Chinese Chestnuts

12/22/54 - "I have fourteen Chinese chestnuts bearing and about ten that should bear next year and about 100 seedlings one to three feet high. Five chestnuts came from Kelly Bros. of N.Y. these are spreading trees of medium size nuts. I bought 200 trees from the Hawks Bros. of Kentucky and lost all but 12 to a grass fire. These trees are more upright and bear large nuts. I bought six grafted trees but all died but Kuiling and this tree did not mature it's nuts in it's first bearing / last year."
