Subject: East Lyme - New London Interconnection Project

Cam

OPM has following comments on the project:

1. How is this project consistent with the State C&D Plan?
2. How is this project consistent with the local POCD plan?
3. What are the secondary impacts of the project – in terms of anticipated new development, traffic, etc
4. Are the proposed water mains designed to accommodate any current and future development or just addressing the public safety issues?

Let me know if you have any questions. Thanks.
