Subject: National Environmental Policy Act (NEPA) Arch Statement  
CT-0113A / Glastonbury  
Sequin Drive  
Glastonbury, CT  
EBI Project #6120010499

Dear Mr. Coppins:

*EBI Consulting* (herein, *EBI*) is pleased to provide you with this National Environmental Policy Act (NEPA) Archaeology Scope Statement. The Statement summarizes the results of an effort to determine the scope of archaeology required to satisfy NEPA requirements, the purpose of which is to determine if the proposed telecommunications installation may have a significant environmental effect per 47 CFR §1.1307 of Federal Communications Commission (FCC) rules implementing NEPA, for which an Environmental Assessment (EA) must be prepared.

As of the date of this Report, EBI has received results from an inquiry with the Connecticut State Historic Preservation Office (SHPO) that sought to determine the presence, or lack thereof, of documented, archaeologically sensitive sites on or adjacent to the Project Site. No such sites have been identified.

Accordingly, the scope for the archaeological investigation for this site will be an Archaeological IA survey without a requirement for Soil Test Pit (STP) excavation.

Respectfully Submitted,

Mr. Chris Murray  
Regional Operations Manager
