1. Manner in which intervenor's participation is in the interests of justice and will not impair the orderly conduct of the proceedings:

I did the balloon float in 2013 raising the interest level in that earlier proposal, stimulating the Town of Sherman to appropriate \$15k for cellular communications study. As a former Board member of the Naromi Land Trust, I facilitated discussions between AT&T and the land trust regarding alternate sites and later with Homeland Towers. I have lived 700' from 16 Coote Hill Rd since 2009 and in the area since 1962. This particular project is harmful to the local community and the local environment of the Coburn District of Sherman.

2. Manner and extent to which intervenor proposes to participate:

I have raised funds this past month to reemploy the radio frequency engineer who did 2 studies for Sherman in 2012 and 2013, copies of which I have submitted to the CSC and those on the Service List. for the purpose of attempting to collaborate with Homeland Towers and AT&T to either modify the current proposal or find a more suitable site. Travel restrictions imposed during the pandemic kept me out of town for most of the past year.

3. Statutory authority for intervenor request:

I qualify as an intervenor as a "person whose participation is in the interest of justice and will not impair the orderly conduct of the proceedings."

4. Nature of evidence intervenor intends to present:

I have already submitted copies of two studies done in 2012 and 2013. I also intend to critique the proposal that has been presented regarding information and representations that are materially untrue. My goal would be to have Homeland Towers and AT&T permit their radio frequency consultants, C Squared, to speak with Allegiant Wireless, the RF engineer we have retained.

Copies of this request are required to be electronically mailed to all participants on the service list of a **pending** matter, which can be found on our website in Pending Matters under the appropriate docket or petition number.
