RE: **DOCKET NO. 512** - Homeland Towers, LLC and New Cingular Wireless PCS, LLC d/b/a AT&T Certificate of Environmental Compatibility and Public Need for the construction, maintenance, and operation of a telecommunications facility located at 60 Vale Road, Brookfield, Connecticut.

Dear Attorney Chiocchio:

The Connecticut Siting Council (Council) requests your responses to the enclosed questions no later than May 2, 2023.

Please submit an original and 15 copies to the Council's office and an electronic copy to siting.council@ct.gov. In accordance with the State Solid Waste Management Plan and in accordance with Section 16-50j-12 of the Regulations of Connecticut State Agencies, the Council requests all filings be submitted on recyclable paper, primarily regular weight white office paper. Please avoid using heavy stock paper, colored paper, and metal or plastic binders and separators. Fewer copies of bulk material may be provided as appropriate.

Please be advised that the original and 15 copies are required to be submitted to the Council's office on or before the May 2, 2023 deadline.

Copies of your responses are required to be provided to all parties and intervenors listed in the service list, which can be found on the Council's website under the "Pending Matters" link.

Any request for an extension of time to submit responses to interrogatories shall be submitted to the Council in writing pursuant to §16-50j-22a of the Regulations of Connecticut State Agencies.

Sincerely,

Melanie Bachman
Executive Director

Docket No. 512
Homeland Towers, LLC
60 Vale Road, Brookfield, CT

Development & Management Plan
Interrogatories
April 18, 2023

1. The geotechnical report in the Development and Management Plan (D&M Plan) indicates that weathered/decomposed rock was encountered at approximately 37.5 feet deep. Would blasting be required? If yes, submit a blasting plan that includes work procedures and municipal notifications.
2. Referencing Exhibit A of the D&M Plan, would the 20-kW Cummins diesel generator have a double-walled fuel tank and/or other features to provide containment in the event of spill/leakage of generator fluids? Where would it be installed?
3. Referencing Sheet SP-2, post-construction stormwater velocity would not exceed existing stormwater velocity of 3.0 feet/second. Identify any specific stormwater management-related features in the design to achieve no net increase.
4. Referencing Sheet N-2 (Environmental Notes), Section 3 – Petroleum Materials Storage and Spill Prevention Plan of the D&M Plan, provide detailed contact information for the spill response contractor.
5. Referencing Sheet SP-2, what are the approximate heights of the proposed utility poles above grade?
6. Referencing page 1 of the D&M Plan, it states, “Construction activities shall be 7:30 AM to 7:30 PM Monday through Saturday and 10:00 AM through 7:30 PM Sundays and Holidays.” Would Sundays and/or holidays be part of the regular/typical work schedule or only as necessary? Explain.
