RE: **DOCKET NO. 508** – The United Illuminating Company (UI) Certificate of Environmental Compatibility and Public Need for the Milvon to West River Railroad Transmission Line 115-kV Rebuild Project that consists of the relocation and rebuild of its existing 115- kilovolt (kV) electric transmission lines from the railroad catenary structures to new steel monopole structures and related modifications to facilitate interconnection of the rebuilt 115-kV electric transmission lines at UI’s existing Milvon, Woodmont, Allings Crossing, Elmwest and West River substations along approximately 9.5 miles of the Connecticut Department of Transportation’s Metro-North Railroad corridor traversing the municipalities of Milford, Orange, West Haven and New Haven, Connecticut. **Partial Development and Management Plan I Revision.**

Dear Attorney McDermott:

The Connecticut Siting Council (Council) is in receipt of your correspondence dated August 24, 2023 regarding the revisions to Partial Development and Management (D&M) Plan I for the above-referenced facility that was approved by the Council on June 8, 2023 as follows:

- a) Install a 95-foot deadend Structure P1034N in lieu of a 100-foot tangent structure, at the same location;
- b) Install a 125-foot tangent Structure P1035N in lieu of a similar 95-foot structure, approximately 20 feet in a traverse (northerly) direction and 52 feet in a longitudinal (easterly) direction of the original location;
- c) Eliminate Structure P1036N;
- d) Install a 120-foot deadend Structure P1037N in lieu of a similar 95-foot structure, approximately 47 feet in a traverse (northerly) direction and 33 feet in a longitudinal (easterly) direction of the original location; and
- e) Install a 125-foot tangent Structure P1038N in lieu of similar 125-foot structure, approximately 35 feet in a longitudinal (easterly) direction of the original location.

Structures P1035N and P1037N require an increase in height due to the increased span length and will be shifted farther north to accommodate future planned spur tracks and work areas for Metro-North Railroad and the Connecticut Department of Transportation.

Pursuant to the Regulations of Connecticut State Agencies (RCSA) §16-50j-62(b), the requested changes are hereby approved. This approval applies only to the Partial D&M Plan I revision dated August 24, 2023.

Please be advised that deviations from the Council's Decision and Order and D&M Plan approvals are enforceable under the provisions of Connecticut General Statutes § 16-50u. Furthermore, the Certificate Holder is responsible for reporting requirements pursuant to RCSA §16-50j-62.

Thank you for your attention and cooperation.

Sincerely,

A handwritten signature in dark ink, appearing to read "Melanie A. Bachman". The signature is fluid and cursive, with a long horizontal stroke at the end.

Re: Docket No. 508 - The United Illuminating Company Application for a Certificate of Environmental Compatibility and Public Need for the Milvon to West River Railroad Transmission Line 115-kV Rebuild Project - Request for Modification to Structure Locations Near West River Substation

Dear Ms. Bachman:

Pursuant to Condition 2 of the Connecticut Siting Council's ("Council") August 18, 2022 Decision and Order regarding the Milvon to West River Railroad Transmission Line 115-kV Rebuild Project ("Project"), on April 13, 2023, The United Illuminating Company ("UI") submitted the Development and Management Plan ("D&M Plan") Segment 1: Elmwest Substation to West River Substation in the Cities of West Haven and New Haven to the Council for review. The Council approved the Segment 1 D&M Plan at its June 8, 2023 meeting.

The Company received comments from the Connecticut Department of Transportation ("CDOT") on the positioning of transmission poles on CDOT property within CDOT's West Haven rail yard which is located north of the MetroNorth Railroad ("MNR") tracks (see Segment 1 D&M Plan, Volume 2, map sheets 2 and 3).¹ Based on those comments it was necessary for the Company to modify the location of the planned monopoles as follows:

¹ Revised cross sections and maps for Segment 1 D&M Plan, Volume 2 are attached. Revisions to the cross sections and maps are highlighted by use of an orange "B" symbol. Note also that the CDOT property is referred to as the "West Haven Lumber Yard" in the revised drawings.

Structure No.	Pole Length (Original→Revised)	Structure Configuration (Original→Revised)	Transverse Offset* from Original Location (ft)***	Longitudinal Offset** from Original Location (ft)***
P1034N	100'→95'	Tangent w/ Braced Posts→ Deadend w/ Davit Arms	0	0
P1035N	95'→125'	Tangent w/ Braced Posts→ Tangent w/ Braced Posts	20	52
P1036N		Removed		
P1037N	95'→120'	Deadend w/ Davit Arms →Deadend w/ Davit Arms	47	33
P1038N	125'→125'	Tangent w/ Braced Posts→ Tangent w/ Braced Posts	0	35

* Value indicates distance moved perpendicularly and farther away from railroad tracks (north)

** Value indicates distance moved in parallel with the railroad tracks in the easterly direction

*** Approximate distance to nearest foot

In summary, the proposed changes result in the following:

- One of the double circuit steel monopoles originally planned for location along the north side of the MNR tracks in West Haven will be eliminated.
- Structures P1035N and P1037N will increase in height (to 120 and 125 feet, respectively) because of increased span length due to the elimination of P1036N and to maintain required vertical clearances for an adjacent building. These two structures were shifted farther north to accommodate the future planned spur tracks and work areas for MNR and CDOT.
- The realignment of P1035N and P1037N to the northern edge of the CDOT property will require easements on adjacent private properties, which will result in an additional 0.34 acre of permanent easements for the Project.

The modifications on the CDOT property, which have been reviewed and approved by CDOT, will not require any additional existing tree clearing and will have no adverse impacts to existing environmental resources or to EMF, public health and safety, or scenic, historic and recreational values. Accordingly, the Company requests the Council's approval of the modifications.

Melanie A. Bachman, Esq.

GENERAL NOTES

GENERAL WORK DESCRIPTION

- NEW STEEL MONOPOLES P1033N, P1034N AND P1035N WILL BE INSTALLED.
- BONNETS B1033N/S, B1034N/S AND B1035N/S WILL BE REMOVED
- PROJECT ACTIVITIES INCLUDE: VEGETATION CLEARING, REMOVAL OF EXISTING 115KV EQUIPMENT, AND INSTALLATION OF ACCESS ROADS, WORK PADS, FOUNDATIONS, STEEL MONOPOLES, AND CONDUCTOR.
- EROSION AND SEDIMENT CONTROLS TO BE INSTALLED ON SITE UNDER THE SUPERVISION OF AN ENVIRONMENTAL INSPECTOR IN ACCORDANCE WITH CT DEEP GUIDELINES AND THE PROJECT SWPCP. EROSION AND SEDIMENT CONTROLS ARE SHOWN IN GENERAL LOCATIONS ON THE PLANS BUT MAY BE MODIFIED BASED ON SITE FIELD CONDITIONS.
- GUARD STRUCTURE WORK SPACES TO BE UTILIZED ON AN AS-NEEDED BASIS FOR WIRE PULLING ACTIVITIES. SCHEDULE AND WORK AREA PROTECTION TO BE PROVIDED BY CONTRACTOR IN ACCORDANCE WITH MUTCD GUIDELINES AND APPROPRIATELY COORDINATED WITH MUNICIPALITY AND CTDOT.
- CONCRETE WASHOUTS ARE SHOWN IN GENERAL LOCATIONS AND ARE TO BE UTILIZED IN ACCORDANCE WITH CT DEEP EROSION AND SEDIMENT CONTROL REQUIREMENTS.
- TEMPORARY ACCESS AND PADS WITH NO MATTING ARE ON EXISTING PAVEMENT OR GRAVEL. ACCESS ROUTES THROUGH PAVEMENT AND GRAVEL AREAS ARE SUBJECT TO CHANGE BASED ON ACCESS AGREEMENTS WITH LANDOWNER.
