IN RE:

APPLICATION OF NEW CINGULAR
WIRELESS PCS, LLC (AT&T) FOR A
CERTIFICATE OF ENVIRONMENTAL
COMPATIBILITY AND PUBLIC NEED
FOR THE CONSTRUCTION,
MAINTENANCE AND OPERATION OF
A TELECOMMUNICATIONS TOWER
FACILITY AT 316 PERKINS ROAD IN
THE TOWN OF SOUTHBURY

DOCKET NO. 383

December 23, 2009

**NEW CINGULAR WIRELESS PCS, LLC ("AT&T")
POST HEARING SUPPLEMENTAL SUBMISSION OF
INFORMATION REQUESTED BY THE SITING COUNCIL**

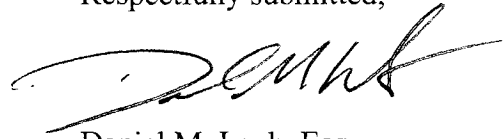

At the November 24th, 2009 hearing on the captioned Docket, additional questions arose regarding the coverage to be provided by the proposed Facility as well as coverage available from locations on the property of the Southbury Training School.

As to the proposed site, AT&T's analysis of the coverage plots for the proposed Facility indicates that AT&T's antennas at 150' in height would provide approximately 0.4 miles more coverage at -82 dBm than they would at 140'.

In addition, attached please find a coverage plot depicting AT&T's coverage from the existing tower at the Southbury Training School. This coverage plot depicts existing coverage in addition to predicted coverage from antennas located at 190' AGL. As described in the testimony of Mr. John Blevins during the hearing on this matter, this coverage plot demonstrates that at 190' the coverage is largely restricted to the Southbury Training School grounds. Minimal coverage along River Road/South Street would be achieved at a height of 190'.

Finally, AT&T has also evaluated additional coordinates corresponding with locations on the Southbury Training School campus suggested by Mr. Robert Woodside during the November 24th public hearing. These locations do not provide sufficient coverage to the north and west on Lower River Road, South Street/River Road and portions of Roxbury which are targeted to be served by the proposed Facility.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'D. Laub', with a long, sweeping underline that extends to the left and then curves back under the name.
