RE: Docket #346 Implementation of Section 8 of Public Act 07-242, An Act Concerning Electricity and Energy Efficiency

Dear Judge Caruso:

Joel Gordes (DBA Environmental Energy Solutions or EES) is filing the following materials in connection with this docket:

- 1) A letter by Michael Assante, Vice President and Chief Security Officer of the North American Electric Reliability Corporation (NERC) in which he references NERC Reliability Standard CIP-002 as well as the response to an earlier survey wherein a significant percentage of expected respondents supposed to have cyber critical assets (CCA) did not respond. He also notes that:

We expect to see a shift in the current self-certification survey results as entities respond to the next iteration covering the period January 1 - June 30, 2009 and when the Regional Entities begin to conduct audits in July.

- 2) An article that appear in the Wall Street Journal pertaining to the penetration of the US electric grid by unknown intruders who left behind software programs that could compromise security.

Thank you for your consideration in this matter.

Sincerely,

Joel N. Gordes, President
Environmental Energy Solutions
