Milvon to West River Railroad Transmission Line 115-kV Rebuild Project Virtual Open House

- WHO:** United Illuminating
- WHERE:** Virtual at UIRailroadTLineUpgrades.com
- WHEN:** Jan. 11, 2022 at noon – Jan. 25, 2022 at noon

United Illuminating (UI) is proposing to rebuild 9.5 miles of its existing 115-kilovolt (kV) transmission lines, which are presently located within the Connecticut Department of Transportation / Metro North Railroad (CT DOT/MNR) corridor from UI's Milvon Substation (Milford, CT), through Orange and West Haven, CT to UI's West River Substation (New Haven, CT). UI will remove the transmission lines from the existing railroad catenary bonnets (overhead wire systems) and rebuild the lines on monopoles, predominantly on the north side of the corridor. These activities are necessary to improve the structural integrity and reliability of UI's transmission system.

UI has scheduled a Virtual Open House to be hosted on the project website for 2 weeks, UIRailroadTLineUpgrades.com, from noon on January 11, 2022 through noon on January 25, 2022.

In addition, team members will be available by appointment via a Zoom call on Jan. 18, 12-2 PM or Jan. 19, 5-7 PM to provide additional information or answer questions about the project. To make an appointment please contact us via phone at [888.848.3697](tel:888.848.3697) or email at info@UIRailroadTLineUpgrades.com. Please join us to learn more about the project.
