RE: Proposed Cellular Tower (166 Pawcatuck Avenue, Stonington, CT)

Ladies and Gentlemen:

Please be advised that the Town of Stonington Water Pollution Control Authority operates a sanitary sewer pumping station located within Pawcatuck Avenue opposite # 166.

The pumping station utilizes spread spectrum radio operating at approximately 900 MHz to communicate with the Authority's Supervisory Control and Data Acquisition (SCADA) system. Continuous, uninterrupted communication is essential to the safe operation of the pumping station and to public health in the area it serves. Accordingly, the Stonington Water Pollution Control Authority requests that appropriate precautions be taken to avoid any disruption or reduction in the quality of communication. Further, the Authority requests that any license to operate at the subject location include a condition that any disruption in communications to and from the Authority's pumping station be corrected by the applicant at the applicant's expense and to the satisfaction of the Stonington Water Pollution Control Authority.

Thank you for your consideration in this matter. Please feel free to contact me at the letterhead address.

Sincerely,

Harold W. Storrs
Director
