Re: MCM Holdings, LLC
Proposed Wireless Telecommunications Tower Facility
3 Marchant Road (Camp Hoyt), Redding, CT
Docket 517

Dear Madam/Sir:

I, JoAnn Villamizar, own and reside at 235 Simpaug Turnpike in Redding, which property abuts the parcel on which the proposed cell tower is planned to be constructed by MCM Holdings. Accordingly, I qualify as an intervenor under the statute and, thus, hereby request status as such. I object to the construction of the cell tower and additional required components on this location based upon the fact that it is a scout camp site where children are participating in events continuously including overnight camping. The children cannot be watched every minute that they are on the site and the construction of the cell tower with fencing, etc. presents a situation for children to be children which may result in harm to them. This situation falls squarely within the Attractive Nuisance Doctrine as an attractive nuisance is essentially anything that can attract teens and children to a property that threatens them with harm. I am sure that there are many other more appropriate sites that could be chosen where children's safety will not be such as issue. It would seem that the location of the cell tower on a scout camp is not the best location. It should be noted that even the representative of the corporation owning the Camp Hoyt stated that he did not believe that construction of the cell tower on the site was safe at the Redding Town Meeting where a presentation was given by MCM Holding to the neighboring land owners. I hopethat the Siting Council can ascertain his name as I am not aware of it if further investigation is deemed necessary. Accordingly, for the foregoing reasons, it is respectfully requested that the application for construction of the cell tower on the proposed parcel be denied.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "JoAnn Villamizar".
