SBP FIVE-DAY BREAKFAST MEAL PATTERN FOR GRADES 6-12 ¹, continued

School Year 2018-19 (Effective July 1, 2018)

Menu Planning Notes

- ¹ Breakfast must include the minimum serving of all three components. Meals may include larger amounts of any component if the weekly menu meets the dietary specifications for calories, saturated fat, sodium, and trans fat. Use the U.S. Department of Agriculture's (USDA) *Food Buying Guide for Child Nutrition Programs* (FBG) to determine the amount of purchased food that meets the requirements. For information on crediting processed foods, see *Child Nutrition (CN) Labeling Program, Product Formulation Statements, Accepting Processed Product Documentation, and Crediting Commercial Meat/Meat Alternate Products in the NSLP and SBP*.
- ² A week equals five days. Schools that regularly operate for six or seven days must increase the weekly requirements by 20 percent for each additional day. Schools that regularly operate for less than five days must decrease the weekly requirements by 20 percent for each day less than five days. For more information, see *Menu Planning for Shorter and Longer Weeks*.
- ³ Schools must offer at least two different varieties of low-fat (1%) milk (unflavored or flavored) or fat-free milk (unflavored or flavored). Whole milk and reduced-fat (2%) milk cannot be served.
- ⁴ The fruits component includes fresh fruit, frozen fruit, dried fruit, and canned fruit in light syrup, water, or juice. Fruit credits based on volume, except dried fruit credits as twice the volume served, e.g., ¼ cup of dried fruit credits as ½ cup of the fruits component.
- ⁵ Nonstarchy vegetables (dark green, red/orange, legumes, and "other") may substitute for the fruits component at any breakfast. Starchy vegetables may substitute for the fruits component only if the weekly menu also includes a combined total of at least 2 cups of nonstarchy vegetables. Vegetables credit based on volume, except raw leafy greens credit as half the volume served (e.g., 1 cup credits as ½ cup of vegetables) and tomato paste and puree credit based on the volume as if reconstituted (see the FBG). For more information, see *Vegetable Subgroups*.
- ⁶ Fruit and vegetable juice must be pasteurized 100 percent full-strength juice. Fruit juice together with vegetable juice cannot exceed half of the weekly fruit offerings. The juice limit includes all sources of juice, e.g., 100 percent fruit and vegetable juice, frozen pops made from 100 percent juice, pureed fruits and vegetables in smoothies, and juice from canned fruit in 100 percent juice. Serving whole fruits instead of juice is recommended. For more information, see *Crediting Juice for Grades K-12 in the NSLP and SBP* and *Crediting Smoothies for Grades K-12 in the NSLP and SBP*.
- ⁷ All grains must be whole grain-rich (WGR). WGR foods contain at least 50 percent whole grains, any remaining grains are enriched, and any noncreditable grains are less than 2 percent (¼ ounce equivalent) of the product formula. All grains must provide the ounce equivalent serving sizes in *Whole Grain-rich Ounce Equivalents for Grades K-12 in the NSLP and SBP*. Menus are not required to comply with the maximums for grains, but must meet the minimums and stay within the weekly calorie range. The weekly maximum provides a guide for planning age-appropriate meals that meet the dietary specifications for calories, saturated fat, and sodium. For more information, see *Whole Grain-rich Criteria for Grades K-12 in the NSLP and SBP, Calculation Methods for Crediting Grains for Grades K-12 in the NSLP and SBP* and *Crediting Breakfast Cereals for Grades K-12 in the NSLP and SBP*.
- ⁸ The meat/meat alternates component is not required. Schools may substitute 1 ounce equivalent of meat/meat alternates for 1 ounce equivalent of grains after offering the minimum daily grains serving (1 ounce equivalent). The serving size refers to the edible portion of cooked lean meat, poultry, or fish as served, e.g., cooked lean meat without bone, breading, binders, extenders, or other ingredients. A 1-ounce equivalent equals 1 ounce of lean meat, poultry, or fish; 1 ounce of cheese (low-fat recommended); 2 ounces of cottage or ricotta cheese (low-fat recommended); ¼ cup of cooked beans and peas (legumes); ½ large egg; 2 tablespoons of nut butters; 1 ounce of nuts or seeds; ¼ cup (2.2 ounces) of commercial tofu containing at least 5 grams of protein; ½ cup of yogurt or soy yogurt; and 1 ounce of alternate protein products (APP). APP must meet the USDA requirements in [appendix A](#) of the SBP regulations (7 CFR 220). Allowable nuts and seeds include almonds, Brazil nuts, cashews, filberts, macadamia nuts, peanuts, pecans, walnuts, pine nuts, pistachios, and soy nuts. For more information, see *Crediting Deli Meats in the NSLP and SBP, Crediting Legumes in the NSLP and SBP, Crediting Nuts and Seeds in the NSLP and SBP, Crediting Tofu and Tofu Products in the NSLP and SBP, and Requirements for APP*.
- ⁹ The average daily amount of calories for a five-day school week must be at least the minimum value, but no more than the maximum value.
- ¹⁰ Meals may include discretionary sources of calories (solid fats and added sugars) if the weekly menu meets the dietary specifications.
