RE: DOCKET NO. 373 – New Cingular Wireless PCS, LLC (AT&T)  
St. Matthew's Lutheran Church, 224 Lovely Street, Avon, Connecticut  
Balloon Test on March 31, 2009

Attorney Fisher,

EBI Consulting performed a balloon float at the proposed AT&T facility at St. Matthew's Church on March 31, 2009 from 8 am until 5 pm for purposes of public viewing.

One balloon was flown at the proposed height of 100-feet in the proposed tower location off of the southeast corner of the existing church structure (Location No. 1). At approximately 8 am a 4-foot red weather balloon was floated in Location No. 1; however, due to wind gusts the red weather balloon and three subsequent red balloons were popped in the abutting pine trees. Therefore, at approximately 9 am a 4-foot green weather balloon was floated just north of Location No. 1 in an effort to avoid further breaking of balloons and allow for the balloon to be floated for the remaining 8 hour time period.

The second balloon was flown at the proposed height of 100-feet in the alternate proposed tower location (Location No. 2), approximately 150-feet northeast of Location No. 1 along the existing treeline. The balloon at Location No. 2 was a black 4-foot weather balloon.

Please do not hesitate to contact EBI with any questions.

Sincerely,

Ashley J. Bonavenia
