

Crediting Smoothies in the Child and Adult Care Food Program

This guidance applies to meals and snacks served in child care centers, family day care homes, emergency shelters, at-risk afterschool care centers, and adult day care centers that participate in the U.S. Department of Agriculture’s (USDA) Child and Adult Care Food Program (CACFP). For information on the CACFP meal patterns for children and crediting foods, visit the Connecticut State Department of Education’s (CSDE) [Meal Patterns for CACFP Child Care Programs](#) and [Crediting Foods in CACFP Child Care Programs](#) webpages. For information on the CACFP adult meal patterns and crediting foods, visit the CSDE’s [Meal Patterns for CACFP Adult Day Care Centers](#) and [Crediting Foods in CACFP Adult Day Care Centers](#) webpages.

Smoothie ingredients that credit toward the CACFP meal patterns for children and the CACFP adult meal patterns include full-strength vegetable juice and pureed vegetables (vegetables component); full-strength fruit juice and pureed fruits (fruits component); milk that meets the meal pattern requirements (milk component); and yogurt or soy yogurt (meat/meat alternates component). Creditable ingredients in smoothies must provide at least the minimum creditable amount to credit toward the CACFP meal patterns. The minimum creditable amounts are $\frac{1}{8}$ cup for the vegetables component; $\frac{1}{8}$ cup for the fruits component; $\frac{1}{4}$ cup for the milk component (applies to smoothies only); and $\frac{1}{8}$ cup for yogurt.

CACFP facilities must maintain appropriate documentation to indicate the crediting information for smoothies. For example, to credit a strawberry smoothie as $\frac{1}{2}$ cup of the fruits component and 1 ounce equivalent of the meat/meat alternates component, the documentation must indicate that the serving contains $\frac{1}{2}$ cup of pureed strawberries and $\frac{1}{2}$ cup of yogurt.

If a smoothie contains less than the full-required serving of a component, the menu must include an additional food from that component to meet the full requirement.

Required Crediting Documentation

To credit smoothies made on site, CACFP facilities must have a standardized recipe that indicates the meal pattern contribution of each component in the serving. For information on standardized recipes, visit the “[Crediting Foods Prepared on Site in CACFP Child Care Programs](#)” or “[Crediting Foods Prepared on Site in CACFP Adult Day Care Centers](#)” sections of the CSDE’s CACFP webpages.

To credit commercial smoothies, CACFP facilities must obtain a product formulation statement (PFS) or Child Nutrition (CN) label (applies only if the smoothie contains yogurt). For information

Crediting Smoothies in the CACFP

on CN labels and PFS forms, review the CSDE’s resources, [Using Product Formulation Statements in the CACFP](#) and [Using Child Nutrition \(CN\) Labels in the CACFP](#); and the USDA’s documents, [Product Formulation Statement for Documenting Vegetables and Fruits](#) and [Product Formulation Statement \(Product Analysis\) for Meat/Meat Alternate](#), and [Tips for Evaluating a Manufacturer’s Product Formulation Statement](#). For additional guidance on documentation for commercial products, visit the “[Crediting Commercial Processed Products in CACFP Child Care Programs](#)” or “[Crediting Commercial Processed Products in CACFP Adult Day Care Centers](#)” sections of the CSDE’s CACFP webpages.

Recommended Daily Limit for Smoothies

The USDA recommends limiting smoothies to one CACFP meal or snack per day. For example, if a smoothie is served at breakfast, the CACFP menus for lunch, supper, and snack should not include a smoothie.

Crediting Fruits and Vegetables in Smoothies

Pureed fruits and vegetables in smoothies credit only as **juice** toward the vegetables component and fruits component. Crediting is based on the volume (cups) of pureed fruits and vegetables per serving. For example, a smoothie that contains ½ cup of pureed strawberries credits as ½ cup of fruit juice. CACFP facilities must document the amount of pureed fruits and vegetables per serving (see “[Required Crediting Documentation](#)” in this document).

- **Juice limit:** Juice credits as the vegetables component or fruits component at only one CACFP meal or snack per day. Juice includes 100 percent juice (fresh, frozen, or made from concentrate), including fruit juice, vegetable juice, and juice blends; pureed fruits and vegetables in smoothies; frozen juice pops made from 100 percent juice; and juice from canned fruit served in 100 percent juice. For example, if the menu planner credits pureed blueberries in a smoothie as the fruits component at breakfast, juice cannot credit as the fruits component or the vegetables component at lunch, supper, or snack. For more information, review the CSDE’s resource, [Crediting Juice in the CACFP](#).
- **Mixed fruits and vegetables:** Smoothies that contain a mix of pureed fruits and vegetables, or 100 percent fruit and vegetable juice blends, credit based on the greatest fruit or vegetable ingredient. For commercial products, the smoothie credits as the fruits component if the first juice ingredient is fruit juice. If the first juice ingredient is vegetable juice, the product credits as the vegetables component. For smoothies made on site, the smoothie credits as the fruits component if fruit juice is the greatest juice ingredient in the standardized recipe. If the greatest juice ingredient is vegetable juice, the smoothie credits as the vegetables component.
- **Breakfast:** The CACFP breakfast meal pattern requires a serving of vegetables, fruits, or both. Smoothies that contain the required amount of juice (including pureed fruits and vegetables) for each age group may credit as the entire vegetables and fruits component at breakfast. For

Crediting Smoothies in the CACFP

example, a serving of smoothie that contains $\frac{1}{2}$ cup of pureed mangoes and carrots credits as the full fruits component for ages 3-5, ages 6-12, ages 13-18 in emergency shelters and at-risk afterschool care centers, and participants in adult day care centers.

- **Lunch and supper:** The CACFP lunch and supper meal pattern requires a serving of the fruits component and a serving of vegetables component. CACFP lunch and supper menus cannot offer a smoothie and juice as the only two servings of fruits and vegetables because both credit as juice. For example, the lunch menu cannot offer a strawberry smoothie as the fruits component and tomato juice as the vegetables component. At least one of the required servings of the vegetables component or fruits component must be a whole fruit or vegetable (i.e., fresh, frozen, canned, or dried).
- **Snack:** The CACFP snack meal pattern requires two of the five components. Pureed fruits and vegetables in smoothies may credit as either the entire fruits component or the entire vegetables component, but not both in the same snack. Smoothies containing juice and milk may credit as either juice or milk, but not both in the same snack. The snack menu cannot include juice (including pureed fruits and vegetables in smoothies) when milk is the only other snack component.
 - **Snack examples for ages 3-5:** The required servings for the snack components in the meal pattern for ages 3-5 are $\frac{1}{2}$ cup of milk, $\frac{1}{2}$ ounce of meat/meat alternates, $\frac{1}{2}$ cup of vegetables, $\frac{1}{2}$ cup of fruits, and $\frac{1}{2}$ serving of grains (through September 30, 2021).

Example 1: A smoothie recipe contains $\frac{1}{2}$ cup of pureed fruit (credits as fruit juice) and $\frac{1}{2}$ cup of unflavored low-fat milk per serving. The menu planner may choose to credit the smoothie as either the full fruits component or the full milk component, but not both in the same snack. To be reimbursable, the snack must include the full serving of a second component that is not juice, fruit, or milk (i.e., meat/meat alternates, grains, or vegetables). For example, the snack menu could include a 1-ounce whole-grain corn muffin (grains component) as the second component.

Example 2: A smoothie recipe contains $\frac{1}{2}$ cup of pureed fruit (credits as fruit juice) and $\frac{1}{4}$ cup of unflavored low-fat milk per serving. The pureed fruit provides the full fruits component. However, the milk cannot credit as the full milk component because it is less than $\frac{1}{2}$ cup. To be reimbursable, the snack must include the full serving of a second component that is not juice, fruit, or milk (i.e., meat/meat alternates, grains, or vegetables). For example, the snack menu could include $\frac{1}{2}$ cup of diced cucumbers (vegetables component) as the second component.

These smoothies cannot credit as the milk component for age 1 because the CACFP meal patterns for children require unflavored whole milk for age 1.

Crediting Smoothies in the CACFP

- **Snack examples for ages 6-12 and ages 13-18 (emergency shelters and at-risk afterschool care centers):** The required servings for the snack components in the meal pattern for ages 6-12 and ages 13-18 are 1 cup of milk, $\frac{1}{2}$ ounce of meat/meat alternates, $\frac{3}{4}$ cup of vegetables, $\frac{3}{4}$ cup of fruits, and 1 serving of grains (through September 30, 2021).

Example 1: A smoothie recipe contains $\frac{3}{4}$ cup of pureed fruit (credits as fruit juice) and 1 cup of unflavored low-fat milk per serving. The menu planner may choose to credit the smoothie as either the full fruits component or the full milk component, but not both in the same snack. To be reimbursable, the snack must include the full serving of a second component that is not juice, fruit, or milk (i.e., meat/meat alternates, grains, or vegetables). For example, the snack menu could include a 1-ounce whole-grain corn muffin (grains component) as the second component.

Example 2: A smoothie recipe contains $\frac{1}{2}$ cup of pureed fruit (credits as fruit juice) and $\frac{1}{4}$ cup of milk per serving. The pureed fruit provides the full fruits component. However, the milk cannot credit as the full milk component because it is less than 1 cup. To be reimbursable, the snack must include the full serving of a second component that is not juice, fruit, or milk (i.e., meat/meat alternates, grains, or vegetables). For example, the snack menu could include $\frac{1}{2}$ cup of diced cucumbers (vegetables component) as the second component.

- **Snack examples for adult participants:** The required servings for the snack components in the adult meal pattern are 1 cup of milk, 1 ounce of meat/meat alternates, $\frac{1}{2}$ cup of vegetables, $\frac{1}{2}$ cup of fruits, and 1 serving of grains (through September 30, 2021).

Example 1: A smoothie recipe contains $\frac{1}{2}$ cup of pureed fruit (credits as fruit juice) and 1 cup of unflavored low-fat milk per serving. The menu planner may choose to credit the smoothie as either the full fruits component or the full milk component, but not both in the same snack. To be reimbursable, the snack must include the full serving of a second component that is not juice, fruit, or milk (i.e., meat/meat alternates, grains, or vegetables). For example, the snack menu could include a 2-ounce whole-grain corn muffin (grains component) as the second component.

Example 2: A smoothie recipe contains $\frac{1}{2}$ cup of pureed fruit (credits as fruit juice) and $\frac{1}{2}$ cup of milk per serving. The pureed fruit provides the full fruits component. However, the milk cannot credit as the full milk component because it is less than 1 cup. To be reimbursable, the snack must include the full serving of a second component that is not juice, fruit, or milk (i.e., meat/meat alternates, grains, or vegetables). For example, the snack menu could include $\frac{1}{2}$ cup of carrot sticks (vegetables component) as the second component.

Crediting Smoothies in the CACFP

Crediting Milk in Smoothies

Milk in smoothies credits as the milk component based on the amount per serving. For example, a smoothie that contains $\frac{1}{2}$ cup of milk credits as $\frac{1}{2}$ cup of the milk component. CACFP facilities must document the amount of milk per serving (see “[Required Crediting Documentation](#)” in this document).

- **Allowable types of milk:** Milk must be unflavored whole milk for age 1; and unflavored low-fat (1%) or unflavored fat-free milk for ages 2 and older, and adult day care center participants. Flavored milk does not credit in the CACFP meal patterns.
- **Minimum creditable amount:** The minimum creditable amount of milk in a smoothie is $\frac{1}{4}$ cup. CACFP facilities must have a standardized recipe or PFS to document the type and amount of milk per serving (see “[Required Crediting Documentation](#)” in this document).

Crediting Yogurt in Smoothies

Yogurt or soy yogurt in smoothies credits as the meat/meat alternates component based on the amount per serving. A $\frac{1}{2}$ -cup serving of yogurt credits as 1 ounce of the meat/meat alternates component. SFAs must document the amount of yogurt per serving (see “[Required Crediting Documentation](#)” in this document).

- **Sugar limit for yogurt:** Yogurt and soy yogurt cannot contain more than 23 grams of total sugars per 6 ounces (no more than 3.83 grams per ounce). For information on the crediting requirements for yogurt, review the CSDE’s resource, *Crediting Yogurt in the CACFP*.
- **Milk substitution:** The addition of yogurt to a smoothie is not a substitution for fluid milk in the CACFP meal patterns for children. Fluid milk must be offered in all meals to meet the milk component requirement.

For the **CACFP adult meal patterns only**, $\frac{3}{4}$ cup of yogurt (6 ounces weight) that meets the CACFP sugar limit may substitute for 8 fluid ounces of milk at one meal per day. This includes yogurt added to a smoothie.

Crediting Smoothies in the CACFP

Additional Ingredients

Smoothies may include additional ingredients to improve flavor and consistency, such as oatmeal and peanut butter. These ingredients do not credit toward the CACFP meal patterns.

Crediting Example

Table 1 shows how a smoothie made with blueberry puree, low-fat yogurt, fat-free milk, and oatmeal could credit toward the CACFP meal patterns.

Table 1. Meal pattern contribution of a blueberry smoothie recipe	
Ingredient	Meal pattern contribution ¹
Frozen blueberry puree, ½ cup	½ cup of fruit juice (fruits component) ²
Low-fat blueberry yogurt, ½ cup	1 ounce of meat/meat alternates
Low-fat milk, 4 fluid ounces	4 fluid ounces of milk ³
Oatmeal, 2 tablespoons	None (does not credit in smoothies)

¹ If a creditable ingredient does not provide the full meal pattern component (minimum amount), the menu must include additional servings of that component to meet the CACFP meal patterns.

² Pureed fruits and vegetables in smoothies count toward the juice limit. For more information, review the CSDE's resource, [Crediting Juice in the CACFP](#).

³ The minimum creditable amount of milk in a smoothie is ¼ cup. If a smoothie contains less than the full serving, the menu must include the additional amount of milk to provide the full milk component.

This smoothie recipe cannot credit as the milk component for age 1 because the CACFP meal patterns for children require unflavored whole milk for age 1.

Crediting Smoothies in the CACFP

Commercial Products

Commercial smoothies credit the same as smoothies made on site. Product formulation and labeling can vary greatly because commercial smoothies do not have a federal standard of identity. To credit commercial smoothies in CACFP meals and snacks, CACFP facilities must obtain a PFS (or CN label, if available) stating the amount of all creditable ingredients per serving, such as pureed fruits and vegetables, juice, yogurt, and milk (see “[Required Crediting Documentation](#)” in this document).

- **Crediting pureed vegetables/fruits:** Commercial smoothies made with pureed fruits/vegetables credit only as juice toward the fruits component or vegetables component. Crediting is based on the volume of fruits/vegetables after pureeing and before freezing. The product label must include a statement regarding the “percent juice content,” which is required by the Food and Drug Administration (FDA) for beverages made with fruit/vegetable juice or puree. For example, an 8-fluid ounce smoothie made from fruit puree labeled with “contains 50% juice” credits as 4 fluid ounces ($\frac{1}{2}$ cup) of juice. CACFP facilities may need to obtain a PFS from the manufacturer to document the amount of pureed fruit in the product.

Concentrated fruit puree and concentrated juice are added sugars. They do not credit in smoothies, unless they are reconstituted to full-strength fruit puree or full-strength juice.

- **Crediting milk:** Milk credits as the milk component when used as an ingredient in commercial smoothies. The product documentation must attest that commercial mixes with milk are made using ingredients that meet federal, state, and local definitions for fluid milk.
- **Crediting yogurt:** Yogurt that meets the CACFP sugar limit credits as the meat/meat alternates component based on the crediting information stated in the product’s PFS or CN label. The product documentation must attest that commercial mixes with yogurt are made in compliance with the federal definition for yogurt. The addition of yogurt to a smoothie is not a substitution for fluid milk in the CACFP meal patterns for children. Fluid milk must be offered in all meals to meet the milk component requirement.

The CACFP adult meal patterns allow yogurt as a milk substitute. For **adult day care centers only**, $\frac{3}{4}$ cup of yogurt (6 ounces weight) that meets the CACFP sugar limit may substitute for 8 fluid ounces of milk at one meal per day.

Crediting Smoothies in the CACFP

- **Limit for crediting amount:** The total creditable amount in a smoothie cannot exceed the volume served. For example, ½ cup of a commercial smoothie cannot credit as 1 cup of juice.
- **Noncreditable commercial smoothies:** Probiotic dairy drinks, drinkable yogurt, and yogurt drinks are not smoothies, and do not credit in the CACFP meal patterns. Commercial smoothies that contain dietary supplements (such as whey protein powder) or herbal supplements (such as ginkgo biloba, ginseng, and echinacea) do not credit in the CACFP meal patterns.

CACFP facilities must review the product's PFS to check for 1) volumes of pureed fruits and vegetables prior to freezing; and 2) documentation that milk and yogurt (if included) meet the CACFP meal pattern requirements (see "[Required Crediting Documentation](#)" in this document).

Commercial smoothies cannot credit in CACFP meals and snacks without a PFS (or a CN label for commercial smoothies that contain yogurt). CACFP facilities must review PFS forms for accuracy.

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, sex, disability, age, or reprisal or retaliation for prior civil rights activity in any program or activity conducted or funded by USDA.

Persons with disabilities who require alternative means of communication for program information (e.g. Braille, large print, audiotope, American Sign Language, etc.), should contact the Agency (State or local) where they applied for benefits. Individuals who are deaf, hard of hearing or have speech disabilities may contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program complaint of discrimination, complete the [USDA Program Discrimination Complaint Form](#), (AD-3027) found online at: [How to File a Complaint](#), and at any USDA office, or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by:

- (1) mail: U.S. Department of Agriculture
Office of the Assistant Secretary for Civil Rights
1400 Independence Avenue, SW
Washington, D.C. 20250-9410;
- (2) fax: (202) 690-7442; or
- (3) email: program.intake@usda.gov.

This institution is an equal opportunity provider.

The Connecticut State Department of Education is committed to a policy of affirmative action/equal opportunity for all qualified persons. The Connecticut Department of Education does not discriminate in any employment practice, education program, or educational activity on the basis of age, ancestry, color, civil air patrol status, criminal record (in state employment and licensing), gender identity or expression, genetic information, intellectual disability, learning disability, marital status, mental disability (past or present), national origin, physical disability (including blindness), race, religious creed, retaliation for previously opposed discrimination or coercion, sex (pregnancy or sexual harassment), sexual orientation, veteran status or workplace hazards to reproductive systems, unless there is a bona fide occupational qualification excluding persons in any of the aforementioned protected classes.

Inquiries regarding the Connecticut State Department of Education's nondiscrimination policies should be directed to: Levy Gillespie, Equal Employment Opportunity Director/Americans with Disabilities Coordinator (ADA), Connecticut State Department of Education, 450 Columbus Boulevard, Suite 505, Hartford, CT 06103, 860-807-2071, levy.gillespie@ct.gov.
