### **1. Proposed Environmental Classification Document for the Department of Energy and Environmental Protection**

The proposed Environmental Classification Document (ECD), which is the basic criterion for the Department of Energy and Environmental Protection's (DEEP) determination to enter into the public scoping process for an action, is available for review and comment. The ECD includes 1) a list of typical actions that require public scoping and the preparation of an environmental impact evaluation (EIE); 2) a list of typical actions that require public scoping to determine whether an EIE is required; and 3) a list of typical federal/state actions for which environmental impact statements are prepared, pursuant to the National Environmental Policy Act, and for which DEEP is the cognizant or sponsoring agency in the state. The proposed ECD also includes a list of actions or categories of actions that do not warrant a review pursuant to the Connecticut Environmental Policy Act (CEPA) and regulations and therefore do not require public scoping or the preparation of an environmental review document.

[Click here](#) to view the proposed ECD.

Written comments on the proposed ECD for DEEP are welcome and will be accepted until the close of business on: **Friday, April 19, 2024**.

## Written comments should be sent to:

**Name:** Eric Hammerling

**Agency:** Department of Energy and Environmental Protection

**Address:** 79 Elm Street, Hartford CT 06106

**E-Mail:** [Eric.Hammerling@ct.gov](mailto:Eric.Hammerling@ct.gov)

**What Happens Next:** DEEP will forward all comments received during the public comment period to the Office of Policy and Management (OPM), which shall distribute them to the Council on Environmental Quality (Council). Following consultations with DEEP and the Council, OPM will either approve the proposed ECD or disapprove it with recommendations for change.

## Scoping Notice

"Scoping" is for projects in the earliest stages of planning. At the scoping stage, detailed information on a project's design, alternatives, and environmental impacts does not yet exist. Sponsoring agencies are asking for comments from other agencies and from the public as to the scope of alternatives and environmental impacts that should be considered for further study. Send your comments to the contact person listed for the project by the date indicated. [Read More](#)

### 1. Notice of Scoping for Jack's Farm

**Address of possible location:** 1538 South Main Street, Cheshire. Connecticut 06410

**Municipality where proposed action might be located:** Cheshire

**Project Description:** The Jack's Farm Housing development plan includes the demolition of a vacant, residential house with a commercial extension and the construction of 45 new, residential apartments consisting of eight one-bedroom, 29 two-bedroom, and 6 three-bedroom units with a 1,200 square foot community room. Included are storage rooms, a meeting room, and an on-site Resident Service Coordinator's office. Parking facilities for 101 cars will be developed around the proposed buildings. Jack's Farm Housing is designed as a mixed-income, residential development targeting individuals and families earning between 25 and 110% of the area's median income (AMI) and will be deed restricted as affordable housing for 50 years. This site is located 144 feet, a one-minute walk, from bus service to New Haven, Hamden, and Waterbury. Jack's Farm is located right over the Cheshire-Hamden town line and about three miles from downtown Cheshire, a mixed-use area containing the range of uses typically associated with a New England town center. Retail, service, institutional, industrial, restaurant, offices, churches, medical and residential industries can all be found in the area. The site was used formerly as horse pasture and an apple orchard since at least 1934 and since approximately 1955 to the present has been used as a residence. The USDA Web soil survey map identify the area as prime farmland soil. The State historic preservation office (SHPO) provided a letter of no historic properties will be affected. The project location is not within 100- or 500-year floodzone. The location is not within any designated wetland area. The project area doesn't have any critical habitat.

### 3. Notice of Scoping for Science Park Tract A

**Addresses of possible locations:** Eastern Courtyard of 275 Winchester Avenue, New Haven, CT 06511 (Parcel ID 14691)

**Municipalities where proposed action might be located:** New Haven

**Project Description:** The City of New Haven has been awarded two \$2,000,000 grants from the Brownfield Municipal Grant program and a \$6,800,000 grant from the Urban Sites Remedial Action Program to demolish and abate structures on the eastern courtyard of Tract A on the 3.11-acre property located at 275 Winchester Avenue, New Haven to support the construction of residential and/or laboratory space.

## 4. Notice of Scoping for Middlebury Commons Interconnection with Connecticut Water Company Naugatuck Region - Central System

**Address of possible location:** Nutmeg Road into Middlebury Commons Condominium Complex

**Municipality where proposed action might be located:** Middlebury

**Project Description:** The work to be performed under this project includes abandoning the drinking water wells at Middlebury Commons and consolidating their small public water system with Connecticut Water Company's Naugatuck Region - Central System. The current infrastructure that provides water to Middlebury Commons is aged and lacks redundancy that is causing increasing risk of extended periods without potable water to residents of the condominium community. The project would require installing approximately 460 feet of 6" water main (8" if a fire hydrant is needed) from Connecticut Water Company's existing water main on Nutmeg Road, providing an easement to Connecticut Water Company, connecting each building to the water main, and abandoning the existing drinking water wells.

**Project Map:** [Click here](#) to view a map of the project area.

Written comments from the public are welcomed and will be accepted until the close of business on: **May 16, 2024**.

## 5. Notice of Scoping for Removal of Traffic Signals on Route 9

**Address of possible location:** Route 9 between log miles 22.9 and 25.4. At the southern limit, the proposed project begins near the Eastern Drive interchange (Exit 22) and extends to the north and terminates near the Route 99 interchange (Exit 25).

**Municipality where proposed action might be located:** Middletown, Connecticut

**Project Description:** Route 9 is a major north/south route connecting Old Saybrook and West Hartford. Through the downtown Middletown area, it is flanked by the Connecticut River to the east and an active Providence and Worcester Railroad line to the west.

The purpose of the project is to improve safety and reduce congestion. The presence of two traffic signals on Route 9 leads to crash rates substantially higher than adjacent segments of freeway. To remove the traffic signal on Route 9 at the Washington Street interchange (Exit 23C), a new off-ramp from Route 9 Northbound is proposed to provide access to River Road, approximately 3,500 feet south of Washington Street. Access to Washington Street is proposed to be removed from Route 9. The interchange will encompass the existing Providence and Worcester rail line and will provide access to Route 9 Southbound. An acceleration lane to Route 9 Southbound will provide access from Washington Street prior to Route 17 (Exit 23A). The existing access from Route 9 Southbound to Washington Street will be removed and motorists will be directed towards the previous exit for access to Route 66.

The traffic signal on Route 9 at the Route 17 interchange onto Hartford Avenue (Exit 24) will be removed by elevating the southbound direction of Route 9. The grade separation will allow for free flow acceleration from Hartford Avenue to Route 9 Northbound, crossing under Route 9 Southbound. This acceleration lane will be constructed in the existing median of Route 9 and will serve as an additional through lane for Route 9 Northbound until Exit 25 for Route 99 in Cromwell. The existing access to Hartford Avenue from Route 9 Northbound will be relocated south. Access to and from Hartford Avenue from Route 9 Southbound will be maintained with full length deceleration and acceleration lanes.

A 200-foot right turn lane is proposed on Rapallo Avenue at Main Street. The additional lane requires approximately five feet of widening within the street right of way. This requires the removal of seven parking spaces, with sidewalks maintained on both sides of the road.

**Project Map:** [Click here](#) to view a map of the project area.

Written comments from the public are welcomed and will be accepted until the close of business on: **Thursday, May 16, 2024.**

**There will be a public scoping meeting for this proposed action:**

**DATE:** Tuesday April 30, 2024

**TIME:** 5:00 p.m. Open House, 7:00 p.m. formal presentation

**PLACE:** Wesleyan University - Beckham Hall - 45 Wyllys Avenue, Middletown, CT 06459

**NOTES:** The meeting location is ADA accessible. Language assistance, including American Sign Language, may be requested by contacting CTDOT's Language Assistance Call Line at (860) 594-2109. Requests should be made at least 5 business days prior to the meeting. Language assistance is provided at no cost to the public and efforts will be made to respond to timely requests for assistance. Persons with hearing and/or speech disabilities may dial 711 for Telecommunications Relay Services (TRS).

Closed captioning and non-English translation options will be available for the presentation posted on CTDOT's YouTube Virtual Public Information Meeting playlist: <https://portal.ct.gov/ctdotvpimarchive>.
