

Inspection of Pesticides, Pool Products and Pet Preparations 1983

By Lester Hankin

INSPECTION OF PESTICIDES, POOL PRODUCTS, AND PET PREPARATIONS--1983

Results of chemical analysis of 210 official samples of pesticides, pool products, and pet preparations collected during 1983 by inspectors of the Connecticut Department of Environmental Protection are presented in this Bulletin.

Table 1 shows individual samples representing 306 guarantees for active ingredients from 49 manufacturers. Following the names of the manufacturers are the brands of the products and the active ingredients. The percentage of the guarantee found for each active ingredient is then shown. Deficiencies are underlined with a single line and excesses are in parenthesis. Deficiencies are based on Laboratory Verification Guidelines established by the U.S. Environmental Protection Agency. Only 5.2% of 211 samples were deficient and 1.4% excessive.

Table 2 summarizes the number of samples tested from each manufacturer the number of guarantees for active ingredients, the number of deficiencies (-) or excesses (+), and the average percent of guarantee.

Analyses were performed by M. Fuzesi, R. Hastings, and M.A. Illig. Samples were collected by M. Beott and D. Griswold. Pesticide laws are administered by the Commissioner of the Department of Environmental Protection.

Lester Hankin
Chief, Analytical Chemistry

Table 1. Analysis of Individual Samples

Manufacturer, Brand Name & Active Ingredient	Percent Guarantee	Percent Found
AGWAY		
Agway Ant & Soil Insect Granules--Diazinon	5	5.1
Agway Asparagus Berry Weeder--Simazine	4	4.3
Agway Bulb Dust		
--Methoxychlor	5	5.0
--Thiram	10	10.3
Agway Cluster Fly Insect Tape--Diazinon	10	10.1
Agway Dairy Bactericide--Calcium Hypochlorite	50	68.5
Agway Diazinon Dust--Diazinon	4	4.2
Agway Dormant Oil--Petroleum Distillate	98.8	98.8
Agway Dual Garden Orchard Spray		
--Captan	15.0	15.1
--Malathion	7.5	7.5
--Methoxychlor	15.0	14.8
Agway Fruit & Ornamental Spray with Imidan--Imidan	12.5	12.3
Agway Fruit Tree Spray		
--Captan	11.35	11.72
--Malathion	6.00	5.95
--Methoxychlor	12.00	11.70
--Carbaryl	3.00	3.20
Agway Garden & Lawn Insect Spray--Diazinon	25	25.8
Agway Garden Insect Spray with Sevin--Carbaryl	50	51.0
Agway Garden Weed Killer--Dacthal	5	5.0
Agway Insect Spray with Malathion--Malathion	55	56.0

- (a) 2,4,-D is 2,4-Dichlorophenoxyacetic Acid.
 (b) MCPFP is Mecoprop, α -(4-chloro-2,2-methylphenoxy)propionic Acid.
 (c) Presence of linseed oil in sample prevented quantitative determination of Folpet.
 (d) The combination of these two compounds is Karathane.
 (e) Subsample means that more than one container was collected and each analyzed separately.
 (f) DDVP is 0,0-Dimethyl-2,2-dichlorovinyl phosphate.
 (g) Quantitative analysis not practical on such a mixture.
