RE: **DOCKET NO. 364** - The Connecticut Light and Power Company application for a Certificate of Environmental Compatibility and Public Need for the construction, maintenance, and operation of a new bulk-power 115-kV to 23-kV substation located at 325 Waterford Parkway North, Waterford, Connecticut.

Dear Attorneys Fitzgerald, Golden, and Dubuque:

In Figure F-2, Volume I of The Connecticut Light and Power Company's Application for a Certificate of Environmental Compatibility and Public Need for the above-noted substation, a facility rendering (with an aerial view) is included. While Figure F-2 is helpful, in order to provide a more complete depiction of the proposed substation, I respectfully request an additional facility rendering of the substation as viewed from Waterford Parkway North and/or from Oil Mill Road. This would ensure a more complete record and would simulate the view of the substation from the perspective of an individual looking directly at the substation from the street level, rather than from an aerial view looking down on the substation.

I request that an original and 20 copies of this rendering be provided by noon on Friday, September 19, 2008. In addition, please provide this rendering on visual display (i.e. have a larger version of the drawing attached to a display board) at the public hearing for the benefit of those attending.

Thank you for your cooperation.

Yours very truly,

S. Derek Phelps
Executive Director
