AGENDA

9:00 Welcome and Introductions
    Paul Farrell, Assistant Director, Bureau of Air Management/Department of Energy and Environmental Protection (DEEP)

9:15 Update On DEEP Lean Efforts
    Nicole Lugli, DEEP’s Office of Planning and Program Development

9:45 Overview of Eastern Regional Technical Committee (ERTAC) Electric Generating Unit (EGU) Forecasting Tool
    Wendy Jacobs, Bureau of Air Management/DEEP Staff

10:00 2013 Air Network Monitoring Plan
    Randy Semagin, Bureau of Air Management/DEEP Staff

10:20 2013 Ozone Season Forecasting
    Sam Sampieri, Bureau of Air Management/DEEP Staff

10:40 Regulatory Updates
    Bureau of Air Management/DEEP Staff

11:00 SIPRAC Chair Briefing
    Jim Romanski, Yale University

11:15 Adjourn

Special Notice to SIPRAC:
ERTAC Electric Generation Unit (EGU) Forecasting Tool Webinar Sponsored by The Mid-Atlantic Regional Air Management Association, Inc. (MARAMA)

MARAMA is inviting interested persons to attend a series of two webinars that will present a detailed look at the ERTAC EGU forecasting tool design and the results of a modeling run of future year 2017 predicated on base year 2007. Specific unit examples and overarching trends in the Northeast and MidAtlantic regions will be provided.

ERTAC EGU TOOL INFORMATION:

The Eastern Regional Technical Advisory Committee (ERTAC) is a collaborative group focused on improving emission inventories. Members are state air agency staff, industry representatives, and multijurisdictional planning organization (MJO) representatives.

The EGU Forecasting Tool, developed by ERTAC, can be used to grow base year hourly EGU air emissions inventories into future projection year hourly EGU air emissions inventories for air quality impact assessment on both an annual and episodic peak basis. The tool uses base year hourly Clean Air Markets Division (CAMD) data and fuel specific growth rates and other information to estimate future emissions. Regional planning organizations, such as the Ozone Transport Commission (OTC), Lake Michigan Air Directors Consortium (LADCO), and Southeastern States Air Resource Managers, Inc. (SESARM) plan to use this tool to forecast future EGU air emissions and use that forecast in Air Quality modeling for State Implementation Planning (SIP) purposes.
