

Interrogatories for Cellco - Continuation of Siting Council meeting on May 9th

1. In item # 3 of my previous interrogatories I questioned your statement “generally speaking carriers require access to the site for maintenance” “That’s once a month per carrier” I questioned that number since there are Verizon trucks going to that site far more than once a month and asked if you could get the numbers from Verizon for all vehicles going to the site. Do you have these numbers?

2. In number 15 of my previous interrogatories I asked about your statement that “lessee desires to obtain an option to lease a portion of said property being described as a 35’ by 50’ parcel containing approximately square 1,750 feet”
What is the purpose of obtaining this lease?

3. You have mentioned in your application on page 11, number 2 Tower Sharing “The applicant will design the approved facility tower and compound to be shared by AT&T, T-Mobile and the Greenwich Police Department, all of whom are committed to share the proposed facility” On page 12 you go on to state that “ The Greenwich Police Department will install a single dish antenna and two 10-foot whip antennas extending of the top of the tower”
At the March 29th hearing Captain Kordick of the Greenwich Police Department said "We don't have any plans immediately to put equipment on this tower location" "we've requested that planning and zoning put this language in all new tower applications more to reserve a space on these towers in the eventuality that when we build the new system in a couple of years we have places available to go"
Isn't your application incorrect when you say the police department is committed to share the proposed facility?
