### **4. NFA Water Based Fire Protection Systems Plan Review**

**Connecticut Fire Academy: October 22-27, 2017**

**Course Number: 18068**

#### **Course description**

This six-day course will enable students to perform a plan review to evaluate the suitability of the fire sprinkler, pump, and standpipe plans and calculations in accordance with nationally recognized standards for design and installation. Course content covers fire protection standards, plan reading, water supplies, building envelope features, fire protection hydraulics mathematics, fire pumps, sprinkler systems, and standpipe systems.

#### **Selection criteria**

Anyone responsible for the review and/or approval of building and fire/life safety design in the regulatory process. This includes building officials, fire marshals, insurance representatives, and designers/architects. Preference will be given to applicants who have previously attended National Fire Academy's "Fire Inspection Principles" (R0220) and/or "Fire and Life Safety Plan Review" (R0132).

#### **Prerequisites**

1. Incident Command System (ICS)-100-level and ICS-200-level training. Preferred courses are Q0462 and Q0463, available through NFA Online at [www.usfa.fema.gov/training/nfa/courses/online.html](http://www.usfa.fema.gov/training/nfa/courses/online.html). Chief's signature attests that the applicant has completed this required training.

2. Working knowledge and understanding of prescriptive codes and fundamental understanding of fire behavior.

3. Three or more years of experience in either a code enforcement or fire safety inspection function.
4. Students in the fire service should not have less than three years' experience in either a code enforcement or fire safety inspection/plan review function.
5. Allied professionals should possess an associate degree in engineering, architecture, building design, or risk management from an accredited college.

This course has been approved for 32 hours of continuing education credit from OEDM.

Please use the attached application

# Certified Pump Operator

## Certified Pump Operator

Course Number: 2017-07

This course is designed to prepare the student for the practical skills and written examinations for Pump Operator certification. Class work will include: safe driving techniques, preventative maintenance, pump operations, hydraulic calculations, water supply and apparatus systems. The course begins inside the classroom and ends outside with pumping apparatus. The main emphasis of this course is on “hands-on” exercises using various types of pumps, hose sizes and nozzles. This course alone is not designed to produce expert pump operators. Students must apply the basics learned from this course with continued hands-on practical applications with apparatus in their departments to build and maintain proficiency in pump apparatus operations.

**\*This is a Connecticut Fire Academy Certification class, taught by Fairfield Regional Fire School instructors.**
