Subject: Suggestions on Milford Property Aquisition for Parking

Hi Zack,

I would like to see a two level parking garage with some retail establishments embedded into the project. I think this an opportunity to get really creative and think outside the box.

Of course, a Starbucks would be nice for those wanting coffee near the train station and also a place to do some work on their computer with wifi from Starbucks. I know Café Atlantic is nearby, but people might not want to be forced to cross the street in the rain and snow just to get coffee.

And I don't think the have Wi-Fi and the seating area isn't as large as a new Starbucks.

How about making the new area a Wi-Fi hotspot?

How about a tunnel under the railroad tracks from the parking lot. Maybe an enclosed tunnel, so the train could be taken from either side of the tracks.

How about a self serve 'Welcome to Milford' kiosk?

How about a small 20 room hotel for overnight visitors to Milford???

Please let me know your thoughts on this.

Thanks,

Bruce Cooke
