PRE-HEARING INTERROGATORIES

1. In reference to the 345kv line between Lake Road and Card Street provide the following:
 - a. Manufacturer and specifications of the 345kv power cables.
 - b. The last 12 month history containing weekly peak values of power (in Watts) transmitted through the line.
 - c. Provide the date and value of the highest power recorded along with daily peak values 15 days prior to and after.
2. What evidence if any in addition to the information filed for Docket 424 will be presented on the reliability of 345kv power lines.
3. Provide the major repair records of the Hoyts Hill Transition station in Bethel.
4. Provide the major repair records of the 345kv underground line between Archers Lane Transition Station and the Norwalk Junction Transition Station.
5. What projects if any has ISO-NE determined to be not eligible for regionalization.
6. What is the location and name of the stations found on page 15A-21 15A-22 and 15A-23 of the application.
7. Page 15-60 lists estimates of \$5.4 million for overhead and \$65 million for underground cable configurations. Provide details if any on how these figures were estimated.
