Re: Docket No. 190A – Meriden Gas Turbines, LLC

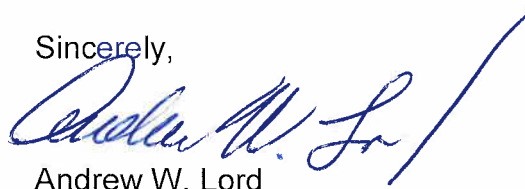

Dear Ms. Roberts:

I write on behalf of NRG Energy, Inc. ("NRG"), to provide you with an original and 15 copies of NRG's responses to the interrogatories addressed to NRG by the Connecticut Siting Council in connection with the above-referenced docket.

Please contact me with any questions or requests for additional information. Also, Julie Friedberg, Esq., General Counsel – Northeast Region, is the contact person at NRG. Her contact information is:

Julie L. Friedberg, Esq.  
General Counsel – Northeast Region  
NRG Energy, Inc.  
211 Carnegie Center  
Princeton, NJ 08540  
Telephone: (609) 524-5232  
E-mail: Julie.friedberg@nrgenergy.com

Sincerely,

Andrew W. Lord

**STATE OF CONNECTICUT  
CONNECTICUT SITING COUNCIL**

IN RE:

REOPENING OF FINAL DECISIONS  
PURSUANT TO C.G.S. §4-181A(B) FOR  
JURISDICTIONAL NATURAL GAS FIRED  
ELECTRIC GENERATING FACILITIES UNDER  
C.G.S. § 16-50I(A)(3) AND C.G.S. §16-50K(A)  
LIMITED TO COUNCIL CONSIDERATION OF  
CHANGED CONDITIONS AND THE  
ATTACHMENT OF CONDITIONS TO THE  
CERTIFICATES AND DECLARATORY  
RULINGS CONSISTENT WITH THE  
FINDINGS AND RECOMMENDATIONS IN  
THE FINAL REPORT ISSUED BY THE  
KLEEN ENERGY PLANT INVESTIGATION  
REVIEW PANEL (NEVAS COMMISSION)  
AND THE FINDINGS AND  
RECOMMENDATIONS IN THE EXECUTIVE  
REPORT ISSUED BY THE THOMAS  
COMMISSION

DOCKET NO. NT-2010

MERIDEN GAS TURBINES, LLC CERTIFICATE  
OF ENVIRONMENTAL COMPATIBILITY AND  
PUBLIC NEED FOR THE CONSTRUCTION,  
MAINTENANCE, AND OPERATION OF A 530 MW  
COMBINED CYCLE GENERATING PLANT IN  
MERIDEN, CONNECTICUT. REOPENING OF THIS  
DOCKET PURSUANT TO CONNECTICUT GENERAL  
STATUTES § 4-181a(b) LIMITED TO COUNSEL  
CONSIDERATION OF CHANGED CONDITIONS  
AND OF THE ATTACHMENT OF CONDITIONS TO  
THE CERTIFICATE CONSISTENT WITH THE  
FINDINGS AND RECOMMENDATIONS IN THE  
FINAL REPORT ISSUED BY THE KLEEN ENERGY  
PLANT INVESTIGATION REVIEW PANEL (NEVAS  
COMMISSIONER) AND THE FINDINGS AND  
RECOMMENDATIONS IN THE EXECUTIVE  
REPORT ISSUED BY THE THOMAS COMMISSION

DOCKET NO. 190A

November 15, 2010

**MERIDEN GAS TURBINES, LLC RESPONSES TO  
NT-2010 INTERROGATORIES  
GENERATORS**

1. If the facility has already been constructed, what versions of the NFPA standards were utilized?

**The facility has not yet been constructed.**

2. If the facility has yet to be constructed, what versions of the NFPA standards will be utilized?

**The facility will be designed and constructed utilizing the current version of any NFPA standards that are applicable during detailed engineering stage of the project. Any standards mandated by local, state, or federal agencies will also be adhered to where applicable.**

3. How would recommendation #6, "Recommendation as to adoption of codes" in the Thomas Commission Executive Report affect the facility?

**If the recommendations of the Thomas Commission Executive Report are accepted by the Department of Public Safety, the facility will be designed and constructed utilizing the current version of the standards that are applicable. Any other standards mandated by local, state, or federal agencies will also be adhered to where applicable.**

4. How would the following codes affect construction or modification of the facility:

- a. NFPA 37 (2010 edition)
  - b. NFPA 54 (2009 edition)
  - c. NFPA 54 Temporary Interim Amendment 09-3 (August 25, 2010)
  - d. NFPA 850 (2010 edition)
  - e. NFPA 853 (2010 edition)
  - f. ASME B31;
  - g. ASMEB31.1 Appendices IV and V.
- a. **NFPA 37 (2010 edition) – NFPA 37 is the Standard for the Installation and Use of Stationary Combustion Engines and Gas Turbines and would be followed during construction or modification of the facility unless the manufacturer of the combustion turbines mandates an alternative or more stringent standard.**
  - b. **NFPA 54 (2009 edition) – NFPA 54 currently exempts "fuel gas piping in electric utility plants." Most of NFPA 54 pertains to much smaller devices and piping than is typically found in power generation facilities and as such much of this Standard is inappropriate for application to construction or modification of the facility.**

- c. **NFPA 54 Temporary Interim Amendment 09-3 (August 25, 2010) – This amendment details the requirements for purging of gas systems. The purging requirements recommended are minimum standards and more stringent standards, in fact, would follow as a matter of course during construction or modification of this facility.**
- d. **NFPA 850 (2010 edition) – NFPA 850 is currently considered “Recommended Practice” and is utilized as a guideline in the operation and maintenance of power generation facilities. If the requirements of this Standard were deemed mandatory, Meriden Gas Turbines LLC would adhere to the applicable sections if construction or modification of the facility was undertaken.**
- e. **NFPA 853 (2010 edition) – NFPA 853 is the Standard for the Installation of Stationary Fuel Cell Power Systems and is not applicable to construction or modification of this facility.**
- f. **ASME B31 – ASME Codes B31.1 Power Piping, B31.3 Process Piping and B31.8 Gas Transmission and Distribution Systems will be utilized where applicable for the construction or modification of the facility.**
- g. **ASME B31.1 Appendices IV and V – Appendices IV and V are currently non-mandatory appendices. However corrosion protection will be provided, with any construction or modification of existing gas piping per Appendix IV or using an alternate method as allowed for in IV-2.3. Applicable Sections of Appendix V in relation to gas pipeline operations and maintenance are being developed for post construction operation.**

5. What is useful lifespan of the natural gas piping/pipelines located within and to the facility?

**The useful lifetime of the piping to be installed is greater than 40 years.**

6. Would the natural gas piping/pipelines within and to the facility need to be replaced during the life of the facility?

**It is not anticipated that the piping will be replaced during the lifetime of the facility.**

7. Do you foresee any circumstances that would require replacement of a section of natural gas piping/pipeline within and to the facility?

**With proper maintenance and corrosion protection it is not anticipated that any of the gas piping will need replacement.**

8. If so, would a new section of natural gas piping/pipeline within and to the facility be installed and require cleaning?

**If replacement of a section of pipe becomes necessary, it would require cleaning prior to being put into service.**

9. What type of material is the natural gas piping/pipeline within and to the facility composed of?

**The natural gas pipeline within and to the facility will be carbon steel up to the final filtration equipment before the combustion turbines. The piping from the filters to the turbines will be stainless steel.**

10. How many linear feet of natural gas piping/pipeline are located within and to the facility?

**There will be approximately 6000 feet of 12" piping installed from the existing pipeline to the facility. Within the facility there will be approximately 1000 feet of additional piping from the gas metering station (the interconnection point) to the combustion turbines.**

11. What is operating pressure (psig) of the natural gas piping/pipeline within and to the facility?

**The Maximum Allowable Operating Pressure of the gas pipeline to the facility is 1000 psig. Within the facility the pressure will be reduced to approximately 450 psig.**

12. What is the nominal pipe size in inches within and to the facility?

**The pipeline to the facility will be 12" and will be reduced to 6" within the facility.**

13. What is the length in feet of piping/pipeline that requires/required purging within and to the facility?

**All of the new gas piping or approximately 7000 feet will require cleaning.**
