

healthy. In 1949 there was approxi-  
mately 83% survival, and in 1950-51 about  
66% survival. In an original planting  
of 96 plants only 64 have survived but  
none have fruited.

10/24/51 - Map in file

UPTON, Mass.

Aug. 1990 Mark White found a large  
number of chestnut trees near Upton,  
one large and fruiting. In TV Gas  
pipeline clearing between Pearl and  
Prospect sts. near Rt. 140. One leaf  
sample clearly dent. moll. hybrid!
