Re: **Docket No. 410 – Application of Cellco Partnership d/b/a Verizon Wireless For A Certificate Of Environmental Compatibility And Public Need For The Construction, Maintenance And Operation Of A Wireless Telecommunications Facility At 234 Melba Road, Bayview (Milford), Connecticut**

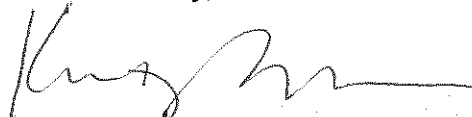

Dear Ms. Roberts:

I wanted to make you and the Council aware that earlier this week, my client was contacted by the emergency service communications consultant working with the City of Milford about the possibility of sharing the proposed tower site at 234 Melba Road in Milford. At this point the City has not identified any specific antenna type or installation plans but has simply mentioned that they are interested in installing antennas on the tower if it is approved.

If the Council approves this application, I would propose to address the City's emergency service communications needs as a part of the Development and Management Plan.

Please feel free to contact me if you have any questions.

Sincerely,

Kenneth C. Baldwin
