

# Child and Adult Care Food Program (CACFP)

## Civil Rights Beneficiary Data Collection

The U.S. Department of Agriculture's (USDA) Food and Nutrition Service (FNS) is responsible for ensuring compliance with Title VI of the Civil Rights Act of 1964 among its federally assisted programs, including the CACFP. The USDA's *FNS Instruction 113-1: Civil Rights Compliance and Enforcement – Nutrition Programs and Activities* requires recipients of federal financial assistance to ask all program applicants and participants to identify all racial and ethnic categories that apply. The USDA uses this race and ethnicity data to determine how effectively FNS programs are reaching potential eligible persons and beneficiaries, identify areas where additional outreach is needed, assist in the selection of locations for compliance reviews, and complete reports as required.

### Instructions

Each CACFP facility must collect beneficiary data by racial or ethnic category **each year**. CACFP facilities include child care centers, outside-school-hours care centers, adult day care centers, emergency shelters, and family day care homes. Use the form on page 2 to summarize this data.

The CACFP facility must retain this data and supporting documentation on file for three years after the submission date of the final claim for reimbursement for the fiscal year to which they pertain; or if an audit is outstanding, until the audit is closed. Access to this data must be limited to authorized personnel.

### Self-identification of Race and Ethnicity by Participants

As indicated in USDA Memo [CACFP 11-2021 and SFSP 07-2021: Collection of Race and Ethnicity Data by Visual Observation and Identification in the Child and Adult Care Food Program and Summer Food Service Program – Policy Rescission](#), the use of visual observation and identification by CACFP institutions and facilities is not an appropriate method for collecting race or ethnicity data in the CACFP. This means that CACFP facilities **cannot use visual observation and identification** to collect race or ethnicity data.

The preferred method of collecting demographic data is self-identification and self-reporting. Examples include using data from other sources in which the respondent has self-identified race or ethnicity, such as the CACFP income eligibility applications or data for other funding sources like Head Start.

CACFP facilities should explain the importance of this data to participants and encourage them to self-identify and self-report. CACFP facilities must ensure that applicants and participants are made aware that failure to provide racial or ethnic identity information will **not** impact their eligibility for the CACFP.
