

CT RMS Vendor Distribution – Percentage Breakdown

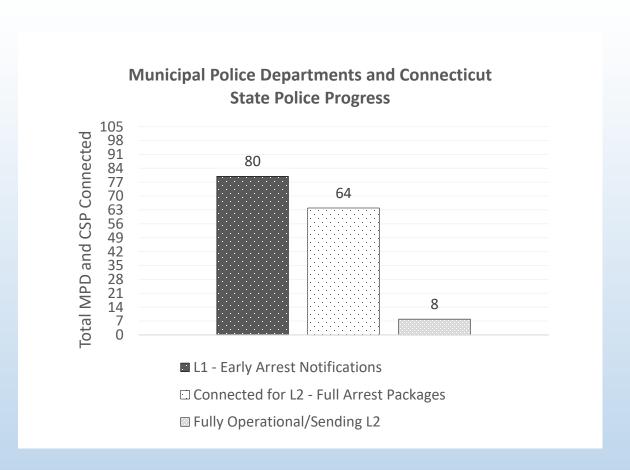

NexGen Vendor Performance

NexGen (incl. MPDs and CSP)

NexGen accounts for 81% of the total vendor market with 74 MPDs and 11 CSP barracks connected to NexGen.

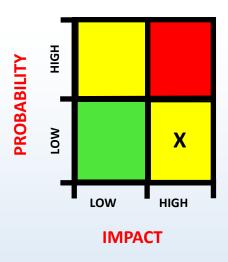

#1 Risk - RMS Vendor Participation Does Not Provide 90% + of All Arrests to CISS

Impact:

➤ CJIS-CT agencies will have to support both the CISS Digital workflows and a significant amount of the legacy paper-based workflows with the current resources. This outcome may not be supportable in the long term.

Mitigation and Contingency:

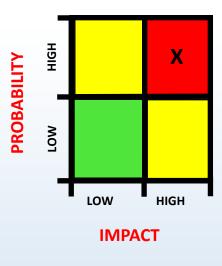

➤ This is a work in progress that is expected to be completed in the second half of 2024.

#2 Risk - System Reliability/Up-time not meeting 99.9% requirement

Impact:

➤ If the up-time of the 99.9% is not reached by all CISS Workflow endpoints as we achieve 90% of the arrest information through CISS, we could negatively impact the planned efficiencies envisioned for this project.

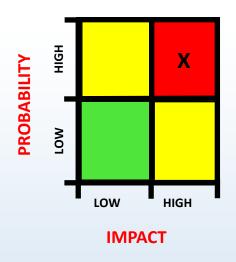

Mitigation and Contingency:

This is a work in progress. CJIS-CT will be generating and sharing a topographical high-level map of desired endpoints to be monitored with all stakeholders and make that we are all aligned.

#3 Risk - Two new RMS vendors are required to onboard into CISS Workflow. Adding these two RMS Systems will bring at least 90% of the arrest information into CISS as planned. The challenge lies with cross-branch/cross agency resource capacity to support the onboarding. This work will require resources and hence agency funding will be required for each new vendor integrated into CISS.

Impact:

➤ If proper planning is not done for onboarding new RMS vendors, CJIS-CT stakeholders will be negatively impacted financially and delays in reaching the 90% of arrest information in CISS could be realized.

Mitigation and Contingency:

- ➤ Pro Phoenix is in the process of completing the security audit for them to participate in the integration effort for CISS Workflows. CJIS-CT is also pursuing adding one more vendor that has the Hartford PD as part of the CISS Workflows.
- > CJIS-CT is exploring options to allow smaller PDs that do not have an RMS vendor connected to CISS to be able to send attached documents that can be processed for CISS Workflow

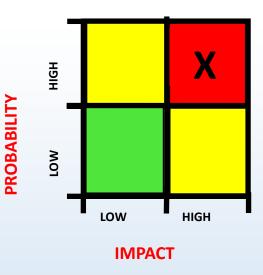

#1 Issue - Source Systems Not Available to CISS Search

Impact:

- ➤ Weapons Weapons data is over two years old and decisions by law enforcement are potentially impacting law enforcement and public safety. CISS Search is the only system in Connecticut that provides indexing across 12 systems based on Person, Location, Event, and Property for better decision-making.
- ➤ Wanted Wanted data is currently only available on COLLECT terminals at PD locations. These terminals are few and access for searches can be limited; and, therefore, limiting better decision-making.

Mitigation and Contingency:

- ➤ DESPP has advised CJIS-CT that the request sent to the AG's office for the review of the WEAPONS source system sharing; response from AG office is an outstanding item.
- > DESPP has provided a draft MOU for sharing DWOR source system data; this is with CJIS-CT for review.
- > CJIS-CT is still waiting for access to a COLLECT terminal for testing. CJIS-CT suggests that DESPP use an existing COLLECT terminal from a local PD or State Troop Barrack to do the testing instead.

No change in risk level since last review.

RISKS

| | | | | | | | | MONO | | | | | |
|---------|------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|--------|---------------------------------------------------------------------------------------|-----------------------------|-------------------|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Date | Risk | Risk Description | Impact | Last Reviewed: | Mitigation Strategy | Potential | Likelihood | | Risk Mitigati | on Actions | Status / Comments | | |
| Started | Num | | | | | Impact | | | | be specific and actionable) | | | |
| | | | | | | (5) Very High (4) High (3) Medium (2) Low (1) Minimum | (5) Almost Certain (4) Highly Likely (3) Somewhat Likely (2) Unlikely (1) Remote | Status | Actions | Assigned to | Date Due | Date Closed | |
| 5/8/23 | 1 | meeting 99.9% requirement | If the up-time of the 99.9% is not reached by all CISS Workflow endpoints as we achieve 90% of the arrest information through CISS, we could negatively impact the planned efficiencies envisioned for this project. | 3/8/2024 | CJIS-CT is working with each stakeholder agency in order to provide up-time statistics in a scorecard to track adherence to 99.9% up-time. Also, CJIS-CT will be recommending to add System Center Monitoring for the overall CISS solution to be developed and shared in partnership with all CJIS-CT stakeholders. The CJIS-CT community already has in place a change control board for any changes both technical or legislative that can impact CISS. | 4 | 4 | | CJIS-CT to coordinate on scorecard and shared monitoring solutions with stakeholders. | Mark Tezaris | 12/31/2023 | | 06/14/2024: CJIS-CT has created a topographical map of the network endpoints for CISS. The team is reviewing the high-level requirements and will formally put a project manager to kick-off the project on June 10, 2024. We will provide updates periodically on this project. 05/10/2024: This is a work in progress. CJIS-CT will be generating and sharing a topographical high-level map of desired endpoints to be monitored with all stakeholders and ensure that we are all aligned. |
| 5/31/23 | 2 | CJIS-CT Community Fusion HelpDesk needed to coordinate workflow deployment without major issues. | | 3/8/2024 | Evaluate various options to provide a fusion helpdesk for great customer experience with issues to the helpdesk. | 4 | 5 | 20 | | Mark Tezaris/Pat | TBD | | 06/14/2024: CJIS-CT has been working with the BITS Help Desk folks to review the SOP for the fusion help desk. We expect to start using the BITS after-hours team to answer calls and triage CJIS help desk events. 05/10/2024: CJIS-CT is working with BITS to provide the Standard Operating Procedures (SOP), in a written format by May 15th. We will review the SOP with BITS and agree on a start date for this process to begin. We are targetting a start date to use the new process in May 2024. |
| 7/10/23 | | CJIS-CT workflow schedule mis-alignment with MPDs delays overall Workflow deployment 1. MPDs may have other priorities which conflict with CJIS-CT schedules. 2. MPDs may have municipal IT human resource shortages. 3. Small MPDs may have lower volumes of arrests which impact CJIS-CT validation of workflow. 4. RMS vendor prioritization. | | 3/8/2024 | 1. Create alignment-based master schedule with frequent reviews with MPDs; adjust dates and move MPDs around in the deployment plan as schedules shift. 2. MPD IT resource shortages will be accounted for in CJIS-CT schedules 3. CJIS-CT schedule replan includes remediation time for affected PDs | 4 | 5 | | Ongoing schedule management through CJIS-CT internal meetings (PMO, IPP) | Mark Tezaris | ongoing | | 06/14/2024: CJIS-CT and BITS network team have connected 69 out of 74 NexGen PDs. The NexGen code is adding the supplemental transmittal and new bond code functionality. Testing is expected to be completed by June 14, 2024 and put into production. This will allow for MPDs and CSP statewide deployment. 05/10/2024: CJIS-CT continues to work with the MPDs, CSP, and NexGen to help identify any implementation issues and mitigate them. While CJIS-CT was waiting for the NexGen code to be tested for L2, we connected 60 of the 73 PDs that utilized the NexGen RMS. This will represent about 81% of all the arrest information in the state that will be using L2 and going through CISS Workflow. |

RISKS

| Started | Num | | | | | Impact | | | (should be specific | | | | |
| | | | | | | (5) Very High (4) High (3) Medium (2) Low (1) Minimum | (5) Almost Certain (4) Highly Likely (3) Somewhat Likely (2) Unlikely (1) Remote | Status | Actions | Assigned to | Date Due | Date Closed | |
| 10/10/23 | | Given recent legal interpretation of Clean Slate Erasure language in the statute, DESPP will not be displaying erasure case or charge data to their sworn law enforcement. The risk is that CJIS-CT will have to change the CISS Search code before 1/1/2024 so that DESPP arrest data that was erased will not be displayed. | | 3/8/2024 | CJIS-CT will have to work with CJIS-CT agencies to define erasure requirements as per DESPP policy and implement changes as quickly as possible to comply with Clean Slate Erasures for CISS Search and Workflow. This is a significant change request that cannot be completed by 1/1/2024. | | 5 | 25 | CJIS-CT has met with Clean Slate project sponsors Marc Pelka and Patrick Hulin and has described this risk as we work with DESPP and others to find a mitigation. | Mark Tezaris | ongoing | | 06/14/2024: High-level requirements have been developed by the CJIS stakeholders and are being reviewed by DESPP for signature. Upon sign-off, the coding work will begin and is expected to be in production by 12/2024. 05/10/2024: CJIS-CT has been working witih DESPP and our vendor, Innova Solutions, and has created the requirements needed for Clean Slate erasures in CISS. We are working with DESPP to get the signatures needed so that we can start the development of the code to make the necessary changes planned in CISS. |
| 6/29/15 | | One of the goals is that CISS will contain more than 90% of all state arrest records. There is a risk not all law enforcement record management vendors will connect to CISS. This would impact information necessary for the workflows for stakeholders. | | 3/8/2024 | A formal plan for onboarding all vendors and /or getting all arrest information has been developed. | 5 | 3 | 15 | Work with additional vendors to sign contracts | Mark Tezaris | Ongoing | | 06/14/2024: The CJIS-CT development team is scheduled to work on a proof-of-concept for a light version of RMS. This functionality will allow non-connected PDs to CISS Workflow to send arrest information to CISS. 05/10/2024: This is a work in progress that is expected to be completed in the second half of 2024. |
| 4/12/24 | 6 | Two new RMS vendors are required to onboard into CISS for Workflow. Adding these two RMS Systems will bring at least 90% of the arrest information into CISS as planned. The challenge lies | If proper planning is not done for onboarding new RMS vendors, CJIS-CT stakeholders will be negatively mpacted financially and delays in reaching the 90% of arrest information in CISS could be realized. | New | A draft formal plan is being developed by CJIS-CT to add additional RMS vendors to CISS to meet the 90% of arrest information. This plan will be developed, finalized, and shared with all CJIS agencies that are impacted so they can plan and allocate resources needed. | 5 | 5 | 25 | CJIS-CT is negotiating with new RMS vendors and will work with CJIS-CT partner agencies for a detailed plan and schedule to onboard new vendors. | Mark Tezaris | Ongoing | | O6/14/2024: CJIS-CT is communicating with Inform RMS to set up a meeting to discuss connecting to CISS. We expect to have more information about timing by June 14, 2024, and will communicate with our stakeholders. The process to create an agreement with Pro Phoenix to connect to CISS Workflow is work in progress. As we get an agreement, we will share that information with CJIS-CT stakeholders. O5/10/2024: Pro Phoenix is in the process of completing the security audit for them to participate in the integration effort for CISS Workflows. CJIS-CT is also pursuing adding one more vendor that has the Hartford PD as part of the CISS Workflows. CJIS-CT is exploring options to allow smaller PDs that do not have an RMS vendor connected to CISS to be able to send attached documents that can be processed for CISS Workflow. |

| | | | | | Medium Low None | Serious Moderate Minimal None | | | | | | |
| 9/13/16 | 1 | | Without adequate staffing, CJIS-CT will not be able to meet 99.9% of CISS availability. | CJIS-CT has put together a support strategy with state employees, consultants, and vendor maintenance and support | Very High | Critical | Mark Tezaris | CJIS-CT contracted with AIC and is continuing to hire additional consultants. CJIS-CT will work with DAS to hire state employees where possible to maintain domain knowledge for large complicated systems. | Ongoing | | 06/14/2024: CJIS-CT has extended an offer which was accepted for the ITM position. The second position is pending approval. Other positions will follow soon after the second position is approved. 05/10/2024: CJIS-CT is interviewing for the ITM position. The second position is still pending approval. Other positions will follow soon after the second position is approved. | |
| 2/7/23 | 2 | DESPP LiveScan/RMS Interface Issue | Lack of integration between fingerprinting system and CISS leads to addiitonal workload on police officers | Complete programming application interface for NexGen and other RMS vendors. Build, test, deploy Central Server to provide near realtime statute table for all law enforcement in the state. | 5 | 5 | 25 | Build the interface and the server. | TBD | | 06/14/2024: The LiveScan RMS interface is progressing slowly given other priorities. One of the key areas that is still pending development is the LiveScan code to update the new UAR form, which has the updated 7% Cash Bond and Variable Gun Violence Bond. A workaround is in place until this code development is completed. 05/10/2024: - (Current Scope) DESPP is in the process of moving the code to production that allows the bi-directional communication between the RMS system and the LiveScan as planned. - (New Scope) The new bond requirements for 7% Cash and Variable % Gun Violence Bond Amount data variable and forms required for LiveScan are being negotiated between the vendor and DESPP for completion. | |
| 11/9/23 | | CJIS-CT is getting an increase in requests from non-criminal justice agencies for access for CISS Search data to help them make better decisions involving public safety. This includes academic institutions, DSS, Department of Consumer Protection, and the Department of Revenue Services. | Additional demand for CJIS-CT resources. | Requests Governance Committee support on onboarding process for Non- Criminal Justice Agencies (NCJA). | 4 | 4 | | CJIS-CT to review process and recommend changes to Governance Committee. | Ongoing | | 06/14/2024: CJIS-CT is continuing to make progress with the onboarding process and is currently focused on user access agreements. 05/10/2024: CJIS-CT has met with the CJIS-CT Legal Committee and agreed to move forward with a request from DEEP for CISS access. CJIS-CT also reviewed the agency onboarding process with the Legal Committee and the Committee agreed to schedule quarterly reviews. | |
