

# Frequently asked questions

- **Why is there a difference in rates between the UnitedHealthcare Group Medicare Advantage (PPO) plan and the UnitedHealthcare Senior Supplement plan?**

The UnitedHealthcare Group Medicare Advantage (PPO) plan is a managed care plan. We are focused on addressing the needs of our members across the healthcare spectrum. This includes tools and resources available to our members that help them stay healthy. We are also focused on helping our members who are living with chronic conditions manage these conditions with our disease-specific care management programs. These programs help manage the overall cost of healthcare which may result to lower premiums for our members.

Because Medicare does not provide managed care, members may lose out on programs that focus on keeping them healthy or helping them live with chronic conditions. This may result in higher overall plan costs.

- **Why does the UnitedHealthcare Group Medicare Advantage (PPO) plan have Healthy at Home and the UnitedHealthcare Senior Supplement plan does not?**

The Healthy at Home benefit is one of the many ways we remove barriers and avoid readmission rates following an inpatient discharge. Because the Medicare Advantage plan is focused on quality of healthcare, we are able to add additional programs to the plan that the Senior Supplement plan does not include.
