PETITION

CONNECTICUT
SITING COUNCIL

We the undersigned residents and taxpayers of the Town of Canaan, Falls Village formally notify the Connecticut Siting Council by and through our petition and signatures below that the Federal Communications Commission has failed to set safety standards for the Extremely Low Frequency Emissions from Cell Towers that are known to cause damage to DNA. Nations around the world are setting and have set safety standards on these scientifically recognized biological hazards (see www.bioinitiative.org). We therefore petition the Connecticut Siting Council to deny the Verizon- Cellco Application under Docket # 360 and all cell towers and antenna applications in the State of Connecticut until the FCC adopts such standards and when and until all cell towers in the state comply with such standards.
