

Vegetable Subgroups in the National School Lunch Program

The National School Lunch Program (NSLP) meal patterns for grades K-12 require a daily serving of the vegetables component and weekly servings of five vegetable subgroups. For guidance on the NSLP meal pattern requirements for each grade group, visit the Connecticut State Department of Education's (CSDE) [Meal Patterns for Grades K-12 in School Nutrition Programs](#) webpage

The vegetable subgroups include dark green, red/orange, beans and peas (legumes), starchy, and other. They are based on the recommendations of the [Dietary Guidelines for Americans](#) and the [vegetables group](#) in Choose MyPlate. The chart on page 3 identifies common vegetables in each subgroup.

Requirements for the Vegetable Subgroups

School food authorities (SFAs) may offer the vegetable subgroups in any order and amount throughout the week, as long as the lunch menu meets the minimum weekly requirements. If a school has multiple serving lines, each serving line must offer the minimum amount of the five vegetable subgroups on a weekly basis. The following example illustrates this requirement:

A school has a hot lunch line, a deli line, and a grill line. Monday's hot lunch menu offers baked beans (legumes subgroup) as the daily vegetable. To meet the weekly requirements, baked beans (or another vegetable from the legumes subgroup) must also be available on the other two serving lines. For example, Monday's menu for the deli line and grill line must include baked beans or another legume such as garbanzo beans or lentils. It is not acceptable for the SFA to post signs on the deli line and grill line directing students to select the vegetable subgroup choice from a **different** serving line. Each serving line must offer the full reimbursable meal, including all vegetable subgroups on a weekly basis.

All students must have access to the required quantities of the five vegetable subgroups each week on each serving line.

For detailed guidance on the requirements for the vegetable subgroups, refer to section 3 of the CSDE's [Menu Planning Guide for School Meals for Grades K-12](#).

Crediting Vegetables

The vegetables component includes fresh, frozen, canned, and rehydrated dried vegetables; and 100 percent full-strength vegetable juice. A serving of cooked vegetables must be drained. Pureed vegetables in smoothies credit only as juice. Vegetable juice cannot exceed half of the weekly amount (cups) of vegetables offered at lunch. For more information, refer to the CSDE's resource, *Crediting Juice in the NSLP and SBP*.

Vegetables credit toward the vegetable subgroups based on the yields and crediting information in the USDA's *Food Buying Guide for Child Nutrition Programs* (FBG). All vegetables credit based on volume (cups) with the exceptions below.

- Raw leafy greens credit as half the volume served, e.g., ½ cup of raw leafy greens credits as ¼ cup of the vegetables component. Examples of raw leafy greens include kale, greens (e.g., beet, collard, mustard, and turnip), spinach, arugula, and lettuce (e.g., iceberg, romaine, Boston, Bibb, red leaf, and spring mix).
- Dried or dehydrated vegetables (such as potato flakes and dried soup mix) credit based on the amount of vegetables per serving in the rehydrated volume. A product formulation statement (PFS) is required (refer to “Required Documentation” below).

For more information on crediting vegetables, visit the “[Vegetables Component for Grades K-12](#)” section of the CSDE's [Crediting Foods in School Nutrition Programs](#) webpage.

Required Documentation

Commercial processed vegetable products (such as vegetable egg rolls and breaded onion rings) and vegetables prepared from scratch with added ingredients (such as coleslaw, mashed potatoes, and carrot-raisin salad) require documentation to indicate the amount of vegetables per serving. Commercially prepared foods with added ingredients require a PFS stating the specific contribution of each vegetable subgroup per serving. For information on PFS forms, refer to the CSDE's resources, *Product Formulation Statements* and *Accepting Processed Product Documentation in the NSLP and SBP*; and the USDA's *Product Formulation Statement for Documenting Vegetables and Fruits in School Meal Programs* and *Tips for Evaluating a Manufacturer's Product Formulation Statement*. For additional guidance, visit the “[Crediting Commercial Processed Products](#)” section of the CSDE's [Crediting Foods in School Nutrition Programs](#) webpage.

Foods made from scratch require a standardized recipe that indicates the amount of each vegetable subgroup per serving. For information on standardized recipes, visit the “[Crediting Foods Made from Scratch](#)” section of the CSDE's [Crediting Foods in School Nutrition Programs](#) webpage.
