RE: **DOCKET NO. 392** - T-Mobile Northeast, LLC Certificate of Environmental Compatibility and Public Need for the construction, maintenance and operation of a telecommunications facility located at 387 Shore Road, Old Lyme, Connecticut. **Motion to Reopen and Modify.**

---

On May 16, 2024, T-Mobile filed a Motion to Reopen and Modify the Connecticut Siting Council's (Council) September 23, 2010 issuance of a Certificate of Environmental Compatibility and Public Need (Certificate) to T-Mobile for the construction, maintenance and operation of a telecommunications facility at 387 Shore Road, Old Lyme, Connecticut.

Specifically, the request relates to the removal of Condition No. 1 of the Certificate that requires "the wireless antennas be attached to the tower via T-arm mounts." Due to advancements in technology and increased consumer demand, T-Mobile is requesting the use of platform antenna mounts rather than flush antenna mounts on this existing tower to meet capacity and coverage needs, and to promote future tower sharing on this existing tower.

The Request to Reopen and Modify the Certificate will be placed on a future Council meeting agenda.

Parties and intervenors are requested to submit comments or statements of position in writing to the Council with respect to whether the Request to Reopen and Modify the Certificate should be granted or denied and **whether a public hearing should be held on this request** by the close of business on **May 30, 2024**.
