

**Docket No. 424 – Development and Management Plan Inspection**

The Connecticut Light and Power Company Certificate of Environmental Compatibility and Public Need for the Connecticut portion of the Interstate Reliability Project.

**IRP Overhead ROW**

**Final Inspection:**

**Date:** December 10, 2015

**Inspector:** Matt Stephan, E.I.T.

**Rain Event:** None

**Locations Inspected** (by Town, Map Sheet, and Structure Number/Site – reference Feb., 2014 D&M Plans):

Putnam, CT: MS 54-63 (Str. 273-318)  
Thompson, CT MS 63-66 (Str. 319-337)

---

**Observation:** (by Map Sheet and Structure Number / Site)

**MS60-61, Str 302-310: Final Site Inspection.** (Site not yet permanently stabilized) (Photo 1)

**MS61-62, Str 311-315: Final Site Inspection.** (Site not yet permanently stabilized) (Photo 2)

**MS64, Str 322-324: Final Site Inspection.** (Site not yet permanently stabilized)

**MS64-66, Str 325-337: Final Site Inspection.** (Site not yet permanently stabilized)

<b>Areas of Inspection</b>		<b>Observation:</b>	<b>Recommended Action:</b>	<b>Corrected Action:</b>
Access Roads and Adjacent Roadways	Final (12/10)	All observed access roads and ROW's appear to be in accordance with the BMP Manual.	Continue to follow this procedure.	NA
		All sections where access road has been removed appear to be in accordance with the BMP Manual.	Continue to follow this procedure.	NA
Vegetative Clearing Limits (Including trees to save or danger trees noted.	Final (12/10)	All clearing complete.	NA	NA
Water Crossings	Final (12/10)	All observed water crossings have been removed.	NA	NA
Erosion and Sedimentation Controls	Final (12/10)	All silt fence removal at restored and stabilized sites appears to be in accordance with the BMP Manual.	Continue to follow this procedure.	NA
		All observed permanent BMP's appear to be in accordance with the BMP Manual and functioning as designed.	Continue to follow this procedure.	NA
		Str 307 and 337: Observed permanent sedimentation basin with large deposit of sediment. (Photos 3-4)	Remove all sediment from basin.	T. Ramborger indicated that he has sent Northern a list of any sedimentation basins that BSC has identified as requiring cleaning.

<b>Inland Wetland and Watercourse          encroachment and mitigation</b>	<b>Final (12/10)</b>	All observed access road and wetland crossings encroaching in the wetlands have been removed. No permanent BMP's have been observed in these areas.	NA	NA
<b>Spills and Material Storage.</b>	<b>Final (12/10)</b>	NA	NA	NA
<b>Cultural Resources</b>	<b>Final (12/10)</b>	NA	NA	NA
<b>Rare, Threatened, and Endangered Species</b>	<b>Final (12/10)</b>	NA	NA	NA

**Notes and Recommendations for 12/10/2015 Final Inspection:**

- All inspected sites for the project appear to be in compliance with the restoration guidelines of the BMP Manual and all stabilized sites inspected appear to be in compliance with the stabilization guidelines of the BMP Manual. It is BSC's recommendation that all sites be re-visited to remove pieces of filter fabric, wooden stakes, pieces of timber mats, silt fence, or any other construction debris left behind. All sedimentation basins should be checked for an excess of material and cleaned out as required.
- During BSC's site inspections, it was observed that Eversource has been, and will continue to be, conducting non project-related maintenance on the existing structures and may disturb areas considered restored and/or stabilized under IRP.
- A complete record of BSC's site inspections and approved permanent BMP's can be found in Attachment 1: IRP Site Inspection Table. The Burns & McDonnell Permanent BMP Table (Draft copy, dated October 20, 2015) is also included as Attachment 2 for reference only. The BSC table shall prevail in the event of any discrepancies.
- The following structures were not inspected by BSC due to inaccessibility (located within submerged wetland areas): 210, 211, 316, 317, 318, 319, 320, 321.
- At the time of the final report, approximately two-thirds of the project has not reached permanent stabilization. While BSC has reviewed all of the restoration measures observed at each site inspected, the sites that have not yet reached 70 percent stabilization were reviewed for temporary site stabilization only. For sites that have not yet reached permanent stabilization, the BSC final site inspection verifies compliance with the BMP Manual at the time of the inspection.
- Areas of IRP Project considered restored and **permanently stabilized**:
  - CSSS, LRSS, KSS, Windham Materials Laydown areas 1 and 2, River Road Laydown yard, 87 Boston Post Road Laydown Yard, Industrial Park Road Laydown yard, Nora Lane Laydown yard.
  - Structures: 1-38, 56-65, 76-101, 121-125, 141-146, 187-188, 200, 216-221.
  - All Structures in Lebanon, Columbia, Coventry, and Mansfield Hollow are permanently stabilized.
- Areas of IRP Project considered restored and **temporarily stabilized** (not having reached 70% vegetation over 70% of the site area):
  - Structures: 39-55, 66-75, 102-120, 126-140, 147-186, 189-199, 201-215, 222-337.
- Areas of IRP Project inspected by BSC group as part of the final site inspection (all final inspections occurred after site restoration was completed):
  - Structures: 1-209, 212-315, 322-337.
