The Connecticut Agricultural Experiment Station Food Donation Program

Dear Friend:

The Connecticut Agricultural Experiment Station Research Foundation, Inc. (CAES Research Foundation), an official non-profit 501(c)(3) organization, was founded in 2007 to support the ongoing and new research of our scientists as they address critical issues in Connecticut.

Our scientists address important issues, such as developing new crops for Connecticut markets and for biodiesel fuel production; managing forests and other natural areas; reducing pesticides in agricultural systems using novel approaches to disease and pest management; preserving soil and water quality; controlling invasive insects and plants; investigating honey bee health; researching ticks, Lyme disease, mosquitoes, and encephalitis viruses; and helping to ensure food and product safety.

The CAES Research Foundation provides individuals and foundations the opportunity to contribute to our research and public service, and increase the awareness of our important mission.

If you have questions or would like additional information regarding our Foundation or the support we give to The Connecticut Agricultural Experiment Station, please feel free to contact us.

Sincerely,

Michael P. Last, President
