PLANT SCIENCE DAY 2022 OPEN HOUSE PRESENTED BY THE CONNECTICUT AGRICULTURAL EXPERIMENT STATION

Date: Wednesday, August 3, 2022

Time: Gates open at 9:30 a.m.

Program begins at 10:00 a.m. Event 10:00 a.m. - 4:00 p.m.

Where: Lockwood Farm

The Connecticut Agricultural Experiment Station

890 Evergreen Avenue Hamden, CT 06518

Hamden, CT--The Connecticut Agricultural Experiment Station (CAES) invites you to attend its 112th annual field day open house, *Plant Science Day 2022*. The outdoor event will be held at Lockwood Farm, the Station's 75-acre research farm located in Hamden, Connecticut, and will feature updates on the Station's research advances in agriculture, food safety, the environment, forestry, and public health. The event is free, open to the public, and takes place rain or shine. Among the day's highlights will be the Century Farm Award and Samuel W. Johnson Memorial Lecture. This year's Century Farm Award, presented to a farm that has been in family operation for more than 100 years, will go to Fairholm Farm, Woodstock, Connecticut. The Memorial Lecture, named for Dr. Samuel Johnson, director of the Station from 1877 to 1900, was established as a forum focusing on current issues of concern to Connecticut residents and beyond. This year's lecture will be presented by Ms.

Katie S. Dykes, Commissioner, Connecticut Department of Energy and Environmental Protection (CT DEEP). CAES scientists will give oral presentations on "Urban Agriculture for Food Security in Challenging Spaces," "Soil Organic Carbon: A Key Component of Soil Health in a Changing Climate," and "Laboratory Analyses of Processed Foods, Raw Agricultural Commodities and Animal Feed in Connecticut." Additional highlights will include technical demonstrations on "Beekeeping Systems Used in Connecticut" and "Managing Weeds in Lakes and Ponds," and poster displays featuring several of the Station's current research programs. Plant Science Day offers opportunities for attendees to engage in informal discussions with CAES scientists on a variety of scientific topics. Attendees can also visit 80 field plots and exhibits and activities for children, including the ever-popular "Passport for Kids" program. As always, the Station's experts will be available to diagnose plant diseases, identify plants, insects, and weeds, and collect soil samples for testing. Connecticut pesticide credits will also be offered.

Media are also invited for on-site interviews with CAES scientists about their research projects and other services and programs at The Connecticut Agricultural Experiment Station.
