To: Cameron Walden - Supervising Sanitary Engineer
DPH - Drinking Water Section, 450 Capitol Avenue, MS#51WAT, Hartford

From: David J. Fox - Senior Environmental Analyst **Telephone:** 860-424-4111

Date: August 1, 2012 **E-Mail:** david.fox@ct.gov

Subject: Old Wolcott Road Water Storage Tank, Bristol

The Department of Energy & Environmental Protection has received the Notice of Scoping for the proposed project to repair and modify the Old Wolcott Road water storage tank in Bristol. It appears that this project would fall under Category IV, a listing of actions which do not warrant a review pursuant to CEPA, in the *Generic Environmental Classification Document for State Agencies*. In any case, the following comments are submitted for your consideration.

If the tank is to be tested and disinfected, the discharge would be covered by the *General Permit for the Discharge of Hydrostatic Pressure Testing Wastewater* (DEP-PERD-GP-011). This general permit applies to all discharges of waters used to test the structural integrity of new or used tanks and pipelines that hold or transfer drinking water, sewage, or natural gas. The general permit contains pH, chlorine, oil and grease, and suspended solids limits which will need to be complied with during the testing and verified through monitoring. Registration is required to be submitted to the Department in order for the discharges to be authorized by this general permit. A fact sheet, the general permit which includes the registration form, titled Notice of Coverage, and the Application Transmittal form may be downloaded at: [Hydrostatic GP](#)

The Natural Diversity Data Base, maintained by DEEP, contains no records of extant populations of Federally listed endangered or threatened species or species listed by the State, pursuant to section 26-306 of the CGS, as endangered, threatened or special concern at either project area. This information is not the result of comprehensive or site-specific field investigations. Also, be advised that this is a preliminary review. A more detailed review may be conducted as part of any subsequent environmental permit applications submitted to DEEP for the proposed site. Consultation with the Natural Diversity Data Base should not be substituted for on-site surveys required for environmental assessments. The extent of investigation by competent biologist(s) of the flora and fauna found at the site would depend on the nature of the existing habitat(s). If field investigations reveal any Federal or State listed species, please contact the DEEP Geologic & Natural History Survey at 860-424-3540.

Thank you for the opportunity to review this project. If there are any questions concerning these comments, please contact me.
