectives if they do not meet approval criteria.

**Examples of data and evidence that may be included in the goal-setting conference:**

| Lesson Plans | Class List |
| Formative Assessment Data | Standardized and non-standardized Data (based on the teacher’s class) |
| Summative Assessment Data | School-Level Data |
| Student Work | 21st Century Instruction & Learning Standards - Instructional Practice Rubric |
| Parent Communication Logs | Data Team Minutes |
| Survey Data | PLC Minutes |

**Observations of practice (by November 30, January 30, and April 30)**
Evaluators will observe teacher practice through formal and informal in-class observations and non-classroom reviews of practice throughout the school year, with frequency based on the year of implementation of the plan and the teacher’s summative evaluation rating (see Observation Schedule on p. 26).

**Evidence collection and review (throughout school year):**
The teacher collects evidence about his/her practice and student learning that is relevant to the agreed-upon professional goals. The evaluator also collects evidence about teacher practice for discussion in the interim conference and summative review.

**Interim Conference (by March 1):**
a. The evaluator and teacher will hold at least one conference near the mid-point of the evaluation cycle. The discussion should focus on processes and progress toward meeting the
goals and developing one’s practice. Both the teacher and the evaluator will bring evidence about practice and student learning data to review. The teacher and evaluator will discuss the cause and effect relationship of practice to student learning data, i.e. – how practice positively impacts student learning. During the conference, both the teacher and evaluator will make explicit connections between the 40% and the 45% components of the evaluation program. If necessary, teachers and evaluators may mutually agree to revisions to strategies or approaches used and/or mid-year adjustment of goals to accommodate changes (e.g., student populations, assignment). They also discuss actions that the teacher can take and supports the evaluator can provide to promote teacher growth in his/her development areas.

2. **End-of-year summative review (by June 15):**
   a. *Teacher self-assessment* – (due to the evaluator 5 working days prior to the end-of-year conference). The teacher reviews and reflects upon all information and data collected during the year related to the goals and completes a self-assessment for review by the evaluator. This self-assessment may focus specifically on the areas for development, referencing the *21st Century Instruction & Learning Standards - Instructional Practice Rubric* and established in the goal-setting conference.
   b. *The self-assessment should address all components of the evaluation plan and include what the teacher learned throughout the year supported by evidence and personal reflection. The self-assessment should also include a statement that identifies a possible future direction that is related to the year’s outcomes.*
   c. *End-of-year conference* - The evaluator and the teacher meet to discuss all evidence collected to date. The teacher and evaluator will discuss the extent to which students met the SLO goals and how the teacher’s performance and practice focus contributed to student outcomes and professional growth. Following the conference, the evaluator assigns a summative rating and generates a summary report of the evaluation before the end of the school year.
   d. *Summative Rating*—The evaluator reviews submitted evidence, self-assessments, and observation data to generate category and focus area ratings. The category ratings generate the final, summative rating using the summative rating matrix. After all data, including state test data, are available, the evaluator may adjust the summative rating if the state test data change the student-related indicators significantly to change the final rating. Such revisions should take place as soon as state test data are available, and before August 15.

3. **Summative rating revisions (by August 15)**
   a. After all data, including state test data, are available, the evaluator may adjust the summative rating if the state test data have a significant impact on a final rating. A final rating may be revised when state test data are available, before August 15 of a school year.
**Components of Teacher Evaluation and Rating**

The Core Requirements of the CT Guidelines for Teacher Evaluation require that districts weight the components of teacher’s annual summative evaluations and ratings as follows:

**CATEGORY 1: Student Outcomes and Achievement (45%)**

Forty-five percent (45%) of a teacher’s evaluation will be based on achievement of student learning outcomes (SLO) defined by a teacher-created SLO goal that is aligned with both standardized and non-standardized measures. Teachers are required to develop one SLO goal using multiple indicators to show student growth and development toward that goal. Teachers teaching in a subject affected by standardized test data must include at least one standardized indicator and at least one non-standardized indicator of student growth and development. Teachers or other certified support personnel who do not teach in a subject affected by standardized test data must include at least two non-standardized indicators of student growth and development.

One half (or 22.5%) of the IAGDs used as evidence of whether goals/objectives are met shall not be determined by a single, isolated test score, but shall be determined through the comparison of data across assessments administered over time, including the state test for those teaching tested grades and subjects or another standardized indicator for other grades and subjects where available. A state test can be used only if there are interim assessments that lead to the test, and such interim assessments shall be included in the overall score for those teaching tested grades and subjects. For the other half (22.5%) of the indicators of academic growth and development, a minimum of one non-standardized indicator must be used in rating 22.5% of IAGDs (e.g. performances rated against a rubric, portfolios rated against a
rubric, etc.) and a maximum of one additional standardized indicator, if there is mutual agreement, subject to the local dispute-resolution procedure.

Sources for the development of non-standardized indicators may include:

- Curricular benchmark assessments.
- Student portfolios of examples of work in content areas collected over time and reviewed annually.
- Student constructed projects.
- Teacher created pre- and post-assessments.

SMART goals for all personnel must demonstrate alignment with district and school-wide student achievement priorities.

**Goal Setting**

Regional School District No. 6 teachers’ SLO goal addresses the learning needs of their students and is aligned to the teacher’s assignment. The student outcome related indicators will be written to meet SMART goal criteria, i.e. Specific, Measurable, Attainable, Relevant, and Time-Bound. Teachers will write at least two (2) SMART indicators for the SLO goal that will address targeted areas for student growth and/or achievement.

The SLO goal will:

1. take into account the academic record and social, emotional, and behavioral needs and strengths of the students that teacher is teaching that year/semester.
2. address the most important purposes of a teacher’s assignment through self-reflection.
3. align with school, district, and state student achievement objectives.
4. take into account students’ learning needs vis-à-vis relevant baseline data.
5. be aligned to state and national curriculum standards/frameworks.
6. **be mutually agreed upon by teacher and their evaluator.**
7. be fair, valid, reliable and useful to the greatest extent possible.

**SLO Goals and Student Progress**

The following diagram illustrates the processes involved in establishing and assessing the SLO goal for student learning.
To write a meaningful and relevant goal with SMART indicators that align to their teaching assignment and result from a thorough knowledge of their students, data analysis is required. Examples of data that teachers may be required to analyze are:

- Student outcome data (academic)
- Behavior data (absences, referrals)
- Perceptual data (learning styles, results from interest inventories, anecdotal, etc.)

Teachers must learn as much as they can about the students they teach, be able to document baseline data that they have used to determine their instructional focus and be able to write SMART indicators on which they will, in part, be evaluated.

Analysis of these initial pieces of data on incoming students for the year should be completed by mid-September of the academic year.

Each teacher will write ONE SLO goal.

The SLO goal should make clear:
1. what evidence was or will be examined
2. what level of performance is targeted
3. strategies used to help students to reach learning targets
4. what assessment(s)/indicators will be used to measure the targeted level of performance
5. what proportion of students is projected to achieve the targeted performance level.

SMART indicators can also address student subgroups, such as high or low-performing students or ELL students. It is through the Phase I examination of student data that teachers will determine what level of performance to target for which students.

Teachers will submit their SLO goal and SMART indicators to their evaluator for review and approval. The review and approval process of the SMART goal will take place during the Goal-Setting conference, on or before October 15. Evaluators will review and approve the SMART indicators based on the following criteria, to ensure they are as fair, reliable, valid, and useful to the greatest possible extent:

- **Priority of Content**: SMART indicator is deeply relevant to teacher's assignment and addresses the most important purposes of that assignment.

- **Rigor of SMART indicator**: SMART indicator is attainable, but ambitious, and represents at least one year's student growth (or appropriate growth for a shorter interval of instruction).

- **Analysis of Student Outcome Data**: SMART indicators provide specific, measurable evidence of student outcome data through analysis by the teacher and demonstrates knowledge about students' growth and development.

Once the SLO goal and SMART indicators are approved, teachers must monitor students' progress toward achieving student learning SMART indicators.

Teachers may monitor and document student progress through:
- Examination of student work.
- Administration of periodic formative assessments.
- Tracking of students’ accomplishments and challenges.

Teachers may choose to share their findings from formative assessments with colleagues during collaborative time. They may also wish to keep their evaluator apprised of progress.
Artifacts related to the teacher’s monitoring practices can be reviewed and discussed during the Mid-Year Conference.

**Interim Conferences - Mid-year check-ins:**

Evaluators and teachers will review progress toward the SLO goal and SMART indicators at least once during the school year, using available information and data collected on student progress. This review may result in revisions to the instructional strategies or approaches teachers use. Teachers and evaluators may mutually agree to mid-year adjustments to the SLO goal and SMART indicators for the purpose of accommodating significant changes in student population or teaching assignment. The Mid-Year Conference will take place by March 1 of the academic year.

<table>
<thead>
<tr>
<th>Phase 4:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assess students to determine progress towards or achievement of SLO goal and SMART indicators</td>
</tr>
</tbody>
</table>

**End-of-year review of SMART goals/ Student Outcomes and Achievement:**

*End of Year Conference* – The teacher shall collect evidence of student progress toward meeting the SLO goal. This evidence will reflect student progress toward meeting SMART indicators for learning. The evidence will be submitted to the evaluator, and the teacher and evaluator will discuss the extent to which the students met the SLO goal and SMART indicators. Following the conference, the evaluator will rate the extent of student progress toward meeting the SLO goal and SMART indicators, based on criteria for the 4 performance level designations shown in the table below.

<table>
<thead>
<tr>
<th>Performance Level</th>
<th>Rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exceeded</td>
<td>4 points</td>
</tr>
<tr>
<td>Met</td>
<td>3 points</td>
</tr>
<tr>
<td>Partially Met</td>
<td>2 points</td>
</tr>
<tr>
<td>Did Not Meet</td>
<td>1 point</td>
</tr>
</tbody>
</table>

Evaluators will review the evidence and the teacher's self-assessment and assign one of four ratings to each SMART goal: Exceeded (4 points), Met (3 points), Partially Met (2 points), or Did Not Meet (1 point). These ratings are defined as follows:
To arrive at a rating for the SLO goal and each SMART indicator, the evaluator will review the results from data collected as a body of evidence regarding the accomplishment of the goal and score the achievement of the SLO goal and the SMART indicators holistically.

The final rating for Category 1: Student Outcomes and Achievement rating for a teacher is their SLO goal and SMART indicators score. Goal score may be calculated by assigning an equal weight for each IAGD associated with the goal. For example, if one IAGD was Partially Met, for 2 points, and the other IAGD was Met, for 3 points, the student growth and development rating would be 2.5 [(2+3)/2]. The individual SMART indicator ratings and final Student Outcomes and Achievement rating will be shared and discussed with teachers during the End-of-Year Conference.

**CATEGORY 2: Teacher Performance and Practice (40%)**

Forty percent (40%) of a teacher’s evaluation will be based on observation of teacher practice and performance, using the *21st Century Instruction & Learning Standards - Instructional Practice Rubric*.  

**The 21st Century Instruction & Learning Standards - Instructional Practice Rubric Continuum**

The *21st Century Instruction & Learning Standards - Instructional Practice Rubric Continuum*, the observation instrument for Regional School District No. 6’s Professional Development and Evaluation Plan, has been developed to align with Connecticut’s Common Core of Teaching (CCT) and to reflect the content of its domains and indicators. The CCT has defined for Connecticut’s educators key aspects of effective teaching, correlated with student learning and achievement, that have been evidenced in professional literature.

| **Exceeded (4)** | All or most students met or substantially exceeded the target(s) contained in the indicator(s). |
|**Met (3)** | Most students met the target(s) contained in the indicators within a few points on either side of the target(s). |
|**Partially Met (2)** | Many students met the target(s), but a notable percentage missed the target by more than a few points. However, taken as a whole, significant progress towards the goal was made. |
|**Did Not Meet (1)** | A few students met the target(s) but a substantial percentage of students did not. Little progress toward the goal was made. |
The 21st Century Instruction & Learning Standards - Instructional Practice Rubric, which observers will use in conducting teacher observations and reviews of practice, was developed by a team from Education Connection, who reviewed the six domains and 46 indicators that comprise the CCT, relevant research on effective instructional practices that improve student learning and achievement, and other models for observation of professional teaching practice (Danielson, 2011; Marshall, 2011; Marzano, et al., 2011 ). The 21st Century Instruction & Learning Standards - Instructional Practice Rubric represents a distillation of each of these resources to three domains and 10 indicators crucial to effective practice that can be observed and applied in appraisals of teachers.

The 21st Century Instruction & Learning Standards - Instructional Practice Rubric addresses several principles that are essential components of effective teacher performance and practice. These principles are explicitly embedded in the 21st Century Instruction & Learning Standards - Instructional Practice Rubric as observable practices, and teachers and evaluators are required to reflect on these practices during pre- and post-observation conferences and self evaluations. The overarching principles of the 21st Century Instruction & Learning Standards - Instructional Practice Rubric are:

- Diversity as enrichment of educational opportunities for all students;
- Differentiation as a necessity for success and equal opportunities for all students;
- Purposeful use of technology as a pathway to access to learning for all students;
- Collaboration as essential to producing high levels of learning for all students;
- Data collection and analysis as essential to informing effective planning, instruction, and assessment practices that enhance student learning;
- Professional learning as integral to improved student outcomes.

Key attributes of teacher performance and practice outlined in the CCT are reflected in the descriptors of the Indicators within the 21st Century Instruction & Learning Standards - Instructional Practice Rubric, so that evaluators and teachers may understand how these attributes apply in practice, observations, and evaluation. Teacher lesson plans and associated documentation, pre-observation, post-observation, and teacher self-reflection forms and related conversations, as well as non-classroom reviews of practice, such as communication with families, collaboration with colleagues, participation in data teams, professional learning presentations by faculty members, participation in mentoring, instructional rounds, PPTs and action research, all provide rich data related to the CCT standards and the effectiveness of teachers’ performance and practice.

In employing the CCT as its foundation, the 21st Century Instruction & Learning Standards - Instructional Practice Rubric maintains consistency with Connecticut’s TEAM program of mentorship and professional development of new teachers. TEAM’s Performance Profiles, which also describe attributes of effective teaching practice along a continuum for each of its professional growth modules, apply the CCT indicators as the focus for new teacher reflection
on their practice and development of differentiated professional growth plans. The 21st Century Instruction & Learning Standards - Instructional Practice Rubric and TEAM both rely on rich professional discussion about and reflection on professional practice to advance teacher effectiveness and student learning. Therefore, consistency between these two programs makes it possible for all educators to acquire common understandings and language about teaching and learning, with the intent of enriching collaboration, communication, and community to pave the way for school improvement and success for all students.

**Teacher Goal Setting for Performance and Practice**
In preparation for instructional planning and Goal-Setting Conferences with evaluators, teachers will analyze their student data and use the 21st Century Instruction & Learning Standards - Instructional Practice Rubric to reflect on their own practices and their impact on student performance. Based on that reflection, teachers will develop a performance and practice goal to guide their own professional learning and improvements in practice that will ultimately promote student growth and achievement of student outcome goals. Teacher practice goals will not be evaluated, but should result in improvements in teacher knowledge and skills which will be evidenced in observations of teacher performance and practice.

**Data Gathering Process**
Regional School District No. 6 evaluators will use the 21st Century Instruction & Learning Standards - Instructional Practice Rubric to guide data collection from three sources: teacher conferences, classroom observations and reviews of practice.

Over the course of the school year, evaluators will gather evidence for all Indicators and Domains of the 21st Century Instruction & Learning Standards - Instructional Practice Rubric which will allow teachers to demonstrate: the context for their work; their ability to improve student learning and performance; their ability to engage in reflective practice to improve their own knowledge and skills; how they exercise leadership skills within their classrooms, schools and district.

**Observation of Teacher Practice**
Observations, both formal and informal, provide valuable information to all professional staff about instructional practice. Data collected through observations allow school leaders to understand more about the nature of learning and instruction in our schools, and feedback from observation provides individual teachers with insights regarding the impact of their management, planning, instruction, and assessment practices on student growth. Annually, administrators will engage in professional learning opportunities, including online or other approved options and collaborative sessions that will develop their skills in effective observation providing meaningful, useful feedback, and engaging in productive professional conversations with teachers.
Evaluators and other instructional leaders use a combination of formal (Year 1) and informal (Years 2 and 3), announced and unannounced observations to:

1. Gather evidence of and facilitate professional conversation regarding the quality of teacher practice;
2. Provide constructive oral and written feedback of observations that is timely and useful for educators;
3. Provide information for the on-going calibration of evaluators and evaluation practices in the district.

Administrators may differentiate the number of observations based on experience, prior ratings, needs and goals of individual teachers.

Formal and informal observations are defined as follows:

* Formal: Observations that last at least 30 minutes and are followed by a post-observation conference, which includes timely written and verbal feedback.
* Informal: Observations that last at least 10 minutes and are followed by written and/or verbal feedback.

In addition to formal conferences for goal-setting and performance review and formal observations during Year 1, informal observations of teachers by evaluators will occur during observation Years 2 and 3. Observations are for the purpose of helping teachers to gain insights
about their professional practice and its impact on student learning. Formal and informal observation of teachers is considered a normal part of the evaluator's job responsibilities. More importantly, observation is essential for establishing a culture of continuous learning for educators and for understanding the nature, scope and quality of student learning in a school as a whole. In addition to in-class observations, at least one non-classroom review of practice will be conducted each year. The Professional Development and Evaluation Plan also establishes opportunities for teachers to participate in informal, non-evaluative observations of teacher practice for the following purposes: to enhance awareness of teaching and learning practices in our schools; to create opportunities for problem-based professional learning projects and action research to improve student learning; and to enhance collaboration among teachers and administrators in advancing the vision and mission of their schools.

- Teachers who receive a summative performance evaluation designation of Below Standard or Developing for the previous year will receive a number of observations appropriate to their individual development plan, but no fewer than three in-class formal observations. At least two of the three observations will include a pre-conference and all will include a post-conference with written and verbal feedback provided within five school days.

- Teachers who receive a summative performance evaluation designation of Accomplished or Exemplary for the previous year will receive at least one formal in-class observation and one review of practice during Year 1 of the evaluation cycle. Teachers will receive at least 3 informal in-class observations and 1 review of practice during Years 2 and 3 of the evaluation cycle.

| PILOT Cycle for RSD6 teachers with three or more years of experience and a summative rating of Proficient or Exemplary in the previous year | All tenured certified staff have the choice of either  
- 1 formal observation, one review of practice, OR  
- 3 informal observations, one review of practice. | Those teachers electing one formal observation must have a pre-conference and post-conference with verbal and/or written feedback.  
Those teachers electing three informal will receive feedback, either verbal and/or written. |
| | Each staff member's decision to be made by October 15th. | |

All RSD6 teachers with three or more years of experience and a summative rating of Proficient or Exemplary in the previous year will have at least 1 formal, in-class observation every three years.

### Evaluation Ratings for Performance and Practice

Evaluation ratings will be assigned at the end of each school year. After gathering and analyzing evidence for all Indicators within each of the Domains 1-3, evaluators will use the 21st Century Instruction & Learning Standards - Instructional Practice Rubric to initially assign ratings of Below Standard, Developing, Accomplished or Exemplary. **Ratings will be made at the Domain level only.** Ratings for each Indicator will be averaged together to determine the Domain level rating. If the average score lies between two ratings, then the score given the power indicator should be given extra weight in making the decision - up or down. In the event that a rating of Below Standard is given in a power indicator, the score for that domain **CANNOT** be Accomplished regardless of the other indicator scores.
EVALUATOR TRAINING AND PROFICIENCY

Formal observations of classroom practice are guided by the Domains and indicators of the 21st Century Instruction & Learning Standards - Instructional Practice Rubric. Evaluators participate in extensive training and are required to be Accomplished in the use of the 21st Century Instruction & Learning Standards - Instructional Practice Rubric for educator evaluation. Training is conducted annually (at a minimum) to ensure consistency, compliance, and high-quality application of the 21st Century Instruction & Learning Standards - Instructional Practice Rubric in observations and evaluation. Formal observations include pre- and post-conferences that provide opportunities for deep professional conversations that allow evaluators and teachers to set goals, allow administrators to gain insight into the teacher’s progress in addressing issues and working toward their goals, and share evidence each has gathered during the year.

All evaluators new to Regional School District No. 6 will be required to participate in the training, proficiency and support sessions described above. All Regional School District No. 6 evaluators will be required to demonstrate proficiency in the use of the 21st Century Instruction & Learning Standards - Instructional Practice Rubric for educator evaluation annually. Any evaluator who does not initially demonstrate proficiency will be provided with additional practice and coaching opportunities as needed and will be required to successfully complete online or other approved proficiency activities. In the second year of proficiency, evaluators will be required to calibrate their ability to appropriately apply the 21st Century Instruction & Learning Standards - Instructional Practice Rubric by participating in district update/calibration sessions.

CATEGORY 3. Parent Feedback (10%)

Ten percent (10%) of a teacher’s evaluation shall be based on parent feedback, including data from surveys and may also include focus group data.

Regional School District No. 6 schools strive to meet the needs of all of the students all of the time. To gain insight into what parents perceive about our ability to accomplish this, a school-wide parent survey will be used. The survey instrument to be used was developed by Panorama Education. The surveys, used both nationally and internationally, have been subjected to a rigorous vetting process that has found them to be fair, reliable, valid, and useful.

Using an online Parent Survey that allows for anonymous responses, Regional School District No. 6 will collect and analyze parent feedback data that will be used for continuous improvement. Surveys will be administered one time per year, in May. The May survey data will be used as baseline data for the following academic year. Analysis of survey data will be conducted on a school-wide basis, with certified staff engaged in the analysis, and result in two to three school-wide improvement goals. After the school-level goals have been set, teachers will determine through consultation and mutual agreement with their evaluators one related
parent goal they would like to pursue as part of their evaluation. This goal should be aligned with the overall school improvement parent goals, and be ambitious and attainable. The parent feedback rating will be across four performance levels.

- **Exemplary** – Substantially exceeding indicators of performance
- **Accomplished** – Meeting indicators of performance
- **Developing** – Meeting some indicators of performance but not others
- **Below Standard** – Not meeting indicators of performance

**CATEGORY 4. Student Feedback (5%)**

Five percent (5%) of a teacher’s evaluation shall be based on student feedback.

Regional School District No. 6 will administer a grade-appropriate student engagement survey and communicate a Whole School Learning Indicator that is based on the survey results to which all certified staff will be held accountable. Certified staff will be asked to articulate in writing how they will, through their instructional practice, contribute to the achievement of the Whole School Learning Indicator.

Teachers’ efforts and actions taken towards achievement of the Whole School Learning Indicator will be discussed during the pre-, mid-year, and post-conferences. Teachers will be expected to bring artifacts from their practice that support and provide evidence of their contributions to the attainment of this indicator. Student surveys will be anonymous and demonstrate fairness, reliability, validity and usefulness.

- **Exemplary** – Substantially exceeding indicators of performance
- **Accomplished** – Meeting indicators of performance
- **Developing** – Meeting some indicators of performance but not others
- **Below Standard** – Not meeting indicators of performance

**Summative Teacher Evaluation Rating:**

Each teacher shall annually receive a summative rating in one of four levels:

- **Exemplary** – Substantially exceeding indicators of performance
- **Accomplished** – Meeting indicators of performance
- **Developing** – Meeting some indicators of performance but not others
- **Below Standard** – Not meeting indicators of performance
Exemplary ratings are reserved for performance that significantly exceeds proficiency and could serve as a model for teachers district-wide or even statewide. Few teachers are expected to demonstrate Exemplary performance on more than a small number of indicators.

Accomplished ratings represent fully satisfactory performance. It is the rigorous standard expected for experienced teachers.

Developing ratings indicate performance that has met a level of proficiency in some indicators but not others. Improvement is necessary and expected.

Below Standard ratings indicates performance that has been determined to be below Accomplished on all components or unacceptably low on one or more indicators.

Determining Summative Ratings

The process for determining summative evaluation ratings has three steps: (a) determining a teacher practice rating, (b) determining a teacher outcomes rating and (c) combining the two into an overall rating.

A. TEACHER PRACTICE RATING: Teacher Performance & Practice (40%) + Parent Feedback (10%) = 50%

The practice rating derives from a teacher’s performance on the three domains of the 21st Century Instruction & Learning Standards - Instructional Practice Rubric and the parent feedback target. Evaluators record a rating for the domains that generates an overall rating for teacher practice. The Parent Feedback rating is combined with the Teacher Practice rating and the evaluator uses the matrix to determine an overall Teacher Performance & Practice Rating.

B. TEACHER OUTCOMES RATING: Student Outcome & Achievement (45%) + Whole-School Student Learning Indicators (5%) = 50%

The outcomes rating derives from the one student learning outcome & achievement measure with multiple indicators – One SLO goal – and whole-school learning indicators outcomes. As shown in the Summative Rating Form, evaluators record a rating for the SLO goal agreed to in the beginning of the year. Indicators have an equal weight. For example, two indicators would each account for 22.5% of the total 45%. The Whole-School Student Learning Indicator Rating is combined with the SLO goal rating and the evaluator uses the matrix to determine an overall Outcomes Rating.

C. FINAL SUMMATIVE RATING: Teacher Practice Rating (50%) + Teacher Outcomes Rating (50%) = 100%
The Summative rating combines the practice and outcomes ratings using the matrix below. If the two areas in any Matrix are highly discrepant (e.g., a rating of Exemplary for Teacher Practice and a rating of Below Standard for Student Outcomes), then the evaluator and the evaluatee will re-examine the data and/or gather additional information in order to determine the rating for the Matrix.

*If upon re-examination of the data, the ratings do not change, the evaluator will use his/her professional judgment and the Matrix to determine the rating.*

In accordance with The CT Guidelines for Educator Evaluation, Regional School District No. 6’s Professional Development and Evaluation Plan employs a 4-level matrix rating system, as follows:

1. Annual summative evaluations must provide each teacher with a summative rating aligned to one of four performance evaluation designations: Exemplary, Accomplished, Developing and Below Standard.

2. In order to determine summative rating designations for each teacher, Regional School District No. 6 evaluators will:
   A. Rate teacher performance in each of the four Categories:
1. Student Outcomes and Achievement;
2. Observations of Teacher Performance and Practice;
3. Parent Feedback, and
4. Whole-School Student Learning Indicators.

B. Combine the Student Outcomes and Achievement (Category 1, above) and Whole-School Student Learning Indicator rating (Category 4, above) into a single rating, taking into account their relative weights. This will represent an overall “Outcomes Rating” of Exemplary, Accomplished, Developing, or Below Standard.

C. Combine the Observations of Teacher Performance and Practice rating (Category 2, above) and the Parent Feedback rating (Category 3, above) into a single rating, taking into account their relative weights; this will represent an overall “Practice Rating” of Exemplary, Accomplished, Developing, or Below Standard.

D. Combine the Outcomes Rating and Practice Rating into a final rating. In undertaking this step, teachers will be assigned a summative rating category of Exemplary, Accomplished, Developing, or Below Standard.

**Definition of Teacher Effectiveness and Ineffectiveness**

Novice teachers shall generally be deemed effective if said educator receives at least two sequential Accomplished summative ratings, one of which must be earned in the fourth year of a novice teacher’s career. A Below Standard summative rating shall only be permitted in the first year of a novice teacher’s career. There should be a trajectory of growth and development as evidenced by a subsequent rating of Developing or higher in year two and sequential Accomplished summative ratings in years three and four.

A post-tenure educator shall generally be deemed ineffective if said educator receives at least two sequential Developing summative ratings or one Below Standard summative rating at any time.
**Teacher Professional Assistance and Support System (PASS)**

**Assistance Plan Process**

The district will create a remediation plan for any teacher who demonstrates a pattern of receiving Developing or Substandard ratings.

**Description**

This phase is used for any teacher experiencing difficulties in meeting the standards in the 21st Century CCT Rubric, or assessed as “Ineffective” in a year-end summative evaluation. Any teacher assessed as “Ineffective” by definition in the Professional Development and Evaluation Plan, in a year-end summative evaluation, would begin an initial assistance plan at the beginning of the subsequent school year.

At any time, a teacher experiencing difficulties in meeting the standards in the 21st Century CCT Rubric may be placed on an assistance plan by his/her primary evaluator. However, preliminary interventions may be implemented prior to placement on a formal assistance plan. This may include repeating Year 1 of the Professional Status Cycle.

The district indicators for performance would include the following:

1. 21st Century CCT Rubric
2. Board of Education policies regarding Teaching Responsibilities
3. CT SDE Common Core of Teaching
4. National, state and district curriculum standards

The process for placing a certified staff member on an assistance plan includes the following:

- The evaluator must indicate that performance does not meet standard(s) through written communication that clearly describes the gap between the teacher’s current level of performance relative to the specific standard(s) from the 21st Century CCT Rubric.

- There must be sufficient documentation to clearly identify the gap in current performance relative to the specific standard(s) from the 21st Century CCT Rubric. This documentation may not be limited to classroom observation and may include, but not be limited to other sources of data as gathered by the evaluator. However, documentation must be relevant to the 21st Century CCT Rubric.
Once a teacher is placed on an assistance plan, another bargaining unit member may no longer evaluate the teachers. The design and management of the plan along with all evaluations related to the plan will become the responsibility of a Region 6 school administrator.

**Initial Plan of Assistance**

Teachers placed on an assistance plan will first receive an Initial Plan of Assistance ("Initial Plan"). This initial plan will be collaboratively developed by the teacher, the bargaining unit representative, and the evaluating administrator. The responsibility for offering the appropriate support and structures, as outlined below, lies with Regional School District No. 6. The responsibility for making and sustaining improvement lies directly with the teacher. The following will be addressed in the Initial Plan:

1. The specific standard(s) not currently being met in the 21st Century CCT Rubric will be clearly identified.
2. The evaluator’s requirements for improvement in meeting the standard(s) will be outlined.
3. The evaluator will offer support and any additional resources appropriate to assist the teacher in meeting the standard(s).
4. The evaluator will indicate that failure to improve performance to meet the standard(s) within a reasonable and specific period will result in the implementation of an Intensive Assistance Plan.
5. Whenever the evaluator notes a serious performance concern at a time that does not permit the implementation of an Initial Plan of Assistance within normal evaluation guidelines (e.g. the end of a school year), the evaluation period will extend into the next school year. The Superintendent may assign other evaluators to assist in this process.
6. When a teacher successfully completes the Initial Plan, he or she returns to the regular evaluation cycle. Any reoccurrence of concerns will result in the teacher being placed on an Intensive Assistance Plan ("Intensive Plan").
7. The teacher will be permitted to have bargaining unit representation at all conferences if he/she desires and requests such representation. The evaluator may invite other professional staff, including other administrators and teachers (with prior approval of the teacher), to participate in all conferences.
8. If the teacher does not agree with the content of the assistance plan, they may appeal to the Superintendent as stated in the remainder of this section.

**Intensive Assistance Plan**

A teacher who does not improve their current performance to meet the specific standard(s) within a reasonable amount of time, or whose difficulties re-occur (within a reasonable amount of time) or intensify, will be moved to an Intensive Plan. This intensive remediation plan will be collaboratively developed by the teacher, the bargaining unit representative, and the evaluating
The responsibility for offering the appropriate support and structures, as outlined below, lies with Regional School District No. 6. The responsibility for making and sustaining improvement lies directly with the teacher. This Intensive Plan:

- Clearly identifies the specific standard(s) not being met and includes classroom or other observation(s) and/or records, as well as additional sources of data which specifically describe the gap in current performance relative to the specific standard(s) from the 21st Century CCT Rubric.
- Clearly expresses the evaluator’s requirements for improved performance.
- Identifies the steps the teacher will take, the evidence the teacher will provide to demonstrate improvement, and appropriate resources to improve performance.
- Provides a reasonable and specific time period in which improvement will be made.
- Provides a monitoring system to be used in a supportive fashion, and includes a specific schedule of observations (announced or unannounced) and/or conferences as well as review of other appropriate data sources.
- At the end of the period specified by the evaluator in the Intensive Plan, the teacher will provide:
  - evidence that he or she has taken the steps necessary for improvement, and
  - A record of the steps taken and resources used.
- The evaluator will provide the teacher with a formal written assessment that will contain:
  - A record of the observations and/or conferences, as well as any reviews of other appropriate data sources held to monitor performance.
  - An assessment of performance in meeting the specific standard(s) identified as not being met as of the date of the assessment.
  - A statement that the current performance meets the specific standard(s) from the 21st Century CCT Rubric, or a recommendation for further administrative action which, depending upon the seriousness of the gap in current performance relative to the specific standard(s) from the 21st Century CCT Rubric, may include, as appropriate, recommendation for other administrative action including, but not limited to, recommendation for termination of employment.

A copy of the written assessment will be given to the teacher; the evaluator will keep one and one will be kept in the teacher’s personnel file in the District Office. The teacher will have the right to review the written assessment and may add written comments. The teacher may have bargaining unit representation at all conferences if he/she desires and requests such representation. The Superintendent, or his/her designee, may assign other evaluators to assist in this process.

**Dispute-Resolution**
When a resolution of differences cannot be reached, the issue in dispute will be referred for resolution to a subcommittee of the professional development and evaluation committee.
(PDEC). The Superintendent and the respective collective bargaining unit for the district will each select one representative from the PDEC to constitute this subcommittee, as well as a neutral party, as mutually agreed upon between the Superintendent and the collective bargaining unit. In the event that the designated committee does not reach a unanimous decision, the issue shall be considered by the Superintendent whose decision shall be binding.
**Evaluation-Based Professional Learning**

As our mission and vision imply, Regional School District No. 6 believes that the primary purpose for professional learning is school improvement as measured by the success of every student. We also believe that professional learning must focus on creating meaningful experiences for all staff members. Designing evaluation-based professional learning is a dynamic process. Working with program goals and data from the educator evaluation process, professional learning is planned to strengthen instruction around identified student growth needs or other areas of identified educator needs.

In mutual agreement with their evaluators all teachers will identify professional learning needs that support their goal and objectives. The identified needs will serve as the foundation for ongoing conversations about the teacher’s practice and impact on student outcomes. The professional learning opportunities identified for each teacher should be based on the individual strengths and needs that are identified through the evaluation process. The process may also reveal areas of common need among teachers, which can then be targeted with school-wide or district-wide professional learning opportunities.

We recognize that educators as well as students learn in different ways and have different learning needs at different points in their career. Effective professional learning, therefore, must be highly personalized and provide for a variety of experiences, including learning teams, study groups, individual study, etc. as well as opportunities for conducting research and collaborating with colleagues on content-based pedagogical activities.

The Standards for Professional Learning (Learning Forward, 2011) serves as the model for the district’s professional development plan. Each of the tenets of Regional School District No. 6’s Professional Development and Evaluation Plan is aligned with at least one, and often several, of the seven Standards for Professional Learning, as follows.

**TENETS OF THE REGIONAL SCHOOL DISTRICT NO. 6 PLAN:**

**ALIGNING STANDARDS AND PROCESSES:**

**Evaluation is a teacher-centered process:** We believe that, for evaluation to improve professional practice, it is essential to “make evaluation a task managed by a teacher, and not a thing done to a worker” (Peterson, 2000, p. 5).

- Teacher reflection on aspects of their instructional practice and its effect on student achievement, on other facets of responsibility to the school community, and on their professional contributions to their field is critical to improved practice for both veteran and novice teachers. [Standards: Learning Communities; Data; Outcomes]
* Educator self-reflection represents the initiation and culmination of the cycle of professional praxis and procedures for evaluation.

* Teachers collect and assemble relevant data related to student outcomes and their professional contributions, and determine how their data can be used in evaluation.

**Organizational culture matters:** The framework and outcomes of systems for the evaluation of teachers must reflect an understanding of the culture of schools as learning organizations (see Schein, 2010; Senge, 2012).

- It is vitally important to examine the core beliefs that underpin organizational processes such as professional learning and evaluation, as well as teachers’ and administrators’ perception of their roles and effectiveness, to effect positive changes in student learning, growth, and achievement. Further, it is important to evolve the role of principals and administrators from the sole judges and evaluators of teachers and teaching to emphasize their role as instructional leaders who collaborate with teachers.

* Evaluators and teachers support each other in the pursuit of individual and collective professional growth and student success through rich professional conferences and conversations. [Standards: Leadership; Resources]

* Each school’s core beliefs about student learning are the foundation for evaluation and support systems, and provide a focus for individual and collaborative reflections on personal practice and organizational functioning. [Standards: Learning Communities; Implementation]

* Teachers and administrators collaborate to observe instructional practices in their school and to analyze data on instruction and student performance. [Standards: Data; Outcomes]

* Teachers and administrators collaborate to plan, assess, and evaluate professional learning. [Standards: Leadership; Learning Communities; Implementation; Learning Designs]

**Evaluation and professional learning must be differentiated to increase organizational effectiveness:** There is a growing research base that demonstrates that individual and collective teacher efficacy (defined by Bandura, 1997, as “the group’s shared belief in its conjoint capabilities to organize and execute courses of action required to produce given levels of attainments”), is positively associated with and predictive of student achievement (Allinder, 1995; Goddard, et al., 2000; Moolenaar, et al., 2012; Tschannen-Moran and Barr, 2004)

- The needs of veteran and novice teachers are different, and evaluation-based professional learning is designed to meet those needs, inspire and motivate individual and collective efficacy, and build leadership capacity in schools and districts (see Peterson, 2000). [Standards: Learning Design; Leadership; Resources]

- The development of such structures as career ladders, personal professional portfolios, and opportunities are provided for teachers to share their learning from professional activities, findings from their own research or from research-based practices they have applied, classroom-level and professional accomplishments and/or challenges. [Standards: Data; Outcomes: Learning Communities; Leadership]
Career Development and Professional Growth

Regional School District No. 6 will provide opportunities for educator career development and professional growth based on the results of the evaluation. Educators with an evaluation of Accomplished or Exemplary will be able to participate in opportunities to further their professional growth, including attending state and national conferences and other professional learning opportunities.

For educators rated Exemplary, the following career development and professional growth opportunities would be available: observation of peers; mentoring/coaching early-career educators or educators new to Regional School District No. 6; participating in development of educator Professional Assistance and Support System plans for peers whose performance is Developing or Below Standard; leading Professional Learning Communities for their peers; and, targeted professional development based on areas of need.

1.1 - Appropriately challenging, relevant and differentiated experiences.

1.2 - Responsive and respectful, behavioral interventions. (P)

1.3 - Arrangement of the physical/virtual learning environment and the logistics of learning

2.1 - Clear purpose, thoughtful structures, discourse and inquiry for the construction of new learning.

2.2 - Higher order thinking and meaningful student engagement that leads to ownership of learning. (P)

2.3 - Differentiated instruction, positive personal interactions, questioning, and adjustment to learning experiences to meet the needs of all students.

2.4 - A variety of assessments that provide timely and descriptive feedback and support the progress all learners. (P)

3.1 - Professional growth that is continuous and purposeful and contributes to a positive school/community climate. (P)

3.2 - Communication and collaboration with families about their students, their student’s performance, and instructional program.

3.3 - Professional behavior in accordance with the Connecticut Code of Professional Responsibility for Educators.
## Domain 1: 20%

**Planning and Creating an Environment to Support Active Learning**

Teachers plan instruction in order to engage students in rigorous and relevant learning and to promote their curiosity about the world at large.

<tr>
<td><strong>1.1 - Appropriately challenging, relevant and differentiated experiences.</strong></td>
<td>The plan focuses mainly on literal understandings/ low levels of knowledge. Plans are not differentiated and/or not at an appropriate level of challenge. There is no recognition in the plan for the expression of the key attributes of curiosity, persistence, conceptual thinking or problem solving. Tools, digital resources and information literacy skills that could facilitate differentiation are not part of the instructional plan. Academic or behavioral concerns are either not identified or are without a defined plan of intervention strategy.</td>
<td>The instructional plan includes some tasks that reach higher levels of knowledge. Plans include some differentiation in instructional strategies but may not provide instruction at an appropriate level of challenge for all students. There is minimal recognition in the plan for the age appropriate expression of the key attributes of curiosity, persistence, conceptual thinking or problem solving. Tools, digital resources and information literacy skills that could facilitate differentiation are only tangentially part of the instructional plan. Academic or behavioral concerns are addressed and recommended plans of intervention are provided.</td>
<td>The plan includes differentiated tasks, resources and activities designed to engage students to higher levels of knowledge and scaffolds the learning appropriately. The plan meets the grade level standards or course level expectations for challenge and anticipates student understanding and addresses common content misconceptions. There is recognition in the plan of the importance for the age appropriate expression of key attributes of curiosity, persistence, conceptual thinking or problem solving. The plan includes the use of tools and digital resources and information literacy skills that enable the selection, design or implementation of supplemental or specialized instructional or behavioral interventions when appropriate/if needed.</td>
<td>The plans incorporate a variety of strategies, resources and groupings that appropriately challenge all students. The plan incorporates a depth of knowledge and promotes student independence as a learner, allowing for choice and student self-direction. There is a value in the plan for the age appropriate expression of the key attributes of curiosity, persistence, conceptual thinking or problem solving. Planning provides opportunities for students to use their own tools and digital resources to enable choices and for personalized &amp; specialized instructional or behavioral interventions. Plans include the use of differentiated tools and digital resources to help students make connections within and among content areas and help them to understand the importance of critical CCSS and 21st century skills in the world around them.</td>

| Examples and Evidence | 1.1 - Appropriately challenging, relevant and differentiated experiences. | **Attributes:**  
- Differentiation of design  
- Level of challenge  
- Ownership of learning  
- Effective use of tools and resources |  
- Available tools and digital resources are not recognized in the plan.  
- Materials or strategies are unclear or not specified or rely solely on a singular strategy or resource.  
- No learning experience/expectation plans are provided or plans do not show any differentiation based on any need.  
- With an entire set of tablet readers at her disposal, a 3rd grade teacher requires students to fill in a worksheet.  
- Teacher does not collaborate with colleagues for planning. |  
- Teacher identifies differentiation strategies that are limited—often based on a single area – such as student interest.  
- Teacher articulated plans for addressing academic/behavioural concerns are general and not specific.  
- Tools and digital resources may be referenced in the plan but they are underutilized.  
- Students will all view the video of the combustion experiment and discuss what happened with their peer.  
- Teacher mentions or references the digital cameras that are available for evidence collection during the experiment but fails to make connections required for appropriate use. |  
- Mechanisms or strategies for differentiation are part of the design.  
- Teacher plans to systemically use digital tools and digital resources as part of the instructional design.  
- Teachers provide assistance and strategies for dealing with frustration when learning comes to a halt and students are struggling to make progress.  
- Students can view the video, read the article, or watch teacher demonstration of the combustion experiment, discuss what happened with their peer, and answer the reflection questions.  
- Teacher articulates the work with colleagues in the planning process.  
- Plans include decision trees or other mechanisms to allow students to pursue their own learning pathways. |  
- Teacher articulates anticipated student misconceptions and how the learning experience/expectation design addresses these.  
- Teacher plans to enable students to make decisions about how to best apply the available tools and digital resources for their own learning.  
- The teacher conveys to students that he/she won’t consider a learning experience/expectation “finished” until every student understands, and that he has a broad range of approaches to use.  
- In reflecting on practice, the teacher can cite others in the school and beyond who he/she has contacted for assistance in reaching some students.  
- Students are asked to share reflections with a peer and post the observations they have in common on the blog page.  
- There is ample time in the plan for alternative pathways, follow-up activities, or flexible group... |

<td>1.2 - Responsive and respectful, behavioral interventions. (P)</td>
<td>In either/both personal or electronic (real-time, asynchronous, or posting of digital communications) learning environments show:</td>
<td>In either/both personal or electronic (real-time, asynchronous, or posting of digital communications) learning environments show:</td>
<td>In either/both personal or electronic (real-time, asynchronous, or posting of digital communications) learning environments show:</td>
<td>In either/both personal or electronic (real-time, asynchronous, or posting of digital communications) learning environments show:</td>
</tr>
<tr>
<td>Attributes:</td>
<td>Patterns of interaction between the teacher and students and among students are mostly negative, inappropriate, or insensitive to students’ ages, cultural backgrounds, and developmental levels. No recognition or addressing of disrespectful or inappropriate behavior or adjusting to the needs of students in real time.</td>
<td>Patterns of interaction between the teacher and students and among students, are generally appropriate but may reflect occasional inconsistencies, favoritism, and disregard for students’ ages, cultures, and developmental levels. Students occasionally demonstrate disrespect for one another in their personal communications or learning environment. Teacher attempts to respond to disrespectful or inappropriate behavior unanticipated student needs, with uneven results.</td>
<td>Teacher-student interactions in the learning environment are friendly and demonstrate general caring and respect. Such interactions are appropriate to the ages of the students. Students almost always exhibit respect for the teacher. Interactions among students are generally polite and respectful. There are quick responses to disrespectful tone, inappropriate behavior or unanticipated student needs among students and the impact of this response changes the direction and tone of the student behavior.</td>
<td>Teacher and individual student interactions are highly respectful, reflecting genuine warmth, caring, and sensitivity to students as individuals. Such interactions are appropriate to the ages of the students and consistent across all student backgrounds and levels of performance. Students exhibit respect for the teacher and contribute to the positive tone of the learning environment. On those rare occasions when behavior is inconsistent with this norm, students themselves intervene and redirect their peers back to a positive learning behavior.</td>

<tr>
<td><strong>Examples and Evidence</strong></td>
<td>● Teacher uses disrespectful or sarcastic language in speaking or postings towards students.</td>
<td>● The quality of interactions (digital or personal) between teacher and students, or among students, is usually positive but with occasional disrespect.</td>
<td>● Communications (digital or personal) between teacher and students and among students is uniformly respectful with a positive tone always present.</td>
<td>● In a learning environment (digital or in-person) with a highly diverse student body, there is genuine support and praise given by students to their peers.</td>
</tr>
<tr>
<td><strong>1.2 - Responsive and respectful, behavioral interventions. (P)</strong></td>
<td>● Student body language or communications indicate feelings of hurt or insecurity.</td>
<td>● Teacher attempts to respond to disrespectful behavior among students, with uneven results.</td>
<td>● Teacher responds (digitally or personally) to disrespectful behavior among students in a way that preserves the respect and dignity of the individual.</td>
<td>● In the rare instance when redirection is required by the teacher, the intervention is done in a positive and thoughtful way.</td>
</tr>
<tr>
<td><strong>Attributes:</strong></td>
<td>● Respect, warmth and caring</td>
<td>● Responsiveness</td>
<td>● Redirection and behavioral intervention</td>
<td>● A child with special needs is making a selection at the interactive whiteboard which indicates his modified response to the learning task. This action gains a genuinely supportive response from all of his peers.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>● Students participate in an online activity where they are asked to define the norms of behavior they will follow when building their new project teams.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>● When a student film makes its debut on the class YouTube channel, every student has viewed and reviewed the work in a way that supports the effort and time that went into producing the product.</td>
</tr>
<tr>
<td></td>
<td>● Many students do not participate/post and are clearly not part of the learning environment.</td>
<td>● Many students talk when the teacher and other students are talking; the teacher does not correct them.</td>
<td>● Teachers offer encouragement for the contributions and work of their peers.</td>
<td>● Students respectfully intervene as appropriate with peers to support a positive learning environment.</td>
</tr>
<tr>
<td></td>
<td>● Interventions and actions are not specified in plan or discussion.</td>
<td>● There are rude posts or tweets without recognition by the teacher.</td>
<td>● Teacher describes discussion with the special education teacher about how to best work with two students with special needs and that they created a plan to ensure the success of both students.</td>
<td>● The teacher is watching a monitor that is tracking an ongoing discussion</td>
</tr>
<tr>
<td></td>
<td>● The whole class is working on page 32 in the math workbook. Students with different learning backgrounds are struggling with content.</td>
<td>● The second grade class is reading the same book and some students are struggling. The teacher says “I will come and help you Jane” but does not address the others who are experiencing difficulty with the content.</td>
<td>● A student posted an inappropriate comment to another student on their class blog. The teacher intervenes with the appropriate intervention. The behavior extinguishes.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>● Student is acting out. The behavior escalates with no apparent intervention from the teacher. There is no plan for this behavior.</td>
<td>● The learning environment (physical or virtual) is chaotic, with no apparent standards of conduct.</td>
<td>● Through an entire period, the teacher monitors behavior and with minimal redirection is able to maintain a generally positive learning environment.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>● The learning environment (physical or virtual) is chaotic, with no apparent standards of conduct.</td>

</tbody>
</table>
● Balanced participation

● All questions are of the “recitation” type, such as “What is 3 x 4?”
● The teacher asks a question for which the answer is on the board; students respond by reading it.
● The teacher only calls on students who have their hands up.
● The teacher says: “We don’t have time for that today.”
● A first grade student is confused about an addition concept during math instruction. When this is expressed to the teacher, the response is, “Really, everyone else was able to get it.”
● The teacher says: “If you’d just pay attention, you could understand this.”
● Students are asking each other what is happening and why without teacher response.

● Teacher makes perfunctory attempts to incorporate student questions and interests into the learning experience/expectation.
● Many questions are of the “recitation” type, such as “How many members of the House of Representatives are there?”
● Teacher uses an automated quiz response program.
● The teacher asks: “Who has an idea about this?” but the same three students offer comments.
● 90% of the contributions to a digital chat on a specific topic are attributable to 2 or 3 students.
● Most of the responses to blog posts on topics related to this learning experience are from the teacher and not student-to-student.
● Students’ posts and contributions demonstrate a lack of understanding, caring, engagement, or enthusiasm for the task at hand.

experience/expectation.
● Vocabulary is appropriate to the students’ ages and levels of development.
● The teacher asks the students questions that require prediction and evidence and then to defend their answers: “What might have happened if the colonists had not prevailed in the American war for independence? Would that have been better or worse for the Colonists?”
● The teacher requires that any student responding to a peer’s post, must paraphrase the previous post before adding their own content.
● The teacher asks a question and asks every student to compose/ 
tweet or text a response with less than 145 characters, and then share with a partner before inviting a few to offer their ideas to the entire class.

● Students post or send requests for information from their peers on work of their peer.
● Students extend the discussion, enriching it.
● The teacher posts a real-time response question to a group of 7th grade students: “Why do we allow bullies to have such an influence and power over our own behavior?”
● A student asks of other students: “Let’s create a shared document and list all of the ideas we can think of for how we might figure this out.”
● The teacher asks students to tweet or text errors that they find in the grammar or syntax of the speech they are viewing online.

Throughout the instructional/learning process students routinely reflect upon and self-assess their progress over time as it relates to the assessment criteria that they either have been provided or helped create.

A variety of feedback, from both the teacher and peers, is timely accurate, specific, and advances learning. Students set do-able goals to improve their performance as a result of this process.

Assessment is regularly used during instruction, through monitoring of progress of learning by teacher and/or students and then is systematically used to diagnose evidence of learning by individual students.

Assessment is fully integrated into instruction, through extensive use of formative assessment to monitor the performance of individual students and adjust differentiated instruction.

Students are knowledgeable regarding the assessment criteria and have helped create, apply, and use them.

Students self-assess and monitor their progress.

Instruction is driven by analysis of student performance data (by either the teacher or...
that it has been used to influence practice.
