

**STATE OF CONNECTICUT
CONNECTICUT SITING COUNCIL**

RE: APPLICATION BY T-MOBILE
NORTHEAST, LLC FOR A
CERTIFICATE OF ENVIRONMENTAL
COMPATIBILITY AND PUBLIC NEED
FOR A TELECOMMUNICATIONS FACILITY
AT 61-1 BUTTONBALL ROAD IN THE TOWN
OF OLD LYME, CONNECTICUT

DOCKET NO. 393

Date: January 28, 2010

**INTERROGATORY RESPONSES TO CONNECTICUT SITING COUNCIL
FROM APPLICANT T-MOBILE NORTHEAST, LLC**

The Applicant, T-Mobile Northeast, LLC ("T-Mobile"), submits the following responses to the second set of Pre-Hearing Interrogatories propounded by the Connecticut Siting Council in connection with the above-captioned Application.

1. T-Mobile Northeast, LLC's (T-Mobile) response to the Connecticut Siting Council's (Council) interrogatory number eight indicated that T-Mobile's equipment would cost approximately \$23,000. Break down that total into two costs: antennas and radio equipment.
A1 The response to Council's interrogatory number eight was in error. The cost of T-Mobile's equipment is \$45,000, more specifically:
 - BTS – \$30,000**
 - RF components (antennae and cable) - \$15,000**
2. T-Mobile's response to Council interrogatory number 11 indicated that a second antenna ten feet higher would be required for a flush-mounted configuration. Approximately how many antennas would be located on each level if two levels were required for a flush-mounted configuration?
A2 T-Mobile could utilize a flush mounted antenna design at this proposed facility. This antenna layout design would require an additional antenna location 10 feet higher than T-Mobile's initial design height of 97 feet on the proposed facility. With this antenna layout, there would be 6 antennas total

located at this facility - 3 antennas at each mounting height with 1 antenna per sector.

3. Under Exhibit/Tab I of T-Mobile's application to the Council, T-Mobile lists all existing telecommunications towers within four miles of the proposed facility. Indicate which of the facilities T-Mobile is already co-located on and which ones T-Mobile is not on but would not provide adequate coverage to the target area.

A3 The existing telecommunications towers within four miles of the proposed facility are as follows:

- a) 2 Ferry Place, Old Saybrook: T-Mobile is currently not on this site. It is located too far to the northwest of the coverage objective for the CTNL801 search area to provide reliable coverage to this area.
- b) 132 Whippoorwill Road, Old Lyme: T-Mobile is currently not on this site. It is located too far to the north of the coverage objective for the CTNL801 search area to provide reliable coverage to this area.
- c) 62-1 Boggy Hill Road, Old Lyme: T-Mobile is currently located on this facility at 172 feet AGL (T-Mobile Site ID# CT11636A).
- d) 38 Hatchedts Hill Road, Old Lyme: T-Mobile is currently located on this facility at 185 feet AGL (T-Mobile Site ID# CT11038C).
- e) 30 Short Hills Road, Old Lyme: T-Mobile is currently not on this site. It is located too far to the north of the coverage objective for the CTNL801 search area to provide reliable coverage to this area.
- f) 125 Mile Creek Road, Old Lyme: T-Mobile is currently located on this facility at 168 feet AGL (T-Mobile Site ID# CTNL802A).
- g) Rte.1 (between River Street and Ford Road), Old Saybrook: T-Mobile is currently located on this facility (44 Ford Drive: Amtrak Maintenance Yard) at 150 feet AGL (T-Mobile Site ID# CT11327A).
- h) 430 Middlesex Turnpike, Old Saybrook: T-Mobile is currently not on this site. It is located too far to the west of the coverage objective for the CTNL801 search area to provide reliable coverage to this area.

- i) 40-3 River Street, Old Saybrook: T-Mobile is currently not on this site. It is located too far to the west of the coverage objective for the CTNL801 search area to provide reliable coverage to this area.

Respectfully submitted,

T-MOBILE NORTHEAST, LLC
