

Executive Order 13690 Evaluation for East Haven Rifle Range Maintenance Building

Municipality where proposed project would be located: East Haven

Addresses of Possible Project Locations: 591 North High Street, East Haven, CT

Project Description: Pursuant to Federal *Executive Order (EO) 13690 - Establishing a Federal Flood Risk Management Standard and a Process for Further Soliciting and Considering Stakeholder Input*, the Connecticut Military Department is soliciting public and stakeholder input for the construction of a new Range Maintenance Building at the existing East Haven Rifle Range facility, owned and operated by the Connecticut Military Department. The new Range Maintenance Building will replace the old maintenance building, which is inadequate for the current facility mission. Both the existing and the proposed new maintenance buildings are within the Federal Emergency Management Agency (FEMA) 100-year floodplain boundary of the Farm River.

According to the FEMA FIRM map, the entire proposed maintenance building is located within the 100-base floodplain boundary. However, based on actual topographic field survey with the 100-year base flood elevation plotted, the entire building is above the 100-year flood elevation. A Letter of Map Amendment (LOMA) has not been filed with FEMA for this discrepancy. The proposed activity is well outside the Farm River floodway boundary. As a result of this analysis, it is anticipated that the construction of the proposed Range Maintenance Building will have no impact on the 100-year floodplain and meets the directive and policy of EO 13690.
