2.0 Overview

This guide contains instructions for registering to use, connecting to, and logging into and out of the eRegulations System's case manager component, ICM. Because ICM is accessed through the Internet, information concerning browser requirements is also provided. Information about troubleshooting common log in problems and creating shortcuts to the ICM log in screen is also included.

3.0 Technical Basics

3.1 What is ICM?

3.1.1 ICM stands for IBM Case Manager.

3.1.2 ICM is the software platform used to create an interface between you, the state agency user, and the various components of the eRegulations System, (e.g., regulation writing, approval routing, website posting and electronic document storage).

3.2 Internet Browser Requirements

3.2.1 ICM is accessed through the Internet and is designed to work with Internet Explorer (IE) versions 9 and 10.

3.2.2 Using different IE versions or any other browser (e.g., Chrome, Firefox) typically causes functionality issues. SOTS recommends using IE 9 or IE 10 only.

3.2.3 ICM appears to work with IE 11, but IBM does not specifically support using the two together.

3.2.4 If you have any questions about required browser versions, please contact Kristin Karr at the Secretary of the State's Office (SOTS) at 860-509-6009 or kristin.karr@ct.gov
3.3 **User Registration (ID and Password)**
