Scoping Notice

"Scoping" is for projects in the earliest stages of planning. At the scoping stage, detailed information on a project's design, alternatives, and environmental impacts does not yet exist. Sponsoring agencies are asking for comments from other agencies and from the public as to the scope of alternatives and environmental impacts that should be considered for further study. Send your comments to the contact person listed for the project by the date indicated. [Read More](#)

The following Scoping Notice has been submitted for publication in this edition.

1. Notice of Scoping for Nathan Hale System Main Extension to Plains Road

Address of possible location: South Street Extension, Coventry from approximately the intersection of Upton Drive to Plains Road.

Municipality where proposed action might be located: Coventry

Project Description: The project will install a water main extension to serve five single family residences served by private wells located on Plains Road which are experiencing polluted groundwater. This will be accomplished by extending a total of 5,015 FT of 6-inch water main from the existing Nathan Hale System of the Connecticut Water Company. This will eliminate the private wells that are known to have high levels of Sodium and Chloride on Plains Road. This project could also serve to provide private well owners on Plains Road with an opportunity to connect to public water.
