The Connecticut State Department of Education (CSDE) recognizes the challenges faced by districts in the evaluation of educators who teach in non-tested grades and subjects. A group of these individuals is referred to as student and educator support specialists (SESS). Support specialists or service providers are those individuals who, by the nature of their job description, do not have traditional classroom assignments but serve a “caseload” of students, staff or families. In addition, they often are not directly responsible for content instruction nor do state standardized assessments directly measure their impact on students.

The CSDE, in partnership with SESS representatives from around the state, developed the CCT Rubric for Effective Service Delivery 2014 for use with support specialists. This rubric was purposefully developed as a companion to the CCT Rubric for Effective Teaching 2014 and parallels its structure and format to illustrate the common characteristics of effective practice across a variety of educators in the service of learners.

In spring 2015, phase 1 of a validation study of the CCT Rubric for Effective Service Delivery began with an extended group of field practitioners. This work resulted in an improved version of the rubric to embrace a wider range of service provider roles and responsibilities with greater attention to both student and adult learners. As with any tool for the observation of educator performance and practice, the CCT Rubric for Effective Service Delivery 2015 is offered as an option for use as part of a district’s evaluation and support plan and can be considered by the established district Professional Development and Evaluation Committee (PDEC). Specifically, school psychologists, speech and language pathologists, school social workers and school counselors may find this adapted rubric to most closely represent a progression of their practice; however, this most recent version has considered other educators in a school that may have unique assignments and responsibilities (e.g., board-certified behavior analyst (BCBA), home school family liaison, instructional coach, transition coordinator, etc.).

Introduction

Training and Proficiency

The CCT Rubric for Effective Service Delivery 2015 may be used by trained and proficient evaluators to observe a support specialist. Accurate and reliable evaluation of the domains, indicators and attributes can only be achieved through careful, rigorous training and demonstrated proficiency that build on the experience base and professional judgment of the educators who use this instrument. As part of the CSDE-sponsored training, evaluators will be provided sample performances and artifacts as well as a supplemental handbook to guide their ratings.

IMPORTANT! The CCT Rubric for Effective Service Delivery 2015 is not a checklist with predetermined points. Rather, it is a tool that, when combined with training to ensure consistency and reliability of the collection of evidence, can lead to high quality feedback and inform professional learning opportunities to advance professional practice.

Calibration

To ensure consistent and fair evaluations across different observers, settings and educators, observers need to regularly calibrate their judgments against those of their colleagues. Engaging in ongoing calibration activities conducted around a common understanding of good teaching or service delivery will help to establish inter-rater reliability and ensure fair and consistent evaluations. Calibration activities offer the opportunity to participate in rich discussion and reflection through which to deepen understanding of the CCT Rubric for Effective Service Delivery 2015 and ensure that observers can accurately measure educator practice against the indicators within the observation tool.
Observation Process

The CCT Rubric for Effective Service Delivery 2015 can be used by trained and proficient evaluators to observe SESS practices. Each educator shall be observed, at a minimum, as stated in the Connecticut Guidelines for Educator Evaluation. In order to promote an authentic view of practice and to promote a culture of openness and comfort with frequent observations and feedback, it is recommended that evaluators use a combination of announced and unannounced observations. All observations should be followed by feedback, either verbal (e.g., a post-conference, comments about professional meetings/presentations, etc.) or written (e.g., via e-mail, comprehensive write-up or both), within days of an observation. Specific, actionable feedback is also used to identify professional learning needs and tailor support to address those needs.

Evidence can be gathered from formal observations, informal observations and non-classroom observations/reviews of practice. As part of the initial goal-setting conference for SESS providers, it will be important to discuss with an evaluator the various learning environments where opportunities for observation can occur. Although the Connecticut Guidelines for Educator Evaluation do not specifically define these types of observations, the state model known as the System for Educator Evaluation and Development (SEED), provides the following definitions:

| Formal In-Class/Learning Environment Observations: | At least 30 minutes followed by a post-observation conference, which includes timely written and verbal feedback. |
| Informal In-class/Learning Environment Observations: | At least 10 minutes followed by written or verbal feedback. |
| Non-classroom Observations/Reviews of Practice: | Include, but are not limited to, observation of data team meetings or team meetings focused on individual students or groups of students, observations of early intervention team meetings, observations of individual or small group instruction with a student outside the classroom, collaborative work with staff in and out of the classroom, provision of training and technical assistance with staff or families, and leading schoolwide initiatives directly related to the support specialist’s area of expertise. |

Introduction

The following protocol may be used for conducting a formal in-class/learning environment observation that requires a pre- and post-conference:

A. Pre-Conference: Before the observation, the evaluator will review planning documentation and other relevant artifacts provided by the service provider in order to understand the context for the work to be observed, including the objectives for the activity; the service to be delivered; how effectiveness of the activity will be assessed before, during and after; what materials and resources will be used.

B. Observation: Evaluators will collect evidence mostly for Domains 1 and 3 during the in-class observation.

C. Post-Conference: The post-observation conference gives the service provider the opportunity to reflect on and discuss the practice observed, progress of the recipients of the service, adjustments made during service delivery, further supporting artifacts as well as describe the impact on future services and supports.

D. Analysis: The evaluator analyzes the evidence gathered during the observation and the pre- and post-conferences and identifies the applicable performance descriptors contained in the CCT Rubric for Effective Service Delivery 2015.

E. Ratings/Feedback: Based on the training guidelines for the CCT Rubric for Effective Service Delivery 2015, the evaluator will tag evidence to the appropriate indicator within the domains of the rubric and provide feedback to the service provider. Although each attribute within an indicator may not be applicable to the service provider’s role or the specific learning environment where the observation is taking place, a trained evaluator should be able to collect evidence for most attributes within each indicator during an academic year.
The *Common Core of Teaching (CCT) Rubric for Effective Service Delivery 2015* is completely aligned with the CCT. The *CCT Rubric for Effective Service Delivery 2015* will be used to evaluate a service provider’s performance and practice, which accounts for 40 percent of his or her annual summative rating, as required in the Connecticut Guidelines for Educator Evaluation and represented within the state model, the System for Educator Evaluation and Development (SEED).

Because service delivery is a complex, integrated activity, the domain indicators from the CCT Foundational Skills (2010) have been consolidated and reorganized in this rubric for the purpose of describing essential and critical aspects of practice. For the purpose of the rubric, the domains have also been renumbered. The four domains and 12 indicators (three per domain) identify the essential aspects of a service provider’s performance and practice.

1. A respectful and equitable learning environment supports whole-child development and the understanding that educators must continuously work to ensure not only that educational learning environments are inclusive and respectful of all students but they also offer opportunities for equitable access, survivability, outputs and outcomes. Branson, C. & Gross, S. (Eds.). (2014). *Handbook of Ethical Educational Leadership*. New York: Routledge.

2. Respect for learner diversity means recognizing individual differences, including but not limited to race, ethnicity, gender, sexual orientation, socioeconomic status, age, physical abilities, intellectual abilities, religious beliefs, political beliefs, or other ideologies.
### Domain 1: Learning Environment, Engagement and Commitment to Learning

Service providers promote student/adult learner engagement, independence and interdependence in learning and facilitate a positive learning community by:

3. Social competence is exhibiting self-awareness, self-management, social awareness and social skills at appropriate times and with sufficient frequency to be effective in the situation (Boyatzis, Goleman, and Rhee, 2000).

4. Proactive strategies include self-regulation strategies, problem-solving strategies, conflict resolution processes, interpersonal communication and responsible decision-making.
**Domain 1: Learning Environment, Engagement and Commitment to Learning**

Service providers promote student/adult learner engagement, independence and interdependence in learning and facilitate a positive learning community by:

7. Academic, behavioral, therapeutic, crisis or consultative plans may be developed for and directed to whole group, small group and or individual learners.
8. Connecticut content standards are standards developed for all content areas including Common Core State Standards (CCSS) inclusive of College and Career Ready Anchor Standards and Early Learning and Development Standards (ELDS).
9. Multiple sources of data may include existing data or data to be collected (progress monitoring). Data may be formal (standardized tests) or informal (survey responses, interviews, anecdotal records, grades) and may be formative or summative.
## Domain 2: Planning for Active Learning

Service providers design academic, social/behavioral, therapeutic, crisis or consultative plans to engage student/adult learners in rigorous and relevant learning and to promote their curiosity about the world at large by:

11. Flexible groupings are groupings of learners that are changeable based on the purpose of the service delivery and on changes in the needs of individual learners over time.
## Domain 2: Planning for Active Learning

Service providers design academic, social/behavioral, therapeutic, crisis or consultative plans to engage student/adult learners in rigorous and relevant learning and to promote their curiosity about the world at large by:

12. Assessment strategies are used to evaluate learners before, during and after service delivery. Entry assessments are often diagnostic and used to determine eligibility for services. Formative assessment is part of the process used by service providers during service delivery, which provides feedback to monitor and adjust ongoing services. Summative assessments are used to evaluate learners at the end of a service delivery plan to determine learner success.
