Dear Mr. Stein,

On behalf of the Wyndham Land Trust, Inc. Board of Directors, I am writing in opposition to the proposed power plant on Lake Road in Killingly. The mission of the Land Trust is to do everything it can to advance the rural character and the environmental health of all communities in the county. We believe that that if the plan were to become operational, the pollution that it would emit would have a decidedly negative impact on the health of individuals, particularly children and the elderly as well as that of plants and wildlife with the impact area.

Not only as an abutter but also as an advocate for the open spaces of "the last green valley" we strongly urge you not to proceed with this project in the proposed location.

Respectfully submitted,

Ben Williams
President
