Re: Docket No. 366  
Development & Management Plan  
52 Stadley Rough Road, Danbury, Connecticut

Dear Mr. Phelps:

On behalf of Optasite Towers LLC, I am writing to correct a point made on page 3 of my letter of yesterday regarding the foundation and potential for dewatering during construction. I meant to identify that a mat foundation was not used in this case to avoid site disturbance and a pier foundation was designed to allow for construction in and around on-site wetlands without impact thereto. Further, that a temporary stilling basin was added to the D&M plans to address dewatering as may be needed during construction. Thank you.

Respectfully Submitted,

  
Christopher B. Fisher
