6. Man vs. Machinery Class

Machinery entrapments occur across the United States and Canada. Fire, EMS and Rescue services are called all the time to disentangle and extricate persons from machinery. Is your department capable of handling one? This program provides responders with the knowledge to help manage common machinery accidents and machinery specific to industry in your area. This is a highly specialized skill set, and caring for victims/patients entrapped in machinery necessitates that providers be trained in specific treatment modalities and the possible complications that may arise. Tool selection, patient stabilization techniques and crush injury syndrome will be discussed and case studies will be analyzed. This program sponsored by Storm Engine Co. Ambulance & Rescue and provided by PL Vulcan Fire Training Concepts will include hands-on demonstrations. The full day class will be held on Sunday March 26, 2017, from 9AM TO 5PM. Cost of the course is \$200.00 must be paid in advance of the class and includes lunch. Class size is limited to 40 people and it is first come first served.
