Subject: Proposed Construction of Telecommunications Facility

To Whom it May Concern;

Thompson Hills West is a private townhouse community located on Westside Drive in the town of Thompson, Connecticut and is comprised of 42 home/unit owners. Several years ago we were contacted by Cellco Partnership d/b/a/ Verizon Wireless and asked if we would be interested in allowing a telecommunications facility to be installed on our property. At that time our association said yes and the process began. For reasons unknown, the plans for the installation of said telecommunications facility ended and no facility was built. When the process began again a few years later, our association was asked if they wanted to participate in the process again as our location geographically makes us an ideal site for the telecommunications facility and at that time our board of trustee's said no, forcing Cellco Partnership d/b/a Verizon Wireless to begin to look for alternate sites.

On February 15th, 2008 all home/unit owners of Thompson Hills West were notified by the law firm of Robinson & Cole, which represents Cellco Partnership d/b/a Verizon Wireless that an application was going to be presented to the Connecticut Siting Council and that they had 2 proposed cell site locations in our neighborhood for the construction of the telecommunications facility. The first proposed cell site location (Site A) is located at 347 Riverside Drive and the second proposed cell site location (Site B) is located at 407 Riverside Drive, both in the town of Thompson, Connecticut.

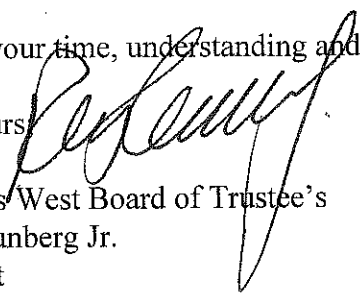

The Board of Trustee's writes to you today, in accordance with Connecticut General Statutes 16-50 et seq in that we wish to be considered as an alternate site, thus becoming proposed site location (Site C) in the application process and wish to herein be called an intervener in the application process that is presently ongoing. We at Thompson Hills West feel we are the preferred cell site location due to our property being much easier for construction of a telecommunications facility as well as sitting higher geographically than either of the 2 other proposed sites (Site A & B).

We wish to be kept abreast of the application process including but not limited to the dates, days and times of any and all public hearings that the Siting Council schedules in our area as it pertains to this specific application by Cellco d/b/a Verizon Wireless.

We hope any and all consideration that may be due us be granted by the Connecticut Siting Council.

Thank you for your time, understanding and assistance in this matter.

Very Truly Yours

Thompson Hills West Board of Trustee's
Richard W. Thunberg Jr.
Board President
