**RE: Tree Inventory
Site: MCF Bolton
Carpenter Road
Bolton, CT 06043
CHA # 14957-1002-1601**

Dear Mr. McFadden:

A tree inventory was completed at the subject site on March 24, 2006 to determine the size and quantity of existing trees that would need to be removed for installation of the proposed facility and access road. A majority of the property is wooded; therefore, considerable tree removal will be required. Installation of the 100' x 100' lease area and 12' wide access road will require removal of the trees summarized in the following table.

Tree Diameter	Number of Trees to be Removed
6" - 8"	96
10" - 12"	17
14" or Larger	14

A tree buffer will remain on all four sides of the facility as well as along both sides of the access road to screen abutting properties from the proposed facility.

Very truly yours, -

CLOUGH HARBOUR & ASSOCIATES LLP
