Re: **Cellco Partnership d/b/a Verizon Wireless – East Woodstock Cell Site**

Dear Mr. Dowd:

Sandy Carter at Verizon Wireless asked me to respond to your January 18, 2010 letter, regarding your property in East Woodstock. As you know, Verizon Wireless currently has an application pending before the Connecticut Siting Council for a tower site at 445 Prospect Street in East Woodstock.

Verizon Wireless RF Engineers have reviewed existing coverage and topographic maps and determined that a tower site on your property would not satisfy the company's coverage objectives in the East Woodstock search area. We will keep your information on file and if, in the future, an additional search ring in East Woodstock is established we will be sure to contact you.

Thank you very much for your letter and interest in working with Verizon Wireless.

Sincerely,

Kenneth C. Baldwin
