Keith,

Can you provide me with more detail on what the sign would look like? Would there be any cell components include on it? How much would the rent paid be (approximate is ok if you don't know right now)?

If you can get me that info, I can confirm with the plant on what they may be willing to do. I presume your firm would cover the cost of the replacement but let me know if that is not correct.

Thank you.

Jake

CAUTION: This message was sent from outside of Edgewell. Please use proper judgement and caution when opening attachments, clicking links, or responding to this email.

Jake,

I hope all is well. We are in the middle of our tower zoning in Milford CT. A question was asked if we could use the Schick sign as a tower site.

As it sits right now we would need to replace the sign with a taller one. I think the sign is 35' and we would need closer to 100' to get the coverage we need with all the carriers.

I want to close the loop in case Schick is interested in doing something like that?

Thanks for letting me know.

Keith Coppins

Good Morning Jake,

I was just checking in to see if you had a chance to review the idea of putting a cell tower site at your property in Milford, CT.

Thanks

Keith Coppins

We should enter the CT siting Council (this is the agency in Ct that approved Cell towers) in December and be constructing by June 2021. If you are interested we will move quickly.

Hi Keith.

I just left you a voicemail so I apologize for the double correspondence. You had sent a letter related to a potential cell tower development at our Schick manufacturing plant site in Milford at the above-referenced address. I'd like to know more about what this entails. Let me know if you can get on a call later this week or if you have more information to provide.

Thank you,
Jake
