This guidance applies through September 30, 2021, to meals and snacks served in child care centers, family day care homes, emergency shelters, at-risk afterschool care centers, and adult day care centers that participate in the U.S. Department of Agriculture’s (USDA) Child and Adult Care Food Program (CACFP). Effective October 1, 2021, the required amount for the grains component changes to ounce equivalents. For more information, see the Connecticut State Department of Education’s (CSDE) handout, *Grain Ounce Equivalents for the CACFP.*

“Breakfast cereals” are defined by the Food and Drug Administration (FDA) (21 CFR 170.3(n)(4)) and include ready-to-eat (RTE) cereals (such as puffed rice cereals, round or flaked cereal, and granola) and instant and regular hot cereals (such as oatmeal, cream of wheat, and farina). RTE cereals can be eaten as sold and are typically fortified with vitamins and minerals.

To credit in the CACFP meal patterns, breakfast cereals must:

- contain a creditable grain (whole, enriched, bran, or germ) as the first ingredient or be fortified;
- contain no more than 6 grams of sugars per dry ounce; and
- provide the minimum serving (required volume or weight).

Table 1 summarizes the steps for determining if breakfast cereals credit as the grains component in the CACFP meal patterns. The CSDE recommends that CACFP facilities check the cereal’s sugar content first, before determining if the cereal contains creditable grains. Breakfast cereals that exceed the sugar limit do not credit in the CACFP meal patterns.
Table 1. Identifying creditable breakfast cereals for the CACFP

Does the breakfast cereal meet the sugar limit of no more than 6 grams of sugar per dry ounce OR is the breakfast cereal on the Connecticut Special Supplemental Nutrition Program for Women, Infants, and Children’s (WIC) list of breakfast cereals? See “Sugar Limit” on page 3.

Yes

Is the first ingredient a creditable grain (whole, enriched, bran, or germ)?

Yes

Does the breakfast cereal have a product formulation statement (PFS) indicating that creditable grains are the primary ingredient by weight? See “Multiple creditable grains” on page 7.

Yes

Is the breakfast cereal fortified with vitamins and minerals? See “Fortified breakfast cereals” on page 6.

Yes

Creditable: The SFA must provide the required CACFP serving. ¹ See “Serving Size” on page 18.

No

No

No

No

Not Creditable

¹ Through September 30, 2021, the CACFP serving must provide the required weight or volume for groups H-I in the CSDE’s handout, Grain Servings for the CACFP.
Sugar Limit
RTE and cooked breakfast cereals cannot contain more than 6 grams of sugars per dry ounce (no more than 21.2 grams of sucrose and other sugars per 100 grams of dry cereal). The sugar limit applies only to breakfast cereals as purchased. CACFP facilities may choose to add toppings to breakfast cereals to increase their appeal. However, the USDA strongly encourages CACFP facilities to offer healthy toppings for breakfast cereals, such as fruit instead of sugar. Minimizing sweet toppings will help reduce consumption of added sugars, which contribute calories without essential nutrients.

The USDA allows three methods for determining if breakfast cereals meet the CACFP sugar limit. A breakfast cereal meets the sugar limit if it complies with at least one of these methods. The USDA’s webinar, *Choose Breakfast Cereals that are Lower in Added Sugars*, provides guidance on these methods. It is available in English and Spanish on the USDA’s [CACFP Halftime: Thirty on Thursdays Training Webinars](https://www.usda.gov) website.

CACFP facilities must maintain crediting documentation for breakfast cereals on file for the Administrative Review of the CACFP. This must include information on how the CACFP facility determined that the cereal meets the sugar limit, and if the cereal meets the CACFP whole grain-rich (WGR) criteria.

**Method 1: WIC breakfast cereals list**
A breakfast cereal meets the sugar limit if it is listed on the Connecticut WIC Program’s approved breakfast cereals list. WIC-approved whole-grain foods must comply with the same WGR criteria as the CACFP. Connecticut WIC food guides are available on the Connecticut State Department of Public Health’s [Approved Food Guide](https://www.ct.gov/dph/en) webpage.

**Method 2: USDA’s sugar limit chart**
A breakfast cereal meets the sugar limit if the sugars per serving on the product’s Nutrition Facts panel do not exceed the maximum amount in the sugar limit chart listed in the USDA’s worksheet, *Choose Breakfast Cereals that are Lower in Added Sugars*. This chart includes common breakfast cereal serving sizes with the maximum amount of sugars per serving. Method 2 eliminates the need for CACFP facilities to perform calculations for the sugar limit. The USDA’s worksheet is available in English and Spanish on the USDA’s [CACFP Meal Pattern Training Worksheets](https://www.usda.gov) webpage.
Method 3: Calculation of grams of sugars per serving
(standard and rounding options)
A breakfast cereal meets the sugar limit if the CACFP facility’s calculations document that the product does not contain more than 0.212 grams of sugars per dry gram of cereal weight. This is the gram equivalent of no more than 6 grams of sugars per dry ounce (28.35 grams). Method 3 includes two options for calculating compliance with the sugar limit. Both options use the sugars per serving from the product’s Nutrition Facts panel.

1. The **standard method** calculates the grams of sugars per dry gram of cereal weight.

2. The **rounding method** calculates the sugar limit (grams) based on the serving weight (grams) of the cereal. It uses the standard rules for rounding, which are:
   - round up to the next whole number if the number after the decimal point is 0.5 or greater (e.g., 4.52 rounds up to 5); and
   - round down to the next whole number if the number after the decimal point is less than 0.5 (e.g., 6.148 rounds down to 6).

The rounding method is the calculation method used in the USDA’s worksheet, *Choose Breakfast Cereals that are Lower in Added Sugars* (see “Method 2: USDA’s sugar limit chart” above).

Tables 2 and 3 show sample calculations for the standard and rounding options of method 3, using the Nutrition Facts panel for the RTE breakfast cereal on the right. Each method shows that this breakfast cereal meets the CACFP sugar limit. To credit in the CACFP meal patterns, this cereal must also meet the requirements for creditable grains (see “Creditable grains” on page 6) and provide the required CACFP serving (see “Serving Size” on page 18).

**Note:** The standard and rounding calculation methods are both valid ways of demonstrating that a breakfast cereal meets the CACFP sugar limit. There may be times when a breakfast cereal meets the sugar limit using one of these methods, but not the other. If a breakfast cereal meets the sugar limit using at least one of these calculation methods, it complies with the sugar limit.
# Table 2. Calculation of CACFP sugar limit compliance using standard method

1. List the grams (g) of sugars per serving from the cereal’s Nutrition Facts label.  
   ![A] 4 grams of sugars per serving of cereal

2. List the serving size in grams from the cereal’s Nutrition Facts label.  
   ![B] 29 serving size (grams)

3. Calculate the grams of sugars per gram of serving weight (Divide A by B).  
   ![C] 0.1379 sugars per gram

4. Is C equal to or less than 0.212?  ![Yes] Yes  ![No] No  
   If “yes,” the breakfast cereal meets the CACFP sugar limit.

---

# Table 3. Calculation of CACFP sugar limit compliance using rounding method

1. List the serving size in grams (g) from the cereal’s Nutrition Facts label.  
   ![A] 29 grams

2. Calculate the sugar limit for the product’s serving size: Multiply A by 0.212.  
   ![B] 6.148 grams of sugars per serving (required limit)

3. Calculate the rounded sugar limit: If the number in B ends in 0.5 or more, round up to the next whole number. If the number in B ends in 0.49 or less, round down to the next whole number.  
   ![C] 6 allowable grams of sugars per serving (rounded limit)

4. List the grams (g) of sugars per serving from the cereal’s Nutrition Facts label  
   ![D] 4 grams of sugars per serving of cereal

5. Is D equal to or less than C?  ![Yes] Yes  ![No] No  
   If “yes,” the breakfast cereal meets the CACFP sugar limit.
Creditable Grains

Creditable grains for the CACFP meal patterns include whole grains, enriched grains, bran, and germ. To credit as the grains component, breakfast cereals must contain a creditable grain as the first ingredient, or be fortified. CACFP facilities must check the ingredients statement to determine if breakfast cereals meet at least one of these crediting criteria.

Whole grains

Whole grains consist of the entire cereal grain seed or kernel (starchy endosperm, fiber-rich bran, and nutrient-rich germ) after removing the inedible outer husk or hull. A 100 percent whole-grain cereal lists a whole grain as the first ingredient and contains only whole grains. The ingredients statement below shows an example of a 100 percent whole-grain breakfast cereal.

Ingredients: Whole-grain rolled oats, sugar, natural flavors, salt.

For more information on identifying whole grains, see CSDE’s handout, Credit Whole Grains in the CACFP.

Enriched grains

Enriched breakfast cereals have five vitamins and minerals added in amounts required by the FDA to replace some of the nutrients lost during processing. The enrichment nutrients include thiamin (vitamin B₁, thiamin mononitrate, or thiamin hydrochloride); riboflavin (vitamin B₂); niacin (vitamin B₃ or niacinamide); folic acid (folate); and iron (reduced iron, ferrous sulfate, or ferric orthophosphate). A breakfast cereal is enriched if the food is labeled as “enriched” or an enriched grain is the first ingredient. The ingredients statement below shows an example of an enriched puffed rice cereal.

Ingredients: Puffed rice, ferrous sulfate (a source of iron), niacinamide, citric acid, thiamin mononitrate, riboflavin, folic acid.

For more information on identifying enriched grains, see the CSDE’s handout, Crediting Enriched Grains in the CACFP.

Fortified breakfast cereals

Fortified breakfast cereals have nutrients added by the manufacturer that were not originally present in the food, or that are at higher levels than originally present. Manufacturers may choose which additional nutrients to use for fortification. Fortified breakfast cereals typically contain the five enrichment nutrients plus other vitamins and minerals. Different cereal brands may list different fortification nutrients. The USDA does not specify a minimum number of nutrients or a minimum percentage for the level of fortification for breakfast cereals in Child Nutrition Programs. If a breakfast cereal is fortified, it does not need to be enriched.
Crediting Breakfast Cereals in the CACFP

A breakfast cereal is fortified if it is labeled as “fortified” or the ingredients statement lists the vitamins and minerals added to the product. The ingredients statement below shows an example of a RTE breakfast cereal fortified with 11 vitamins and minerals, listed after “Vitamins and Minerals.”

Ingredients: Whole-grain wheat, raisins, wheat bran, sugar, brown sugar syrup, contains 2% or less of salt, malt flavor. **Vitamins and Minerals**: Potassium chloride, niacinamide, reduced iron, vitamin B₆ (pyridoxine hydrochloride), zinc oxide, vitamin B₂ (riboflavin), vitamin B₁ (thiamin hydrochloride), vitamin A palmitate, folic acid, vitamin D, vitamin B₁₂.

This cereal is WGR because it contains a whole grain (whole-grain wheat) as the first ingredient and is fortified.

If the ingredients statement does not list any added vitamins and minerals, the breakfast cereal is not fortified. To credit as the grains component in the CACFP meal patterns, nonfortified breakfast cereals must contain a creditable grain (whole, enriched, bran, or germ) as the first ingredient.

**Bran and germ**

Bran (such as oat bran, wheat bran, corn bran, rice bran, and rye bran) is the seed husk or outer coating of cereal grains such as wheat, rye, and oats. Germ (such as wheat germ) is the vitamin-rich embryo of the grain kernel. The ingredients statement below shows an example of a creditable RTE breakfast cereal that contains wheat bran as the first ingredient.

Ingredients: Wheat bran, sugar, malt flavor, contains 2% or less of salt. **Vitamins and Minerals**: Calcium carbonate, vitamin C (sodium ascorbate and ascorbic acid), reduced iron, niacinamide, vitamin B₆ (pyridoxine hydrochloride), vitamin B₂ (riboflavin), folic acid, vitamin B₁ (thiamin hydrochloride), vitamin A palmitate, vitamin B₁₂, vitamin D.

**Multiple creditable grains**

If a breakfast cereal is not fortified, and a creditable grain is not the first ingredient but the breakfast cereal contains more than one creditable grain, the CACFP facility must obtain a product formulation statement (PFS) from the manufacturer that states the weight of all creditable grains. To credit in the CACFP meal patterns, the PFS must document that the combined weight of all creditable grains is the greatest ingredient by weight in the breakfast cereal. For information on PFS forms, see the CSDE’s handouts, Using Product Formulation Statements in the CACFP and Accepting Processed Product Documentation in the CACFP, and the USDA’s handouts, Product Formulation Statement for Grains: Servings (through September 30, 2021), Sample Completed Product Formulation Statement for Grains: Servings (through September 30, 2021), and Tips for Evaluating a Manufacturer’s Product Formulation Statement.
Whole-Grain Rich (WGR) Requirement

The CACFP meal patterns require at least one serving of WGR grains per day, between all meals and snacks served in the CACFP facility. The USDA’s CACFP Best Practices recommends at least two servings of WGR grains per day.

The USDA has different WGR criteria for RTE breakfast cereals in group I (such as puffed cereals, flaked or round cereals, and granola) and cooked breakfast cereals in group H (such as oatmeal, cream of wheat, and farina) of the USDA’s grain servings chart. This chart is listed in the CSDE’s handout, Grain Servings for the CACFP.

- **CACFP WGR criteria for RTE breakfast cereals (group I):** Table 4 on page 9 summarizes the steps for determining if RTE breakfast cereals meet the CACFP WGR criteria. To be WGR, RTE breakfast cereals must list a whole grain as the first ingredient; be fortified; and meet the sugar limit. For more information, see “Sugar Limit” on page 3 and “Fortified breakfast cereals” on page 6.

- **CACFP WGR criteria for cooked breakfast cereals (group H):** Table 5 on page 11 summarizes the steps for determining if cooked breakfast cereals meet the CACFP WGR criteria. To be WGR, cooked breakfast cereals must meet the sugar limit and comply with the USDA’s “rule of three” CACFP WGR criteria. The “rule of three” states that the first ingredient must be a whole grain, and the next two grain ingredients (if any) must be whole, enriched, bran, or germ. A noncreditable grain cannot be one of the first three grain ingredients. For guidance on the USDA’s “rule of three” WGR criteria for the CACFP, see the CSDE’s handout, Whole Grain-rich Criteria for the CACFP. For information the sugar limit, see “Sugar Limit” on page 3.

**Multiple whole grains**

If a whole grain is not the first ingredient, but the breakfast cereal contains more than one whole grain, the CACFP facility must obtain a PFS from the manufacturer that states the weight of all whole grains and the weight of all other creditable grains. To meet the CACFP WGR criteria, the manufacturer’s PFS must document that the combined weight of all whole grains is the greatest ingredient by weight in the breakfast cereal. For information on PFS forms, see the CSDE’s handouts, Using Product Formulation Statements in the CACFP and Accepting Processed Product Documentation in the CACFP, and the USDA’s handouts, Product Formulation Statement for Grains: Servings (through September 30, 2021), Sample Completed Product Formulation Statement for Grains: Servings (through September 30, 2021), and Tips for Evaluating a Manufacturer’s Product Formulation Statement.
Noncreditable grains

Grain ingredients that are not whole, enriched, bran, or germ do not credit as the grains component in the CACFP meal patterns. The CACFP WGR criteria for cooked and RTE breakfast cereals have different requirements for noncreditable grains.

- **Cooked breakfast cereals (group H):** CACFP facilities must include noncreditable grains when determining if the first three grain ingredients in a cooked breakfast cereal meet the CACFP “rule of three” WGR criteria. Examples of noncreditable grains for the CACFP meal patterns include legume flours, corn flour, corn grits, farina, malted barley flour, milled corn, nut or seed flours, oat fiber, potato flour, potato starch, rice, soy fiber, soy flakes, wheat flour, and yellow corn flour. Noncreditable grains listed after the statement “contains 2% or less” are insignificant, and are not considered for the “rule of three.” For example, if the ingredients list states “contains less than 2% of wheat flour and corn flour,” CACFP facilities can ignore the wheat flour and corn flour (noncreditable grains) when reviewing the cereal’s ingredients. CACFP facilities can also ignore noncreditable grains in the sublisting for a nongrain ingredient.

- CACFP facilities can also ignore grain derivatives when determining if cooked breakfast cereals meet the CACFP WGR criteria. Examples of grain derivatives for the CACFP meal patterns include corn dextrin, corn starch, cultured wheat starch, malt powder, maltodextrin, modified food starch, modified corn starch, modified rice starch, potato starch, tapioca starch, vital wheat gluten, wheat dextrin, wheat gluten, and wheat starch. For more information on noncreditable grains and grain derivatives, see the CSDE’s handout, *Whole Grain-rich Criteria for the CACFP*.

- **RTE breakfast cereals (group I):** CACFP facilities can ignore noncreditable grains in the ingredients statement if a whole grain is the first ingredient and the RTE breakfast cereal is fortified. CACFP facilities can also ignore grain derivatives when determining if RTE breakfast cereals meet the CACFP WGR criteria.
### Table 4. Identifying WGR RTE breakfast cereals (group I) for the CACFP

Does the RTE breakfast cereal meet the CACFP sugar limit (no more than 6 grams of sugars per dry ounce) or is the cereal listed on the Connecticut WIC Program’s list of breakfast cereals? See “Sugar Limit” on page 3.

**WGR:** The SFA must provide the required CACFP serving. \(^1\) See “Serving Size” on page 18.

---

\(^1\) Through September 30, 2021, the CACFP grain serving must provide the required weight or volume for group I in the USDA’s grain servings chart. For more information, see the CSDE’s handout, *Grain Servings for the CACFP*. 
Crediting Breakfast Cereals in the CACFP

Table 5. Identifying WGR cooked breakfast cereals (group H) for the CACFP

1. The CACFP facility must obtain a PFS from the manufacturer. For more information, see the CSDE’s handout, Using Product Formulation Statements in the CACFP.
2. Creditable grains for the CACFP meal patterns are whole grains, enriched grains, bran, and germ.
3. Ignore noncreditable grains listed after “contains 2% or less” or in the sublisting for a nongrain ingredient (see “Noncreditable grains” on page 9).
4. The CACFP facility must provide the required CACFP serving. Through September 30, 2021, the serving must provide the required weight or volume for group H in the USDA’s grain servings chart. For more information, see the CSDE’s handout, Grain Servings for the CACFP.
Determining if Commercial Breakfast Cereals are WGR

The examples on pages 13-17 show how to evaluate commercial RTE and cooked breakfast cereals for compliance with the USDA’s CACFP WGR criteria for breakfast cereals. The following guidance applies to the ingredients for these products.

- Creditable grains (whole, enriched, bran, and germ) in the product’s ingredients statement are listed in bold text and whole grains are in bold UPPERCASE text. For examples of whole and enriched grains, see the CSDE’s handouts, Crediting Whole Grains in the CACFP and Crediting Enriched Grains in the CACFP.

- Noncreditable grains (such as wheat flour and yellow corn flour) are listed in bold italicized text.
  - For cooked breakfast cereals, CACFP facilities must include noncreditable grains when reviewing a product’s ingredients statement for compliance with the CACFP “rule of three” WGR criteria, unless the noncreditable grains are listed after the statement “contains 2% or less” or in the sublisting for a nongrain ingredient. For more information noncreditable grains, see “Noncreditable grains” on page 9.
  - For fortified RTE breakfast cereals that contain a whole grain as the first ingredient, CACFP facilities can ignore any noncreditable grains in the product’s ingredients statement.

Crediting worksheets for breakfast cereals

The CSDE’s CACFP crediting worksheets for breakfast cereals help CACFP facilities evaluate products for compliance with the CACFP crediting, WGR, and serving requirements; and the CACFP sugar limit. These worksheets include:

- Adult Center Worksheet 2: Crediting Ready-to-eat (RTE) Breakfast Cereals in the CACFP;
- Adult Center Worksheet 3: Crediting Cooked Breakfast Cereals in the CACFP;
- Child Care Worksheet 2: Crediting Ready-to-eat (RTE) Breakfast Cereals in the CACFP; and
- Child Care Worksheet 3: Crediting Cooked Breakfast Cereals in the CACFP.

The child care crediting worksheets are available in the “Documents/Forms” section of the CSDE’s Crediting Foods in CACFP Child Care Programs webpage. The adult day care center crediting worksheets are available in the “Documents/Forms” section of the CSDE’s Crediting Foods in CACFP Adult Day Care Centers webpage.
Product 1: Spiced instant oatmeal (commercial cooked breakfast cereal)
Ingredients: **WHOLE-GRAIN ROLLED OATS**, sugar, salt, cinnamon and other spices, calcium carbonate, guar gum, caramel color, niacinamide, reduced iron, vitamin A palmitate, pyridoxine hydrochloride, riboflavin, thiamin mononitrate, folic acid.

**Part 1: Grain ingredients**

A. **First ingredient**: Whole-grain rolled oats
B. **Second grain ingredient**: None
C. **Third grain ingredient**: None
D. **Fortification nutrients**: Calcium carbonate, niacinamide, reduced iron, vitamin A palmitate, pyridoxine hydrochloride, riboflavin, thiamin mononitrate, folic acid.

**Part 2: CACFP crediting criteria for group H (cooked breakfast cereals)**

**Creditable**: *The first ingredient must be a creditable grain or the cereal must be fortified.*

1. Is the first ingredient a creditable grain? ☑ Yes □ No
2. Is the cereal fortified? ☑ Yes □ No
3. Is the answer “Yes” for either question 1 or 2 OR is the answer “Yes” for both questions 1 and 2? ☑ Yes: Cereal is creditable if it meets the CACFP sugar limit ³ ⁴ ☐ No: Does the cereal contain more than one creditable grain? ☑ Yes: Need PFS ⁵ ☐ No: Cereal is not creditable

**Part 3: CACFP “rule of three” WGR criteria for group H (cooked breakfast cereals)**

**WGR**: *The first ingredient must be a whole grain and the next two grain ingredients (if any) must be creditable.*

1. Is the first ingredient a whole grain? ☑ Yes □ No
2. Is the second grain ingredient (if any) a creditable grain? ☑ Yes □ No ☐ Not applicable (no second grain ingredient or can be ignored) ²
3. Is the third grain ingredient (if any) a creditable grain? ☑ Yes □ No ☐ Not applicable (no third grain ingredient or can be ignored) ²
4. Is the answer “Yes” for question 1 AND either “Yes” or “Not applicable” for questions 2 and 3? ☑ Yes: Cereal is WGR if it meets the CACFP sugar limit ³ ⁴ ☐ No: Does the cereal contain more than one whole grain? ☑ Yes: Need PFS ⁵ ☐ No: Cereal is not WGR

---

1 Creditable grains for the CACFP meal patterns are whole grains, enriched grains, bran, and germ.
2 Ignore noncreditable grains in cooked breakfast cereals listed after the statement “contains 2% or less, and ignore grain derivatives (such as wheat gluten and modified food starch) (see “Noncreditable grains” on page 9).
3 Breakfast cereals cannot contain more than 6 grams of sugars per dry ounce (see “Sugar Limit” on page 3).
4 The CACFP facility must provide the required CACFP serving (see “Serving Size” on page 18).
5 To credit as the grains component, the PFS must document that the combined weight of all creditable grains is the greatest ingredient by weight (see “Multiple creditable grains” on page 9). To be WGR, the PFS must document that the combined weight of all whole grains is the greatest ingredient by weight (see “Multiple whole grains” on page 8).
Product 2: Farina hot cereal (commercial cooked breakfast cereal)

Ingredients: *Wheat farina*, calcium carbonate, ferric orthophosphate (source of iron), niacinamide (vitamin B3), pyridoxine hydrochloride (vitamin B6), folic acid, thiamin mononitrate (vitamin B1) riboflavin (vitamin B2).

**Part 1: grain ingredients**

- **First ingredient:** Wheat farina (noncreditable grain)
- **Second grain ingredient:** None
- **Third grain ingredient:** None
- **Fortification nutrients:** Calcium carbonate, ferric orthophosphate (source of iron), niacinamide (vitamin B3), pyridoxine hydrochloride (vitamin B6), folic acid, thiamin mononitrate (vitamin B1) riboflavin (vitamin B2)

**Part 2: CACFP crediting criteria for group H (cooked breakfast cereals)**

**Creditable:** The first ingredient must be a creditable grain or the cereal must be fortified.

1. Is the first ingredient a creditable grain? (see Part 1A above)?
   - Yes
   - No
2. Is the cereal fortified? (see Part 1D above)?
   - Yes (No)
3. Is the answer “Yes” for either question 1 or 2 OR is the answer “Yes” for both questions 1 and 2?
   - Yes: Cereal is creditable if it meets the CACFP sugar limit
   - No: Does the cereal contain more than one creditable grain?
     - Yes: Need PFS
     - No: Cereal is not creditable

**Part 3: CACFP “rule of three” WGR criteria for group H (cooked breakfast cereals)**

**WGR:** The first ingredient must be a whole grain and the next two grain ingredients (if any) must be creditable.

1. Is the first ingredient a whole grain? (see Part 1A above)?
   - Yes
   - No
2. Is the second grain ingredient (if any) a creditable grain? (see Part 1B above)?
   - Yes
   - No (Not applicable)
3. Is the third grain ingredient (if any) a creditable grain? (see Part 1C above)?
   - Yes
   - No (Not applicable)
4. Is the answer “Yes” for question 1 AND either “Yes” or “Not applicable” for questions 2 and 3?
   - Yes: Cereal is WGR if it meets the CACFP sugar limit
   - No: Does the cereal contain more than one whole grain?
     - Yes: Need PFS
     - No: Cereal is not WGR

---

1 Creditable grains for the CACFP meal patterns are whole grains, enriched grains, bran, and germ.
2 Ignore noncreditable grains in cooked breakfast cereals listed after the statement “contains 2% or less, and ignore grain derivatives (such as wheat gluten and modified food starch) (see “Noncreditable grains” on page 9).
3 Breakfast cereals cannot contain more than 6 grams of sugars per dry ounce (see “Sugar Limit” on page 5).
4 The CACFP facility must provide the required CACFP serving (see “Serving Size” on page 18).
5 To credit as the grains component, the PFS must document that the combined weight of all creditable grains is the greatest ingredient by weight (see “Multiple creditable grains” on page 9). To be WGR, the PFS must document that the combined weight of all whole grains is the greatest ingredient by weight (see “Multiple whole grains” on page 8).
## Crediting Breakfast Cereals in the CACFP

**Product 3: Whole-grain oat cereal (commercial RTE breakfast cereal)**

**Ingredients:** WHOLE-GRAIN OAT FLOUR, sugar, corn flour, WHOLE-WHEAT FLOUR, rice flour, salt, calcium carbonate, disodium phosphate, reduced iron, niacinamide, zinc oxide, BHT (a preservative), yellow 5, yellow 6, thiamin mononitrate, pyridoxine hydrochloride, riboflavin, folic acid.

### Part 2: CACFP crediting criteria for group I (RTE breakfast cereals)

**Creditable:** The first ingredient must be a creditable grain or the cereal must be fortified.

1. Is the first ingredient a creditable grain (see Part 1A above)?
   - ☑ Yes  ☐ No

2. Is the cereal fortified (see Part 1B above)?
   - ☑ Yes  ☐ No

3. Is the answer “Yes” for either question 1 or 2 OR is the answer “Yes” for both questions 1 and 2?
   - ☑ Yes: Cereal is creditable if it meets the CACFP sugar limit ³, ⁴  
   - ☐ No: Does the cereal contain more than one creditable grain?
     - ☑ Yes: Need PFS ⁵  
     - ☐ No: Cereal is not creditable

### Part 3: CACFP WGR criteria for group I (RTE breakfast cereals)

**WGR:** The first ingredient must be a whole grain and the cereal must be fortified.

1. Is the first ingredient a whole grain (see Part 1A above)?
   - ☑ Yes  ☐ No

2. Is the cereal fortified (see Part 1B above)?
   - ☑ Yes  ☐ No

3. Is the answer “Yes” for questions 1 and 2?
   - ☑ Yes: Cereal is WGR if it meets the CACFP sugar limit ³, ⁴  
   - ☐ No: Does the cereal contain more than one whole grain?
     - ☑ Yes: Need PFS ⁵  
     - ☐ No: Cereal is not WGR

---

¹ Creditable grains for the CACFP meal patterns are whole grains, enriched grains, bran, and germ.

² Ignore noncreditable grains in cooked breakfast cereals listed after the statement “contains 2% or less, and ignore grain derivatives (such as wheat gluten and modified food starch) (see “Noncreditable grains” on page 9).

³ Breakfast cereals cannot contain more than 6 grams of sugars per dry ounce (see “Sugar Limit” on page 3).

⁴ The CACFP facility must provide the required CACFP serving (see “Serving Size” on page 18).

⁵ To credit as the grains component, the PFS must document that the combined weight of all creditable grains is the greatest ingredient by weight (see “Multiple creditable grains” on page 9). To be WGR, the PFS must document that the combined weight of all whole grains is the greatest ingredient by weight (see “Multiple whole grains” on page 8).
**Product 4: Crispy rice cereal (commercial RTE breakfast cereal)**

Ingredients: *Rice*, sugar, contains 2% or less of salt, malt flavor. BHT added to packaging for freshness. Vitamins and Minerals: Iron, vitamin C (ascorbic acid), vitamin E (alpha tocopherol acetate), niacinamide, vitamin A palmitate, vitamin B6 (pyridoxine hydrochloride), vitamin B2 (riboflavin), vitamin B1 (thiamin hydrochloride), folic acid, vitamin B12, vitamin D

### Part 1: Grain ingredients

| A. First ingredient: Rice (noncreditable grain) |
| B. Fortification nutrients: Iron, vitamin C (ascorbic acid), vitamin E (alpha tocopherol acetate), niacinamide, vitamin A palmitate, vitamin B6 (pyridoxine hydrochloride), vitamin B2 (riboflavin), vitamin B1 (thiamin hydrochloride), folic acid, vitamin B12, vitamin D |

### Part 2: CACFP crediting criteria for group I (RTE breakfast cereals)

**Creditable:** The first ingredient must be a creditable grain or the cereal must be fortified.

1. Is the first ingredient a creditable grain? (see Part 1A above)?
   - Yes
   - No
2. Is the cereal fortified (see Part 1B above)?
   - Yes
   - No
3. Is the answer “Yes” for either question 1 or 2 OR is the answer “Yes” for both questions 1 and 2?
   - Yes: Cereal is creditable if it meets the CACFP sugar limit.
   - No: Does the cereal contain more than one creditable grain?
     - Yes: Need PFS
     - No: Cereal is not creditable

### Part 3: CACFP WGR criteria for group I (RTE breakfast cereals)

**WGR:** The first ingredient must be a whole grain and the cereal must be fortified.

1. Is the first ingredient a whole grain (see Part 1A above)?
   - Yes
   - No
2. Is the cereal fortified (see Part 1B above)?
   - Yes
   - No
3. Is the answer “Yes” for questions 1 and 2?
   - Yes: Cereal is WGR if it meets the CACFP sugar limit.
   - No: Does the cereal contain more than one whole grain?
     - Yes: Need PFS
     - No: Cereal is not WGR

---

1. Creditable grains for the CACFP meal patterns are whole grains, enriched grains, bran, and germ.
2. Ignore noncreditable grains in cooked breakfast cereals listed after the statement “contains 2% or less” (see “Noncreditable grains” on page 9). Ignore grain derivatives (such as wheat gluten and modified food starch) in cooked breakfast cereals.
3. Breakfast cereals cannot contain more than 6 grams of sugars per dry ounce (see “Sugar Limit” on page 3).
4. The CACFP facility must provide the required CACFP serving (see “Serving Size” on page 18).
5. To credit as the grains component, the PFS must document that the combined weight of all creditable grains is the greatest ingredient by weight (see “Multiple creditable grains” on page 9). To be WGR, the PFS must document that the combined weight of all whole grains is the greatest ingredient by weight (see “Multiple whole grains” on page 8).
Product 5: Crunchy wheat cereal (commercial RTE breakfast cereal)
Ingredients: WHOLE-GRAIN WHEAT, sugar, *rice flour*, *oat fiber*, sunflower oil, dextrose, molasses, baking soda, sea salt.

¹ Creditable grains for the CACFP meal patterns are whole grains, enriched grains, bran, and germ.
² Ignore noncreditable grains in cooked breakfast cereals listed after the statement “contains 2% or less” (see “Noncreditable grains” on page 9). Ignore grain derivatives (such as wheat gluten and modified food starch) in cooked breakfast cereals.
³ Breakfast cereals cannot contain more than 6 grams of sugars per dry ounce (see “Sugar Limit” on page 3).
⁴ The CACFP facility must provide the required CACFP serving (see “Serving Size” on page 18).
⁵ To credit as the grains component, the PFS must document that the combined weight of all creditable grains is the greatest ingredient by weight (see “Multiple creditable grains” on page 9). To be WGR, the PFS must document that the combined weight of all whole grains is the greatest ingredient by weight (see “Multiple whole grains” on page 8).
Crediting Breakfast Cereals in the CACFP

Serving Size

The required amounts for the grains component are in servings through September 30, 2021, and change to ounce equivalent effective October 1, 2021. Table 7 shows the required amounts for RTE and cooked breakfast cereals, through September 30, 2021. CACFP menus must provide the required weight or volume for breakfast cereals groups H-I in Grain Servings for the CACFP.

</tbody>
</table>

¹ This age group applies only to at-risk afterschool programs and emergency shelters. Larger portion sizes may be needed to meet the nutritional needs of children ages 13-18.
² The amounts listed are for one serving of the grains component. The adult meal patterns require two servings of the grains component at breakfast, lunch, and supper.
³ The serving size is based on weight or volume, whichever is less.
Table 8 shows the required ounce equivalents for RTE and cooked breakfast cereals, effective October 1, 2021. CACFP menus must provide the required weight or volume for breakfast cereals groups H-I in "Grain Ounce Equivalents for the CACFP."

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, sex, disability, age, or reprisal or retaliation for prior civil rights activity in any program or activity conducted or funded by USDA.

Persons with disabilities who require alternative means of communication for program information (e.g. Braille, large print, audiotape, American Sign Language, etc.), should contact the Agency (State or local) where they applied for benefits. Individuals who are deaf, hard of hearing or have speech disabilities may contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program complaint of discrimination, complete the USDA Program Discrimination Complaint Form, (AD-3027) found online at: How to File a Complaint, and at any USDA office, or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by:

(1) mail: U.S. Department of Agriculture
Office of the Assistant Secretary for Civil Rights
1400 Independence Avenue, SW
Washington, D.C. 20250-9410;
(2) fax: (202) 690-7442; or
(3) email: program.intake@usda.gov.

This institution is an equal opportunity provider.

The Connecticut State Department of Education is committed to a policy of equal opportunity/affirmative action for all qualified persons. The Connecticut Department of Education does not discriminate in any employment practice, education program, or educational activity on the basis of age, ancestry, color, criminal record (in state employment and licensing), gender identity or expression, genetic information, intellectual disability, learning disability, marital status, mental disability (past or present), national origin, physical disability (including blindness), race, religious creed, retaliation for previously opposed discrimination or coercion, sex (pregnancy or sexual harassment), sexual orientation, veteran status or workplace hazards to reproductive systems, unless there is a bona fide occupational qualification excluding persons in any of the aforementioned protected classes.

Inquiries regarding the Connecticut State Department of Education’s nondiscrimination policies should be directed to: Levy Gillespie, Equal Employment Opportunity Director/Americans with Disabilities Coordinator (ADA), Connecticut State Department of Education, 450 Columbus Boulevard, Suite 607, Hartford, CT 06103, 860-807-2071, levy.gillespie@ct.gov.
