APPLICATION OF NEW CINGULAR
WIRELESS PCS, LLC (AT&T) FOR
CERTIFICATES OF ENVIRONMENTAL
COMPATIBILITY AND PUBLIC NEED FOR
THE CONSTRUCTION, MAINTENANCE
AND OPERATION OF TWO
TELECOMMUNICATIONS TOWER
FACILITIES LOCATED OFF OF
HAYWARDVILLE ROAD AND
ED WILLIAMS ROAD
BOTH IN THE TOWN OF
EAST HADDAM, CONNECTICUT

DOCKET NO. 395

FEBRUARY 12, 2010

NEW CINGULAR WIRELESS
RESPONSE TO SITING COUNCIL INTERROGATORIES SET I

- Q1. How many of the return receipts for the notices sent to abutting landowners did AT&T receive? If some return receipts were not received, did AT&T make other attempts to notify the landowners? If yes, explain.
- A1. All return receipts except one were received for the notices sent to abutting landowners. The Nature Conservancy address on file with the Town of East Haddam noted the office was in Middletown, but the Post Office returned the notice with an indication that the proper address is New Haven. Follow up research confirmed the correct address is in fact New Haven. Included as Attachment 1 please find copies the return receipts received as well as the follow up correspondence sent to the Nature Conservancy on December 7, 2009.
- Q2. Provide a color aerial photograph of the vicinity of the proposed Devil's Hopyard North site.
- A2. A color aerial photograph of the vicinity of the proposed Devil's Hopyard North is included in Attachment 2.
- Q3. What would be the quantities of cut and fill required at the Devil's Hopyard North Site? At the South Site?
- A3. The Hopyard North site will require 454 CY of cutting and 202 CY of fill. The Hopyard South Site requires 875 CY of cutting and no fill. Included as Attachment 3 please find a memorandum from CHA regarding these estimates.
- Q4. Would any blasting be required at either of the two proposed sites?

- A4. No blasting is anticipated. If ledge is encountered mechanical methods will be used as per the CHA memorandum included as Attachment 3
- Q5. Do the construction cost estimates provided for either site include the costs of antennas and related equipment? If not, provide the costs of this equipment for both sites.
- A5. While antenna and equipment costs vary, it is estimated that the costs of antennas, lines and equipment at this site will be between \$250,000 to \$300,000.
- Q6. Has the Town of East Haddam indicated any interest in placing antennas on the two proposed towers? If the town were to use either tower, could it do so at no cost?
- A6. AT&T has indicated to the Town of East Haddam that space on both towers is available at no cost to the Town for municipal antennas if needed. AT&T understands that the need for such space is being evaluated by the Town.
- Q7. What are AT&T's licensed frequencies in this part of the state?
- A7. East Haddam is located in Middlesex County which has been assigned to the Hartford MSA by the FCC. The FCC has licensed 850 Mhz "b", 1900 Mhz A3, D, E, and C1 in the Hartford MSA to AT&T.
- Q8. What is AT&T's design signal strength for in-vehicle coverage? For in-building coverage?
- A8. AT&T designs for -82 dBm in-vehicle coverage and -74 dBm in-building coverage.
- Q9. Provide a propagation map, at the same scale as those provided in the application, that shows the coverage possible from the Devil's Hopyard North site by itself. From the Devil's Hopyard South site by itself.
- A9. The requested propagation maps are included as Attachment 4. Please note that all propagation maps attached hereto were generated on February 9, 2010.
- Q10. What is AT&T's existing signal strength in the area that would be covered by the two proposed facilities?
- A10. The existing signal level in this area is between -82 and -105 dBm.
- Q11. Did AT&T do any drive tests to determine signal strength in the target coverage area? If so, provide the result of these tests.
- A11. Drive test data is included in Attachment 5.
- Q12. What would be the total area, in square miles, that AT&T could cover from the Devil's Hopyard North Site? From the South Site? From the two sites combined?

A12. At -82 dBM the area covered by the Hopyard North site (S2292) will be 7.3 square miles and from the Hopyard South site (S2293) the area covered will be 5.0 square miles. Combined the two sites will cover approximately 12.3 square miles.

Q13. List the main roads AT&T is seeking to cover from these sites and identify the lengths of the existing coverage gaps on each road.

A13. The main roads along which AT&T is experiencing gaps in reliable coverage and proposing to cover are Route 434 and Haywardville/Millington Road. Neither of these roads has reliable service for some distance. The proposed facilities will provide approximately 4.8 miles of coverage along Route 434 and approximately 1.8 miles of reliable coverage along Haywardville/Millington Road.

Q14. Describe the criteria and assumptions used in determining coverage gaps and resultant coverage on these roads.

A14. If the signal reduces below the -82 dBM, AT&T's standard for in vehicle coverage it is considered a coverage gap. The proposed coverage will be greater than -82 dBM

Q15. What distances on these roads could AT&T cover from the proposed sites?

A15. The proposed facilities will provide approximately 4.8 miles of coverage along Route 434 and approximately 1.8 miles of reliable coverage along Haywardville/Millington Road.

Q16. Identify, by address, sites with which AT&T's antennas at the proposed sites would hand off signals - including type and height of structure and height of AT&T's antennas on each structure and distance and direction from the proposed towers.

A16. The surrounding AT&T sites for both sites are as follows:
For Site 2292:

Site Number	Address	Height of AT&T Antennas	Tower type	Tower Height	Approximate Distance and Direction
2195	160 Witch Meadow Road, Salem	185'	Monopole	196'	3.0 miles ENE
2053	126 Parker Road, E. Haddam	188'	Guyed lattice tower	300'	2.9 miles SW
2234	East Haddam Road, Salem	127'	Monopole	190'	4.4 miles ESE
5540	135 Honey Hill Road, E Haddam	120'	Monopole	150'	2.2 miles SSE

For Site 2293:

Site Number	Address	Height of AT&T Antennas	Tower type	Tower Height	Approximate Distance and Direction
2195	160 Witch Meadow Road, Salem	185'	Monopole	196'	2.86 miles NE
2053	126 Parker Road, East Haddam	188'	Guyed lattice tower	300'	3.287 miles WSW
2234	East Haddam Road Salem	127'	Monopole	190'	3.09 miles ESE
5540	135 Honey Hill Road, East Haddam	120'	Monopole	150'	2.9 miles SW

Q17. What is the minimum height at which AT&T could achieve its coverage objectives from the Devil's Hopyard North Site? The South Site?

A17. The Hopyard North site (S2292) requires a minimum height of 170' and the Hopyard South site (S2293) requires a minimum height of 160'.

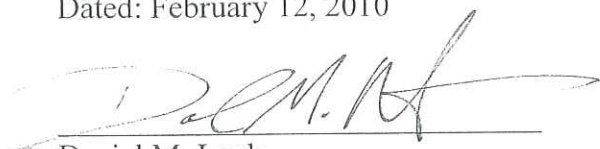

Q18. Provide propagation maps showing what AT&T's coverage would be from the two respective sites if its antennas were mounted 10 feet below the minimum required heights.

A18. Please see coverage plots included in Attachment 6.

CERTIFICATE OF SERVICE

I hereby certify that on this day, an original and twenty (20) copies of the foregoing and attached was served on the Connecticut Siting Council by overnight delivery with copy also sent via electronic mail.

Dated: February 12, 2010

Re: AT&T
Proposed Wireless Telecommunications Tower Facility
Property of Andrew J. Tarpill, Ed Williams Road, East Haddam, Connecticut

Dear Sir or Madam:

Our office previously attempted to contact you on behalf of our clients New Cingular Wireless PCS, LLC ("AT&T") with respect to the above referenced matter. A certified return receipt letter dated November 17, 2009 was returned to our office undelivered. We sent that letter to provide details regarding the submission of an application to the Connecticut Siting Council for approval of a wireless communications facility. The address used to send that letter corresponds with the records on file with the Town of East Haddam. We are sending this current letter along with the original November 17th letter to the address listed on the Nature Conservancy in Connecticut website in hopes that using this address is successful in reaching you.

Our correspondence is in accordance with State law requiring applicants to send notice of their intent to submit an application to record owners of property that abut a parcel on which the proposed facility may be located. The application was filed with the State on December 3, 2009.

The property being considered for the proposed wireless telecommunications facility (the "Facility") belongs to Andrew J. Tarpill and is located off of Ed Williams Road in the Town of East Haddam and is identified on municipal tax maps as M43-L012. The proposed Facility will be located in the southern portion of the parcel and will consist of a 160-foot self-supporting monopole tower, antennas, access drive and a 75' x 75' fenced equipment compound designed to accommodate unmanned equipment either in single-story equipment buildings or on concrete pads.

Vehicular access to the site will extend from Ed Williams Road over a 1,498' gravel access drive the two sections of which will follow an existing dirt path. Utility connections would extend underground from Ed Williams Road to the equipment compound.

The location, height and other features of the proposed Facility are subject to review and potential change by the Connecticut Siting Council under the provisions of Connecticut General Statutes §16-50g et seq.

CUDDY &
FEDER^{LLP}

An electronic version of the complete application is available for viewing on the Connecticut Siting Council's website available at www.ct.gov/csc. If you have any questions concerning this application, please do not hesitate to contact the Connecticut Siting Council or the undersigned.

Very Truly Yours,

A handwritten signature in black ink, appearing to read "DML", with a long horizontal flourish extending to the right.

Re: AT&T
Proposed Wireless Telecommunications Tower Facility
Property of Andrew J. Tarpill, Ed Williams Road, East Haddam, Connecticut

Dear Sir or Madam:

We are writing to you on behalf of our client AT&T with respect to the above referenced matter and our client's intent to file an application with the State of Connecticut Siting Council for approval of a proposed wireless communications tower facility (the "Facility") within the Town of East Haddam. State law requires that owners of record of property that abuts a parcel on which a Facility is proposed be sent notice of an applicant's intent to file an application.

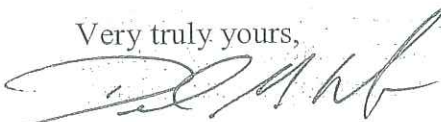

The property being considered for the proposed wireless telecommunications facility (the "Facility") belongs to Andrew J. Tarpill and is located off of Ed Williams Road and identified on East Haddam Tax Maps as M43-L012. The proposed Facility will be located in the southern portion of the parcel and will consist of a 160-foot self-supporting monopole tower, antennas, access drive and a 75' x 75' fenced equipment compound designed to accommodate unmanned equipment either in single-story equipment buildings or on concrete pads.

Vehicular access to the site will extend from Ed Williams Road over a 1,498' gravel access drive the two sections of which will follow an existing dirt path. Utility connections would extend underground from Ed Williams Road to the equipment compound.

The location, height and other features of the proposed Facility are subject to review and potential change by the Connecticut Siting Council under the provisions of Connecticut General Statutes §16-50g et seq.

If you have any questions concerning this application, please do not hesitate to contact the Connecticut Siting Council or the undersigned after November 23, 2009, the date which the application is expected to be on file.

Very truly yours,

Daniel M. Laub

Dear Mr. Laub:

The following are CHA's responses to the interrogatories for the telecommunications sites located in East Haddam, CT:

Q3. What would be the quantities of cut and fill required at the Devil's Hopyard North Site? At the South Site?

The North site will require 454 CY of cutting and 202 CY of fill. The cutting is required to skim the access road for installation of the gravel and to level the Southwest corner of the compound. The fill is required to level the Northeast corner of the compound.

The South site will require 875 CY of cutting and no fill. The cutting is required to skim the access road and compound area for installation of the gravel surfaces.

Q4. Would any blasting be required at either of the two proposed sites?

The presence of ledge will be determined upon completion of a geotech for both sites. If ledge is encountered, chipping is preferred to blasting at both locations.

If you have any questions or need additional information, please do not hesitate to contact me at (860) 257-4557.

Very Truly Yours,

A handwritten signature in dark ink that reads "Paul Lusitani". The signature is fluid and cursive, written in a professional style.
